WELCOME AND CALL TO ORDER

VANESSA LEE: Good morning, everyone 3 This is the Advisory Committee on and welcome. 4 Infant and Maternal Mortality, and I'd like to 5 call the meeting to order. I'm Vanessa Lee. I'm 6 the Designated Federal Official for the committee, 7 which is administered by HRSA's Maternal and Child 8 Health Bureau. It's so good to be with all of 9 10 you. We haven't met since, I think, December of 11 last year. So, this is technically our first meeting of 2023. So, happy new year to all of the 12 committee members and ex officios, and members of 13 the public joining today. Thank you for being 14 here. 15

A lot has happened, and probably the biggest update I wanted to share is that we have a new committee Chair, Belinda Pettiford. So hopefully all of you saw the announcement on our committee website. Belinda is no stranger to all of you, the committee, or to those of us in maternal and child health. She has over thirty

Page 13

years of experience in public health and currently 1 serves as the Chief for the Women, Infant, and 2 Community Wellness Section within the North 3 Carolina Department of Health and Human Services. 4 She was an Advisory Committee member also from 5 2018 to 2022 and served as the co-lead of the 6 Health Equity Workgroup of ACIMM or the Advisory 7 Committee on Infant and Maternal Mortality, and I 8 see a lot of virtual applause within the chat. 9

Congratulations, Belinda. I am so 10 excited to be working with you again. I had the 11 opportunity first back in 2012 to meet and work 12 with you on an infant mortality initiative called 13 It's kind of hard to believe ten years 14 the COIIN. have passed and we're sort of still here working 15 on a lot of the same issues, but I'm nevertheless 16 excited and happy to get to work with you in this 17 new and different capacity. I think there's a lot 18 that can be done with your leadership. So, again, 19 thank you for accepting the invitation to serve 20 another three-year term and to be the new chair. 21 And so with that, I'm going to turn 22

Day 1 of 2

Page 14

| 1 | things over to you, Belinda. |
|----|--|
| 2 | |
| 3 | INTRODUCTIONS |
| 4 | |
| 5 | BELINDA PETTIFORD: Thank you so very |
| 6 | much, Vanessa, and thanks to everyone for all of |
| 7 | the positive comments, the e-mails, the text |
| 8 | messages that have come my way. Please know no |
| 9 | one was more surprised than me to get the request, |
| 10 | but here we are, and I truly look forward to |
| 11 | working with each and every one of you. |
| 12 | Can we put or remove the screen so we |
| 13 | can all see each other. Thank you. I like to see |
| 14 | people when I'm speaking. So, again, so very good |
| 15 | to see you all. I hope you had a wonderful |
| 16 | weekend and that your March has started off |
| 17 | amazing. As I tell people, my birthday is in |
| 18 | March, so I celebrate the whole month. I don't |
| 19 | want to rush people to feel like they've got to |
| 20 | get to me by March 14th. I do the whole month. |
| 21 | And so, it is so good to be with you all today. |
| 22 | And at this time, I think we'll go |

Page 15

| 1 | into introductions and because this is March and |
|----|--|
| 2 | it is Women's History Month, we thought our |
| 3 | introduction today should connect to women's |
| 4 | history. So today, as you introduce yourself, if |
| 5 | you can talk about that one person, that one woman |
| 6 | in your life that has truly inspired you, been |
| 7 | influential in your life, and tell us a little bit |
| 8 | about why. And so everybody can think about that |
| 9 | while we're doing introductions, and I'll kick it |
| 10 | off since I knew about it and give the rest of you |
| 11 | a moment to think about it. |
| 12 | Again, I am Belinda Pettiford. Here |

in North Carolina, I get to work with an amazing 13 team, and this was a very easy question for me. 14 Again, I had a birthday this month. My mother 15 lives with me and she is 89 years old, and she has 16 been inspiring me my entire life. She'll be 90 17 this year and she said if the Lord is willing, 18 she'll be 90 this year, and I can easily tell you 19 why. 20

21 My mother has been at the forefront 22 of everything in my life. She has been an

Page 16

activist, as she would call herself, from early 1 I have two older sisters that actually 2 on. integrated the high school in my community, and it 3 was because my mother said you're going to do 4 I'm sure my sisters did not volunteer, but this. 5 she said no, you're going to do this, and every 6 time an issue came up, my mother was the first to 7 be on that school grounds making sure she was 8 protecting my older sisters. And they learned a 9 lot from it, and she was an advocate for that. 10 She's the person that's been doing 11 voter education and voter registration my entire 12 13 life. She inspired me to go and get into the work and do voter registration and voter education and 14 to work as a judge in my poll in the community. 15 But mostly all is the love she shows 16 for her family. She loves us all. She has, you 17 know, my siblings, she's got great grands, she's 18 got great-great grands, and she has one great-19 great-great grand. And so, the fact that all of 20 us can come together and she keeps us engaged, she 21

has always been an inspiration to me and continues

22

Day 1 of 2

Page 17

1 to do so, and we look forward to celebrating her 90th birthday coming up in June. 2 So at this time, I am going to turn 3 it over to Sherri Alderman for your introduction. 4 Thank you very SHERRI ALDERMAN: 5 Belinda, you are a big act to follow. much. Ι 6 will do my best to humbly follow your 7 introduction. 8 My name is Sherri Alderman. I am a 9 developmental behavioral pediatrician by training, 10 and I'm pleased to be here today. I'm located in 11 Oregon. 12 13 Also, the person that immediately 14 came to my mind was my mother for different She was very resilient and very much a 15 reasons. survivor of multiple adverse childhood experiences 16 and really enjoyed life and liked to have a good 17 So she has been a very wonderful role model 18 time. She passed away a couple of years ago at 19 for me. 97 years of age and was to the very end just very 20 engaged, loved her -- her children, her 21 grandchildren, and her great grandchildren as 22

| 1 | well. |
|----|---|
| 2 | BELINDA PETTIFORD: Thank you so |
| 3 | much, Sherri, and we'll popcorn it over to |
| 4 | Phyllis. |
| 5 | PHYLLIS SHARPS: Good morning, |
| 6 | everyone. I'm Phyllis Sharps, Professor Emeritus |
| 7 | John Hopkins University, School of Nursing. Not |
| 8 | to break the tradition, but also my mom, and I |
| 9 | think primarily my mom was a wonderful and caring |
| 10 | woman as most folks have described their mom. But |
| 11 | she was she just finished high school but |
| 12 | implanted very early the seeds in my sister and I |
| 13 | that we were to be professional women, that we |
| 14 | were to go to college, and we were my sister |
| 15 | and I were the first women in our family to be |
| 16 | college graduates and we both went on to have |
| 17 | fabulous careers. So that's important that we all |
| 18 | know in maternal and infant health, those |
| 19 | important early years and making inspiring |
| 20 | people to do that. |
| 21 | And then I would also say a colleague |
| 22 | of mine who passed away unexpectedly in January, |

Page 19 Dr. Fanny Gaston Johansson at John Hopkins School 1 of Nursing. She accomplished many things. She 2 was 84 when she died and was educated in nursing 3 at a time when nursing -- when there were not many 4 nurses of color and certainly not many in 5 leadership positions and leading research, and it 6 has really inspired me also. Thank you. 7 BELINDA PETTIFORD: Thanks, Phyllis. 8 Tara -- Tara Sander Lee. 9 TARA SANDER LEE: Hi. Great to be 10 here with everybody. Belinda, again, 11 congratulations. We're really, really excited 12 13 that you're the chair. 14 I think, like everybody else, I look to my mother. She's an amazing woman. She still 15 -- she's here today despite many health issues, 16 but she has just been an incredible source of 17 inspiration and support and encouragement. 18 She grew up on a farm in Iowa under very poor 19 conditions. She suffered a lot of hardships, 20 abuse, poverty, and despite all of that, I just 21 saw her and even, you know, under the age of 18, 22

Page 20

| 1 | she faced an unplanned pregnancy and then adopted |
|----|--|
| 2 | the boy out and it just, you know, hearing her |
| 3 | story and what she faced when she faced that |
| 4 | unplanned pregnancy and then, you know, all the |
| 5 | stress that she was under and the conditions, he |
| 6 | was born premature and there were health issues. |
| 7 | And so, I've seen her, despite all |
| 8 | these hardships, she's just worked really hard. |
| 9 | She's trusted the Lord. She has she went back |
| 10 | to school. She got an education. She made |
| 11 | multiple sacrifices so that her children would |
| 12 | have opportunities that she did not have. And so, |
| 13 | she has just been a constant source of inspiration |
| 14 | my entire life and continues to just be and to |
| 15 | encourage me along the way. So, lots of great |
| 16 | tributes to our moms. |
| 17 | BELINDA PETTIFORD: Thank you, Tara. |
| 18 | Charlene. |
| | |

19 CHARLENE COLLIER: Hello, good
20 morning or afternoon, everyone. Charlene Collier.
21 I'm a general OB/GYN, public health professional
22 in Mississippi. So, great to see everybody.

Page 21

| 1 | Congratulations, Belinda. You are |
|----|--|
| 2 | one of my heroes. So, I'll just put that out |
| 3 | there. I've known her since the very, very |
| 4 | beginnings of my public health career and journey, |
| 5 | and she's always been there as just a kind face, |
| 6 | an expert, and just someone I'm so glad to see in |
| 7 | this role. So, we'll shout Belinda as part of |
| 8 | those women in history recognitions because she |
| 9 | truly has been an inspiration throughout, |
| 10 | especially as a Black woman in public health, like |
| 11 | Belinda's always been there through just AMCHP |
| 12 | meetings or this is from when I was getting my |
| 13 | MPH. I remember you being there even probably |
| 14 | before you knew me as even a student looking up to |
| 15 | you. So, thank you. |
| 16 | And then, of course, I have to |

And then, of course, 1 nave to 16 include my mother in case she somehow gets word 17 that I was the only one that didn't acknowledge 18 her. But my mother is an amazing inspiration. 19 Moved here to Mississippi to be here and support 20 me, someone who was a teacher and she was a 21 teacher of special needs children, who I was able 22

| 1 | to shadow as a child and go to the school where |
|----|--|
| 2 | she taught in Jersey City, New Jersey, and see how |
| 3 | she led with compassion, not only with the |
| 4 | students she cared for, but how she treated all |
| 5 | her staff, and it's something I've always taken |
| 6 | with me, and she's like you make best friends of |
| 7 | everyone that's in your office and department from |
| 8 | the janitor to the principal. They're all people |
| 9 | that you value, and that's something she taught me |
| 10 | for a very young age, and just someone who has |
| 11 | always valued treating individuals with kindness. |
| 12 | And so, I honor my mother and thank her for that. |
| 13 | But again, thanks to Belinda, and if |
| 14 | I had one more shoutout, it's to Dr. Menard as |
| 15 | well, because there's not a lot of OB/GYNs who are |
| 16 | as many role models in public health, and she |
| 17 | has always been one for me too. |
| 18 | BELINDA PETTIFORD: Thank you, |
| 19 | Charlene. We'll try to make sure your mom gets |
| 20 | word that you did shout her out, okay? |
| 21 | All right, Kate Menard. |
| 22 | KATE MENARD: I took a chance on the |
| | |

Advisory Committee on Infant and Maternal Mortality March 20, 2023 Day 1 of 2

| 1 | camera, folks. There it goes. I'm Kate Menard. |
|----|--|
| 2 | I'm a maternal and fetal medicine specialist based |
| 3 | at the University of North Carolina, and pleased |
| 4 | now to be in my sort of beginning of the second |
| 5 | year on this committee. You know, I think it's |
| 6 | the month of May instead of March. Belinda and I |
| 7 | share a March birthday, but May is when you |
| 8 | celebrate your mother's right? |
| 9 | And I have to go with that same |
| 10 | theme. I think it's pretty apparent of the women |
| 11 | that spoke so far that they have pretty strong |
| 12 | women in their, you know, that raised strong |
| 13 | women. So that's a wonderfully cool thing, and |
| 14 | I'm going to follow suit. |
| 15 | My mom was raised six kids while |
| 16 | she worked full time. You know, she was a |
| 17 | dedicated educator. She taught special ed and |
| 18 | education was a really important thing to her and |
| 19 | she inspired that into all of us. She was a woman |
| 20 | of great faith and taught I think taught me, |
| 21 | taught all of my sibs, you know, that the gifts we |
| 22 | were given, we were given to share, so I sort of |

| 1 | followed that like suit, you know, under her |
|--|--|
| 2 | direction, and it's she also raised six kids |
| 3 | where we had to collaborate a lot to, you know, |
| 4 | get the household stuff done. So I think I |
| 5 | learned that from her at around age 2 that that |
| 6 | was a really important part of being and leading |
| 7 | and being professional and I often tell people who |
| 8 | ask that I learned everything about everything |
| 9 | I know about leadership from my mom because she |
| 10 | led with her heart, you know, that took that |
| 11 | took priority, and when you do that, it works. |
| | |
| 12 | So, hats off to all our moms. And we |
| 12 13 | So, hats off to all our moms. And we can go onto to the next person. |
| | |
| 13 | can go onto to the next person. |
| 13 14 | can go onto to the next person. BELINDA PETTIFORD: Thank you, Kate. |
| 13 14 15 | can go onto to the next person. BELINDA PETTIFORD: Thank you, Kate. I'm going to jump over to Jacob. |
| 13 14 15 16 | can go onto to the next person. BELINDA PETTIFORD: Thank you, Kate. I'm going to jump over to Jacob. JACOB WARREN: Hi, everyone. I'm |
| 13 14 15 16 17 | can go onto to the next person. BELINDA PETTIFORD: Thank you, Kate. I'm going to jump over to Jacob. JACOB WARREN: Hi, everyone. I'm Jacob Warren. I'm Dean of the College of Health |
| 13 14 15 16 17 18 | can go onto to the next person. BELINDA PETTIFORD: Thank you, Kate. I'm going to jump over to Jacob. JACOB WARREN: Hi, everyone. I'm Jacob Warren. I'm Dean of the College of Health Sciences at the University of Wyoming. So, I'm |
| 13 14 15 16 17 18 19 | <pre>can go onto to the next person.</pre> |

| 1 | And I'm going to continue the |
|----|--|
| 2 | tradition. I have to, right, so I have to |
| 3 | acknowledge the role that my mother played in my |
| 4 | life. She taught me from a very early age the |
| 5 | value of hard work and the importance of that. |
| 6 | She was a diploma RN and worked her way all the |
| 7 | way up to be a very large practice manager in a |
| 8 | hospital system despite having what some would say |
| 9 | was "no degree." And so being in higher |
| 10 | education, I've always tried to make sure that we |
| 11 | don't over-emphasize the value of degree over |
| 12 | personality and drive and hard work. So, that's |
| 13 | something that she taught me in addition to in her |
| 14 | 60s become a CrossFit trainer and a national |
| 15 | champion weightlifter. So, just a little bit to |
| 16 | live up to, right? But I just have to thank her |
| 17 | for everything and for showing me how hard work |
| 18 | pays off and that we always need to look at |
| 19 | people's assets and strengths rather than what |
| 20 | someone might put on a piece of paper about them. |
| 21 | BELINDA PETTIFORD: Thank you so |
| 22 | much, Jacob. |

Advisory Committee on Infant and Maternal Mortality March 20, 2023 Day 1 of 2 Page 26 1 ShaRhonda. ShaRhonda, if you are speaking, you are muted dear. 2 SHARONDA THOMPSON: Yeah, I'm sorry 3 I was trying to start my video and about that. 4 hit the mute button. It was all going on. Let me 5 get my video together. 6 BELINDA PETTIFORD: We can see you 7 now, ShaRhonda. 8 SHARHONDA THOMPSON: Yeah, I didn't 9 know that at all. Okay, there we go. Can you 10 hear me? 11 BELINDA PETTIFORD: We can. 12 13 SHARHONDA THOMPSON: Okay. So, I am 14 ShaRhonda Thompson, and I am a community member, and my motivation, I'm sticking with the theme, my 15 mother. My mother was a single parent. 16 She honestly had her first child when she was fourteen 17 and the man should have been arrested, but that's 18 a whole other time and another conversation. And 19 she had -- I was her rainbow baby. She had a 20 miscarriage and then she had me. So my brother 21 22 and I are 7 years apart.

Page 27

| 1 | But she was a single mother. She has |
|----|--|
| 2 | mental health issues, had them her whole life. |
| 3 | She attempted suicide as a teenager. She did not |
| 4 | get the help she needed but somehow, she pushed |
| 5 | through. She was always, when I was younger, |
| 6 | working multiple jobs to make sure that I had |
| 7 | everything that I needed and still somehow was |
| 8 | physically there for me as well. You know, we had |
| 9 | I had anything for school, she was there. She |
| 10 | always was home to cook meals every night. So |
| 11 | even with her working those two jobs, even with |
| 12 | her mental health issues, she never skipped a beat |
| 13 | to be there to support me through whatever it was |
| 14 | that I had going on in life. |
| 15 | And so, that was a starting point for |

And so, that was a starting point for me, and I always said okay, well, I'm going to make sure if I ever have children, I'm going to do better. Like, I can't do less than what my mother did. Each generation has to do better, so she was my motivation to do it.

21 So, yeah, to me, those were big shoes 22 to fill, you know, to be able to completely

| 1 | provide for your children, plus still be there |
|--|--|
| 2 | physically and emotionally when they need you. |
| 3 | That was a lot. And with her dealing with mental |
| 4 | health issues, I can't imagine how hard it was for |
| 5 | her. But it never affected me. And so, I commend |
| 6 | her for everything that she has done and today, I |
| 7 | do everything that I can to help her and that is |
| 8 | why I am the person that I am today. |
| 9 | BELINDA PETTIFORD: Thank you so |
| 10 | much, ShaRhonda, for sharing your story as well, |
| 11 | and we'll get to hear a little bit more from you a |
| | |
| 12 | little bit later today. |
| 12 13 | little bit later today. Joy. |
| | |
| 13 | Joy. |
| 13 14 | Joy. JOY NEYHART: I'm trying to figure |
| 13 14 15 | Joy. JOY NEYHART: I'm trying to figure out how to get this going. We might not oh, |
| 13 14 15 16 | Joy. JOY NEYHART: I'm trying to figure out how to get this going. We might not oh, there we are. Okay. Good morning, I am Joy |
| 13 14 15 16 17 | Joy. JOY NEYHART: I'm trying to figure out how to get this going. We might not oh, there we are. Okay. Good morning, I am Joy Neyhart. I have been a pediatrician in Juno, |
| 13 14 15 16 17 18 | Joy. JOY NEYHART: I'm trying to figure out how to get this going. We might not oh, there we are. Okay. Good morning, I am Joy Neyhart. I have been a pediatrician in Juno, Alaska for twenty-three years in a small |
| 13 14 15 16 17 18 19 | Joy. JOY NEYHART: I'm trying to figure out how to get this going. We might not oh, there we are. Okay. Good morning, I am Joy Neyhart. I have been a pediatrician in Juno, Alaska for twenty-three years in a small independent practice and then last year joined the |

Page 29

lot more especially complicated kids. So, I'm 1 happy to be on this committee and help do this 2 work. 3

So, as soon as you, Belinda, said 4 that we were going to be celebrating women or role 5 models, of course, I thought of my mom too. 6 So, it's sort of apt. My mom was young when she 7 married and came from a whole family with a 8 mentally ill mother and then married a mentally 9 ill husband and still persevered and even though 10 there were lots of bumps and some trauma along the 11 way, she raised three children, and here I am. 12 Unfortunately, she developed 13 14 Alzheimer's and died a little over a year ago, just before she turned 80. And so, she is no 15 longer with us, but without her I wouldn't be who 16 I am and where I am and be able to do this work 17 with you guys. So, thank you. 18 BELINDA PETTIFORD: Thank you, Joy. 19 I'm trying to make sure I'm not 20

missing any committee members. Marie. I know you're just joining us. So, this is part of 22

21

Page 30

| 1 | Women's History Month, so we are asking each |
|---|--|
| 2 | community member as you introduce yourself to |
| 3 | share a little about the woman in your life that |
| 4 | has inspired you the most and a little bit as to |
| 5 | why. |

MARIE RAMAS: Sure. Good morning, 6 I apologize for joining in a little bit 7 evervone. late. My name is Marie Ramas. I'm a family 8 physician and living in New Hampshire and 9 practicing in primary care. I am doing work with 10 the American Academy of Family Physicians around 11 women's health and work on the Commission of 12 Health of the Public and Science as a physician 13 14 representative.

There are so many women that have 15 encouraged me and inspired me in my life. 16 I think most recently, I have been channeling the example 17 that my own mother has brought to me in my life. 18 She was an immigrant coming from the Caribbean. 19 She and my father came to America, leaving a very 20 comfortable life in Haiti during the dictatorship 21 in order to create a better future for their 22

Page 31

1 family.

She was an innovator. She was an 2 empath. She was a visionary beyond what her 3 culture in her time expected of woman at that 4 time, and she reminded me that no matter one's 5 title, that we must not forget the humanity of 6 And regardless of the experience or the others. 7 impressions that we may have, that everyone is a 8 child of a mother somewhere, and that is what 9 inspired me to become a family physician, to be a 10 family physician that took care of, you know, the 11 whole spectrum of a family continuum, and a family 12 13 physician that advocates frankly on behalf of 14 those that are unable to advocate for themselves, for which I find myself here in this group to make 15 sure that those who are unborn and yet to be born 16 in the most marginalized communities in our 17 country are seen, are heard, and are given the 18 best opportunity to be the best forms of 19 themselves, and those who birth them. So, that's 20 my example. 21

BELINDA PETTIFORD. Thank you, Marie.

22

| 1 | Have I missed any committee members |
|----|--|
| 2 | before I go into ex officio? I want to make sure |
| 3 | we haven't missed anyone. Okay, we'll go into ex |
| 4 | officios then. Charlan, are you good to go next? |
| 5 | CHARLAN KROELINGER: Good morning, |
| 6 | everyone. I'm Charlan Kroelinger, and I'm here |
| 7 | representing the Division of Reproductive Health |
| 8 | from the Centers of Disease Control and |
| 9 | Prevention. |
| 10 | BELINDA PETTIFORD: Do you want to |
| 11 | tell us about your inspiration? |
| 12 | CHALAN KROELINGER: Sure. I'll just |
| 13 | briefly mention my great-grandmother, Margaret |
| 14 | Day, who was an inspiration to me as a child. She |
| 15 | was a single mom in the 20's and 30's and had a |
| 16 | pretty steep uphill climb with my grandmother. |
| 17 | She had wanted to get a doctoral degree in library |
| 18 | science but found, with a baby, she was unable to |
| 19 | complete that degree and so always wished for her |
| 20 | grandchildren and great-grandchildren to seek |
| 21 | further education. So that really helped me focus |
| 22 | in obtaining my degree, and I hope I've made her |

Day 1 of 2

Page 33 1 proud. Thank you, Belinda. BELINDA PETTIFORD: Thank you. Thank 2 you so much. 3 We'll go to Ashley, and if you are 4 speaking, you are muted. 5 I will move on to Wendy. 6 WENDY DECOURCEY: Hello, everyone. 7 Wendy DeCourcey from the -- can you hear me? 8 Sorry, thanks -- from the Administration for 9 Children and Families from the Office of Planning, 10 Research, and Evaluation. I'm looking forward to 11 the new committee season. 12 I am going to mention, among all the 13 lovely ladies in my life, my grandmother, my dad's 14 mom, who was an amazing member of her community, 15 which was an international community, and she 16 really created a unique and friendly and 17 interactive environment there, and I just loved 18 hearing the stories about it. So, thanks. 19 BELINDA PETTIFORD: Thank you so 20 much. 21 Amanda. 22

| 1 | AMANDA COHN: Good morning, everyone. |
|----|--|
| 2 | I am Amanda Cohn. I'm the Director of the |
| 3 | Division for Birth Defects and Infant Disorders |
| 4 | and a pediatrician, and I'm happy to be here. |
| 5 | I'm going to switch it up a little |
| 6 | bit and say that the biggest inspiration in my |
| 7 | life right now are actually my three young adult |
| 8 | daughters, almost 17, 20 and 20, and I guess |
| 9 | they're bringing me so much inspiration now |
| 10 | because I feel like there is so much there are |
| 11 | so many different challenges that they're facing |
| 12 | growing up, and I appreciate that they are doing |
| 13 | it in they bring such an open perspective and |
| 14 | really a place of nonjudgment that I wish that all |
| 15 | of us had been able to experience growing up, and |
| 16 | so, I'm just really proud of the women they are |
| 17 | becoming. |
| 18 | BELINDA PETTIFORD: Wonderful, thank |
| 19 | you. |
| 20 | Alison. |
| 21 | ALISON CERNICH: Well, it's funny |
| 22 | because I was going to say the same thing as |

Page 35 1 Amanda. I have a 19-year-old and a 14-year-old girl, and I feel like I learn something every 2 single day for how they have navigated. Both how 3 they navigated the pandemic and getting to college 4 in some a weird time and just they are so 5 different than myself in terms of their 6 professional leanings and they are willing to 7 audition for their jobs every day, which I think 8 is something that we don't all do all the time. 9 And so, I am actually am inspired by them 10 constantly, and I'm also inspired by their 11 willingness to call me out when I am doing too 12 13 much and telling me when to slow down, which I don't think I would have ever dared to tell my 14 And so, I think I'm very much in Amanda's 15 mother. space because they are really looking at a very 16 different climate than the one we grew up in, and 17 they are leading in such an inspirational way. 18 So, those are my inspirations. 19

And I didn't say, I'm the Deputy
Director of the Eunice Kennedy Shriver National
Institute of Child Health and Human Development at

Day 1 of 2

| | Page 36 |
|----|--|
| 1 | the National Institutes of Health. |
| 2 | BELINDA PETTIFORD: Thank you, |
| 3 | Alison. |
| 4 | Yanique. |
| 5 | YANIQUE EDMOND: Good morning, |
| 6 | everyone, I am Yanique Edmond, and I represent the |
| 7 | Office of Minority Health and currently work on |
| 8 | different projects related to maternal health and |
| 9 | so I'm glad to represent the Office of Minority |
| 10 | Health on this particular committee. |
| 11 | This was a hard question for me, and |
| 12 | so I'm going to be very brief. It had me do a |
| 13 | whole lot of processing, so not all of us, right, |
| 14 | have mothers who represent everything. And so, in |
| 15 | my life I've developed mother pies so that I was |
| 16 | able to get what I needed at different stages of |
| 17 | my life. And so, my mother pies is a |
| 18 | configuration of strong women as well as women who |
| 19 | did the best that they could because I feel like |
| 20 | Women's Month is not just those who forged the way |
| 21 | but regular everyday women who, you know, dealt |
| 22 | with trauma but still kept going. So, in that |

Page 37

| 1 | sense, I'd put my great-great-grandmother, who is |
|----|--|
| 2 | from I'm from Haiti from my village who was |
| 3 | a medicine woman and, you know, raised seven |
| 4 | children and lost half of them because of those |
| 5 | conditions. I lift my mother, who is an immigrant |
| 6 | to this county and brought us here with hope. And |
| 7 | then I lift my first grade and kindergarten |
| 8 | teacher, Madame Enosa, who as an immigrant child |
| 9 | talked in my language and helped me find my space |
| 10 | in kindergarten through third grade. And then I |
| 11 | lift my godmother as a teenager, who is an Irish |
| 12 | nun, who did not have her own children but showed |
| 13 | us how to mother and nurture all children. And |
| 14 | so, that's my mother pie. |
| 15 | And in college, Dr. Vivian Gordon, |
| 16 | who told me that I could become, you know, a Ph.D. |
| 17 | like her, and who set the path for my future. |
| 18 | And so, all these regular women are |
| | |

my inspiration every day as well as those today who continue to face battles that we thought we had won and face them boldly. And so, that's my inspiration every day by those women and the

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

Page 38

1 future women that's to come. 2 BELINDA PETTIFORD: Thank you, Yanique, and everyone needs a whole mother pie, so 3 thank you for sharing your pie with us. 4 And last, but definitely not least, 5 we'll go to Danielle. 6 DANIELLE ELY: Hi, Belinda, thank 7 So my name is Danielle Ely, and I'm from the vou. 8 Division of Vital Statistics in the Reproductive 9 Statistics Branch, and I manage the linked infant 10 death file. 11 I suppose I also will discuss my own 12 mother, partially because I'm thinking about her a 13 lot right now because after our meeting tomorrow, 14 I leave for the airport to go visit her for her 15 birthday, as March is her birthday month as well. 16 She was just always a very steady and supportive 17 person in my life. So, thank you. 18 BELINDA PETTIFORD: Thank you, 19 Did I miss any other ex officios? Danielle. 20 And we would love to hear from the staff, and maybe 21 we'll find time later in the day, because I don't 22

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 39 |
|----|--|
| 1 | want to leave you all out, but I know we're |
| 2 | already a little behind on the schedule. So, I'll |
| 3 | try to get us back on focus. So, any other ex |
| 4 | officios? Okay. Thank you all. |
| 5 | VANESSA LEE: I think he's |
| 6 | BELINDA PETTIFORD: And I'm looking |
| 7 | right at you, Michael Warren, right in the middle |
| 8 | of the screen. Thank you. |
| 9 | MICHAEL WARREN: No worries. This |
| 10 | has been so great, and I think for me, it just |
| 11 | grounds why this work is so important to this |
| 12 | committee, hearing about the impact of mothers and |
| 13 | children and thank you all for sharing. |
| 14 | I was fortunate too. I was |
| 15 | reflecting on family. I grew up knowing all four |
| 16 | grandparents and six of eight great-grandparents, |
| 17 | and in fact, many of them lived pretty close, and |
| 18 | I had the great fortune of knowing both of the |
| 19 | grandmothers and all four of the great- |
| 20 | grandmothers. So, that notion of family really |
| 21 | resonates with me, but certainly, my mother rises |
| 22 | to the top of that. |

Page 40

| 1 | And when I think about her, I think |
|----|--|
| 2 | the thing that there's so many wonderful |
| 3 | qualities she has. One of them is her ethic of |
| 4 | service and some of my earliest memories of her, |
| 5 | one of my great-grandmothers lived about 30 |
| 6 | minutes away from us. She was widowed, and we |
| 7 | would get up every Saturday morning and drive to |
| 8 | her house to clean her house and run her errands. |
| 9 | And so, I remember that from toddlerhood all the |
| 10 | way through high school doing that. I was so |
| 11 | grateful when my brother came along because I |
| 12 | didn't have to be the one to dust. I hated |
| 13 | dusting, and so I could give him the dusting, and |
| 14 | I would do something else. But that was just the |
| 15 | expectation she instilled in us that we did this, |
| 16 | and we did it for others who had done things for |
| 17 | us. And I saw that whether she was working in the |
| 18 | church or being the leader of the 4H club or being |
| 19 | on the civic board. This was just always |
| 20 | important to her. |

21 She worked to make sure that we had22 opportunities even when she didn't have them. So,

Page 41

neither she nor my dad went to college, but she
was always insistent that that was important that
my brother and I do that and that we prepare to do
that.

She still works full time. She just, 5 in the theme of birthdays, she turned sixty-seven 6 over the weekend, still works full time. She's an 7 office manager for a family farming organization 8 back in Eastern North Carolina, and so, I am 9 grateful for her instilling that commitment of 10 service and serving others. 11

BELINDA PETTIFORD: Thank you somuch, Dr. Warren. We appreciate that.

And so, I think we've got everyone. And again, I'll try to get others in when we have a moment to do so.

17 So, I have been asked many times over 18 this last couple of weeks why did I say yes to 19 being chair for SACIM. Some people may have 20 thought I bumped my head because there's a lot 21 going on and what were you thinking. But in 22 reality, I did take time to think about it. You

Page 42

know, I spoke with some people that are really 1 near and dear to me. I spoke with the team and 2 yet, even though I was surprised, to me, it was 3 important. You know, I think, you know, the group 4 that just -- many that just left SACIM, you know, 5 with Ed and Magda and specifically Janelle, we 6 spent a lot of time with that version of ACIMM 7 really trying to elevate the work of American 8 Indians/Native Americans and making sure that we 9 elevated to the point that people understood the 10 story but they were also willing to do something 11 about it, and I don't want us to lose that. 12

13 But I also think of my own history in 14 public health. I've been doing this for thirtyplus years. I started in a local health 15 department in North Carolina in a small community, 16 where I had a health director straight out of 17 college that told me I could try anything in that 18 community I wanted to as long as I didn't get in 19 trouble and most importantly, I didn't get him in 20 And so he allowed me to be out in the trouble. 21 community and listen to people to hear the stories 22

| 1 | and to hear the voices. And I've been able to |
|--|--|
| 2 | continue to do that even in my time here in state |
| 3 | government in North Carolina, and I think one of |
| 4 | the challenges I struggle with, and I think all of |
| 5 | us do, is I think people are tired of |
| 6 | recommendations. I think our communities are |
| 7 | ready for us to move things into action. And I |
| 8 | think we need to think as we're making additional |
| 9 | recommendations, our recommendations need to |
| 10 | really focus on how do we move the work forward. |
| 11 | And so, one of the reasons that I |
| | |
| 12 | said yes is because I really wanted us to be able |
| 12 13 | said yes is because I really wanted us to be able to align some of our work with some of our |
| | |
| 13 | to align some of our work with some of our |
| 13 14 | to align some of our work with some of our national partners. You know, we can make |
| 13 14 15 | to align some of our work with some of our national partners. You know, we can make recommendations to Secretary Becerra as other |
| 13 14 15 16 | to align some of our work with some of our national partners. You know, we can make recommendations to Secretary Becerra as other recommendations have been made to other |
| 13 14 15 16 17 | to align some of our work with some of our national partners. You know, we can make recommendations to Secretary Becerra as other recommendations have been made to other secretaries over time, but without the political |
| 13 14 15 16 17 18 | to align some of our work with some of our national partners. You know, we can make recommendations to Secretary Becerra as other recommendations have been made to other secretaries over time, but without the political will, without the boots on the ground, and without |
| 13 14 15 16 17 18 19 | to align some of our work with some of our national partners. You know, we can make recommendations to Secretary Becerra as other recommendations have been made to other secretaries over time, but without the political will, without the boots on the ground, and without listening to people with lived experience that are |

Page 44

| 1 | will really focus on actionable things that we can |
|----|--|
| 2 | move forward where people can actually see |
| 3 | movement. But I also want to make sure we're |
| 4 | spending that time listening to communities, being |
| 5 | engaged with communities, and actually trying to |
| 6 | address what they view as their top priorities |
| 7 | around maternal and infant health. And I think we |
| 8 | have started that and I truly want us to be able |
| 9 | to continue to move that forward. |
| 10 | So if you all have ideas on how to do |
| 11 | this as ACIMM members, please share. I am always |
| 12 | open to new ideas. I don't think there is one |
| 13 | person that knows how to do all of this, and I |
| 14 | think we have a great team here that are willing |
| 15 | and committed to move this work forward. |
| 16 | And as you will see with all of our |
| 17 | agendas, we started this under our former interim |
| 18 | chair under Ed. We want to make sure we're |
| 19 | |
| | listening to people and we're taking that time. |

21 more with this go around.

22

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 45 |
|----|--|
| 1 | REVIEW AND APPROVE MINUTES |
| 2 | |
| 3 | BELINDA PETTIFORD: So, at this time, |
| 4 | I would like to move to the review and approval of |
| 5 | our minutes. So you should have the minutes in |
| 6 | your briefing book from our last meeting. |
| 7 | MARIE RAMAS: Motion to move the |
| 8 | minutes. |
| 9 | BELINDA PETTIFORD: Thank you, Marie. |
| 10 | Do we have a second? |
| 11 | JACOB WARREN: I'll second. |
| 12 | SHARHONDA THOMPSON: I'll second that |
| 13 | motion. |
| 14 | BELINDA PETTIFORD: Thank you, Jacob |
| 15 | and ShaRhonda. Thank you both. For those in |
| 16 | favor of this motion, if you'll say aye or wave |
| 17 | your hand. |
| 18 | [Chorus of Ayes.] |
| 19 | BELINDA PETTIFORD: And hands are |
| 20 | waving. Thank you. Any opposers? Any |
| 21 | abstentions? Thank you. Then the minutes the |
| 22 | motion passes, and our minutes have been approved. |

| | Page 46 |
|----|--|
| 1 | Excellent, thank you all. |
| 2 | And now, we're going to go straight |
| 3 | into our Federal Updates, and Michael, we're going |
| 4 | to turn it right back over to you, Dr. Warren, to |
| 5 | give us an update on what is happening with the |
| 6 | Maternal and Child Health Bureau. |
| 7 | |
| 8 | FEDERAL UPDATE |
| 9 | |
| 10 | MICHAEL WARREN: Thank you so much, |
| 11 | Belinda, and I'm sharing my screen. Can you all |
| 12 | see the slides? |
| 13 | BELINDA PETTIFORD: Yes. |
| 14 | MICHAEL WARREN: Okay, great. So |
| 15 | just a few updates from MCHB, and I want to start |
| 16 | by congratulating Belinda again and thanking her |
| 17 | for her service to ACIMM over the years, she |
| 18 | served as a member and an expert in the field, and |
| 19 | now in your time as chair. We are so looking |
| 20 | forward to getting to work with you, to learn from |
| 21 | you, and to all benefit from your leadership. So, |
| 22 | thank you for saying yes, and we look forward to |

Page 47

1 continuing this work together.

I'm going to spend just a few minutes 2 sharing some high-level updates from the Bureau. 3 As you all are probably aware, the budget for 4 fiscal year '23 passed at the end of the last 5 calendar year with a number of exciting increases. 6 Overall, the budget increased \$127 million 7 compared to last fiscal year. That includes about 8 \$823 million for the Maternal and Child Health 9 Block Grant, which includes both the Title V Block 10 Grant to states as well as special projects of 11 regional and national significance. The 12 13 Appropriations Law also reauthorized the Maternal 14 Infant and Early Childhood Home Visiting or MIECHV program, reauthorized for five years and will 15 double the MIECHV investment over the course of 16 five years. 17

And I want to note this is particularly tied to the recommendations that the committee submitted recently with regards to American Indian/Alaska Native populations. When MIECHV was reauthorized, the set-aside for tribal

Page 48

| 1 | populations doubled from 3% to 6%, which aligns |
|----|---|
| 2 | with one of the recommendations of this committee. |
| 3 | And I'm happy to share that Healthy |
| 4 | Start received \$145 million, which is about a \$13 |
| 5 | million increase that is focused on reducing and |
| 6 | eliminating disparities in maternal and infant |
| 7 | health outcomes. |
| 8 | I'm going to talk about a few |
| 9 | specific funding opportunities that are related to |
| 10 | maternal and infant health. We saw increases |
| 11 | across a number of lines. We saw a \$3 million |
| 12 | increase in the Alliance for Innovation in |
| 13 | Maternal Health or AIM project, \$3.5 million |
| 14 | increase in Screening and Treatment for Maternal |
| 15 | Mental Health and Substance Use Disorders, this is |
| 16 | the state teleconsultation program, a \$26 million |
| 17 | increase in State Maternal Health Innovation |
| 18 | Grants, \$3 million for the new Maternal Mental |
| 19 | Health Hotline on top of the existing investment, |
| 20 | and then nearly \$3 million in new funds to address |
| 21 | Sudden Infant Death Syndrome. |

There were also several items that

22

Page 49

| 1 | received funding for the first time. So there was |
|----|--|
| 2 | \$10 million to create research networks with |
| 3 | minority-serving institutions and \$10 million in |
| 4 | new funding to support integrated maternal health |
| 5 | service demonstration. So this includes |
| 6 | demonstration projects that would replicate models |
| 7 | like the pregnancy medical home and be able to |
| 8 | test those and have those go to scale. |
| 9 | Several of these are now out on the |
| 10 | street. So we recently have posted funding for |
| 11 | AIM Capacity projects, we're expecting to fund |
| 12 | around twenty-nine of those at \$200,000 each. |
| 13 | This is a great opportunity for states and |
| 14 | jurisdictions to be able to get basic support to |
| 15 | be able to advance the work of AIM in their |
| 16 | states. We'll also be funding one technical |
| 17 | assistance center at a national level to support |
| 18 | this. |
| 19 | I do want to note the funding |
| 20 | deadline is May 9th on these. Typically in the |
| 21 | Bureau, we like to have a 90-day application |

window. Because of the timing of the budget this 22

| 1 | year, we weren't able to do that. So these are on |
|----|--|
| 2 | the street for 60 days and that clock is already |
| 3 | ticking. So, I encourage you to make sure that |
| 4 | your networks are aware of these and meet that May |
| 5 | 9th deadline. |
| 6 | We also the funding opportunity |
| 7 | for the Integrated Maternal Health Services |
| 8 | project is open. We anticipate making five awards |
| 9 | at about \$1.8 each. Again, these are those |
| 10 | demonstrations kinds of projects that would |
| 11 | replicate models like pregnancy medical home to be |
| 12 | able to show improvements in maternal health |
| 13 | outcomes and reduction of disparities. |
| 14 | So, these are out on the street now. |
| 15 | I do want to make you aware of a number of other |
| 16 | ones that are going to be following very soon. We |
| 17 | hope anytime now for some of these. |
| 18 | The Maternal Health Research |
| 19 | Collaborative for Minority-Serving Institutions, I |
| 20 | mentioned that. We anticipate making sixteen |
| 21 | different research network awards, as well as one |
| 22 | award for one coordinating center. We hope to get |
| | |

Page 51

those funding opportunities posted later this month.

We will also be competing the Screening and Treatment for Maternal Mental Health and Substance Use Disorders program. Previously, we had seven states funded under that program. We anticipate making up to fourteen awards with this new iteration of the program, and that funding opportunity should post later this month.

We will be competing new State 10 Maternal Health Innovation awards. We've got a 11 number of states that are already participating in 12 this for some of them. They're reaching the end 13 14 of their performance cycle, but we also, with that significant bump in the budget, will be offering 15 new awards. We anticipate over twenty awards to 16 be made up to \$2 million each, depending on the 17 work that they are doing. 18

And then we are very excited to be able to compete a new round of funding for Healthy Start. The whole of the Healthy Start program will recompete next year in fiscal year '24. So,

Page 52

| 1 | stay tuned for that. But we did get new funding |
|----|--|
| 2 | to support about ten enhanced projects that are |
| 3 | looking at the core work that Healthy Start does |
| 4 | but also thinking about social and structural |
| 5 | determinants of health and those drivers of core |
| 6 | maternal and infant health outcomes and, in |
| 7 | particular, disparities. |
| 8 | And in particular, as was noted in |
| 9 | the President's budget proposal, getting in those |
| 10 | communities that have the highest number of excess |
| 11 | infant deaths. So, really going to places where |
| 12 | the need is great. |
| 13 | Lastly, we'll be competing a National |
| 14 | Home Visiting Workforce Development Center. This |
| 15 | was included in the reauthorization. Part of that |
| 16 | includes the Jackie Walorski Center for evidence- |
| 17 | based case management, and we anticipate that |
| 18 | being released in early May. |
| 19 | So the team has been incredibly busy |
| 20 | drafting these funding announcements that we call |
| 21 | NOFOs. There will be a lot of work going on by |
| | |

our state and community partners over the next few

22

| 1 | months in preparing applications and submitting |
|----|--|
| 2 | those, and then all of these will be awarded by |
| 3 | the end of the fiscal year on September 30th, |
| 4 | which seems like a long time away, but it will be |
| 5 | here before we know it. So I wanted to make sure |
| 6 | that all of you were aware. |
| 7 | We've been trying really hard to get |
| 8 | these out so that folks are aware of them, |
| 9 | particularly because the timelines are tight. We |
| 10 | just did a webinar last Thursday with |
| 11 | stakeholders. We had five hundred folks on the |
| 12 | webinar to hear about these funding opportunities. |
| 13 | So I think there is a lot of interest and |
| 14 | appreciate anything you can do to spread the word |
| 15 | there. |
| 16 | Lastly, I just want to share with you |
| 17 | some work that we've been doing. There's a lot |
| 18 | going on, but just a couple of highlights. |
| 19 | We've recently completed a request |
| 20 | for information process on Healthy Start. As I |
| 21 | mentioned earlier, the entire Healthy Start |
| 22 | program will be recompeting next year in fiscal |

Page 54

| 1 | year '24 and we wanted to understand from the |
|----|--|
| 2 | field broadly how things are working, where folks |
| 3 | might have feedback on the Healthy Start program. |
| 4 | So we specifically put out a request for |
| 5 | information hoping that we'd get feedback from |
| 6 | grantees, community members, people with lived |
| 7 | experience, health care providers, community |
| 8 | health workers, birthing people, parents, and |
| 9 | other members of the public. And the goal is that |
| 10 | this would inform future iterations of the Healthy |
| 11 | Start program. |

12 We got over a hundred responses for that RFI and some of the broad themes that came up 13 included increasing the emphasis on how Healthy 14 Start programs might address social and structural 15 determinants of health, and in particular, the 16 need to have multiple strategies to be able to do 17 this. A theme around supporting Healthy Start 18 programs to address racism and bias in health care 19 through education and training, family engagement, 20 and cross-sector partnerships, a theme around 21 considering the needs of rural and boarder 22

| 1 | communities and Healthy Start program design. A |
|--|--|
| 2 | recognition of the value of a single Healthy Start |
| 3 | database and challenges that switching to new |
| 4 | databases may pose for some grantees. And then |
| 5 | other related suggestions around the data |
| 6 | collection system. |
| 7 | So our team is compiling those for |
| 8 | considerations as we think about again that next |
| 9 | iteration of Healthy Start and that notice of |
| 10 | funding opportunity will be posted as we move into |
| 11 | FY-24. |
| | |
| 12 | Lastly, I just wanted to share with |
| 12 13 | Lastly, I just wanted to share with you that at the end of the last calendar year, we |
| | |
| 13 | you that at the end of the last calendar year, we |
| 13 14 | you that at the end of the last calendar year, we released updates to the Women's Preventive |
| 13 14 15 | you that at the end of the last calendar year, we released updates to the Women's Preventive Services Initiative Guidelines and our Bright |
| 13 14 15 16 | you that at the end of the last calendar year, we released updates to the Women's Preventive Services Initiative Guidelines and our Bright Futures Periodicity Schedule. As you all know, in |
| 13 14 15 16 17 | you that at the end of the last calendar year, we released updates to the Women's Preventive Services Initiative Guidelines and our Bright Futures Periodicity Schedule. As you all know, in the Affordable Care Act, we are tasked with |
| 13 14 15 16 17 18 | you that at the end of the last calendar year, we released updates to the Women's Preventive Services Initiative Guidelines and our Bright Futures Periodicity Schedule. As you all know, in the Affordable Care Act, we are tasked with supporting these guidelines as well as the Newborn |
| 13 14 15 16 17 18 19 | you that at the end of the last calendar year, we released updates to the Women's Preventive Services Initiative Guidelines and our Bright Futures Periodicity Schedule. As you all know, in the Affordable Care Act, we are tasked with supporting these guidelines as well as the Newborn Screening Guidelines through the Recommended |

Page 56

| 1 | pregnancy and, as you all know, once the |
|----|--|
| 2 | guidelines are accepted by the HRSA Administrator, |
| 3 | within a year from that, insurance companies are |
| 4 | required to provide coverage for those preventive |
| 5 | services without cost sharing. So, this goes a |
| 6 | long way as we think about improving access and |
| 7 | improving equitable care. So, the coverage for |
| 8 | these most recent changes will go into effect |
| 9 | starting January 1, 2024. |
| 10 | That is it for me. Please don't |
| 11 | hesitate to reach out if you have any questions. |
| 12 | And I know we're going to be sharing some updates |
| 13 | over the course of the next couple of days about |
| 14 | our work across the federal agencies with respect |
| 15 | to the recommendations the committee shared |
| 16 | regarding American Indian and Alaska Native |
| 17 | populations. So I look forward to that and with |
| 18 | that, I'll pass it over to my colleague, Dr. |
| 19 | Alison Cernich. |
| 20 | ALISON CERNICH: Great. Thanks, |
| 21 | Michael, so much. So, thank you for pulling up my |
| | |

22 slides. I appreciate that.

| 1 | So, I was asked to just give an |
|--|--|
| 2 | update about what is going on at NIH and |
| 3 | specifically at NICHD in the areas that are |
| 4 | covered by this committee. So, I want to thank |
| 5 | Vanessa and Michael and team for welcoming me with |
| 6 | this update. Next slide, please. |
| 7 | So the first thing I just want to |
| 8 | make sure everybody knows about is our NIH-wide |
| 9 | initiative called Implementing a Maternal Health |
| 10 | and Pregnancy Outcomes Vision for Everyone. If |
| 11 | you can go to the next slide, please. |
| | |
| 12 | So, our IMPROVE Initiative, this is |
| 12 13 | So, our IMPROVE Initiative, this is an NIH-wide effort, and we're really focused on |
| | |
| 13 | an NIH-wide effort, and we're really focused on |
| 13 14 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and |
| 13 14 15 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and improving health for women before, during, and |
| 13 14 15 16 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and improving health for women before, during, and after delivery. |
| 13 14 15 16 17 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and improving health for women before, during, and after delivery. We have a major emphasis, as |
| 13 14 15 16 17 18 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and improving health for women before, during, and after delivery. We have a major emphasis, as reflected in the most recent maternal health |
| 13 14 15 16 17 18 19 | an NIH-wide effort, and we're really focused on reducing preventable causes of maternal deaths and improving health for women before, during, and after delivery. We have a major emphasis, as reflected in the most recent maternal health numbers, specifically our maternal mortality |

| 1 | American Indian/Alaska Native community. |
|----|--|
| 2 | And so, we really are thinking about |
| 3 | those communities as well as communities that are |
| 4 | disproportionately affected. So, for example, |
| 5 | those that are in maternity care deserts. |
| 6 | So we started this we received new |
| 7 | appropriation in FY-22. So in '21, we had started |
| 8 | this just sort of organically to respond, and we |
| 9 | had put together \$13 million across NIH from own |
| 10 | base appropriations to think about maternal |
| 11 | health, and we included the impacts of COVID-19 on |
| 12 | maternal health, as well as structural racism and |
| 13 | discrimination in the context of COVID-19. We |
| 14 | were able to fund a number of grants in this area. |
| 15 | We recently hosted a workshop last |
| 16 | week on some of the awardees that received |
| 17 | funding, which was absolutely incredible to see |
| 18 | some of those results moving forward. |
| 19 | In FY-22, as I mentioned, we had a |
| 20 | new appropriation and so what we were asked to do |
| 21 | in the President's budget and also by our sponsors |
| 22 | from Congress was to really concentrate on ways to |

Page 59

get evidence-based interventions in the community
 and to establish Maternal Health Research Centers
 of Excellence.

And so, what we have done in this 4 program is establish a number of different streams 5 So, the Centers of Excellence are core. 6 of work. They were announced last year, and we are getting 7 close to awarding. We had a really robust 8 response to these requests for applications, and 9 it includes a coordinating center that will focus 10 on dissemination and implementation research, a 11 data coordinating hub, and also some data 12 methodology hubs that will support up to seven 13 Centers of Excellence across the country. 14

We also have funded a number of other 15 novel things in FY-22. So we put out a notice of 16 special interest for projects on dissemination and 17 implementation research to advance evidence-based 18 implementation of, you know, evidence-based 19 practices for maternal health and we've received 20 those applications, and those will be reviewed 21 very soon and awarded this year. 22

| 1 | We have funded through the National |
|----|--|
| 2 | Heart, Lung, and Blood Institute community- |
| 3 | implementation programs. Those are under a new |
| 4 | kind of award, which is another transaction |
| 5 | authority. So, these are collaborations between |
| 6 | academic centers and community organizations to |
| 7 | bring evidence-based care into communities, and we |
| 8 | should be funding two to three of those |
| 9 | collaborations this year. |
| 10 | We're also working with the Office of |
| 11 | the National Coordinator to do standards for the |
| 12 | electronic health record. And so, we are working |
| 13 | to pilot some things that we have done to bring |
| 14 | these standards to bear. This allows researchers |
| 15 | to use health record data for real world research. |
| 16 | And so, we are trying to establish that as a core |
| 17 | set for those of you who are familiar with these |
| 18 | standards, USCDI and USCDI-plus, they are common |
| 19 | data element sort of approaches, and that is what |
| 20 | we're working with the Office of the National |
| 21 | Coordinator for Health Technology on. |
| 22 | We have also sponsored two challenges |

Page 61

under a prize authority. So, the first is to 1 drive technology, either point-of-care technology 2 or in-home technologies. So we are using the same 3 framework that NIH used for COVID diagnostics. So 4 if you guys remember that sort of Shark Tank 5 approach, we're doing that with a number of 6 technology companies to get either at-home or 7 point-of-care diagnostics for maternity care 8 deserts in place to detect risk for people who are 9 pregnant. 10

And then we also have a community 11 partnership challenge, and I'll update on this. 12 But this is a challenge where we're actually not 13 14 funding academic organizations. We are working with community organizations that are looking to 15 build a research infrastructure, and we're 16 providing them training and mentoring and how to 17 move into the research space. And so, we are in 18 an exciting phase of this challenge right now. 19 So, if you could go to the next slide. 20

So, recently we awarded prizes to
fifteen organizations. So we had about eighty-six

Page 62

| 1 | organizations come in and get some initial |
|----|--|
| 2 | training on how they might build their research |
| 3 | infrastructure. Each organization received |
| 4 | \$10,000 and an invitation to participate in the |
| 5 | proposal phase. So, we're working with these |
| 6 | fifteen organizations. They're getting one-on-one |
| 7 | mentoring as well as webinars every week to talk |
| 8 | about how would you go about building a research |
| 9 | piece of your organization, proposing for grants |
| 10 | in the federal space, what would you need to think |
| 11 | about, and then in the next phase for those who |
| 12 | advance, we're going to have ten organizations |
| 13 | advance. They will receive a prize and they will |
| 14 | then be invited to conduct their research, and at |
| 15 | the end of that, there will be a final prize for |
| | |

And so, we're actually looking forward to building some research -- on-the-ground research teams through this challenge, and it's been really great to see communities that are really underrepresented building research in the field where they have some experience, but they

Advisory Committee on Infant and Maternal Mortality March 20, 2023 Day 1 of 2

Page 63

really just need some mentoring. 1

| 2 | As I mentioned, RADx Tech for |
|----|--|
| 3 | maternal health, we had fifteen organizations that |
| 4 | were announced as the winners of the Viability |
| 5 | Assessment Phase, meaning they've gone through a |
| 6 | number of commercialization, scientific as well as |
| 7 | sort of usability look for some of their |
| 8 | technologies, and actually, I think some of them |
| 9 | have also participated in our sister |
| 10 | organizations, HRSA's initial prizes, so they were |
| 11 | kind of ready to go here. And so, it's a great |
| 12 | way that we could see some translation. |
| 13 | And so now we're in the deep dive |
| 14 | assessment phase. They've received \$20,000, and |
| 15 | so we're trying to move some technologies forward |
| 16 | relatively rapidly. Yeah, and I'll put the |
| 17 | website in for the Connecting the Community for |
| 18 | the fifteen organizations that were announced as |
| 19 | the winners for sure, Belinda. So, I said the |
| 20 | others were in review. So that is our IMPROVE |
| 21 | Initiative. Next slide, please. |
| 22 | The other thing that we've been |

Page 64

working a lot on, we had been asked to establish a working group to produce recommendations for the federal government to address stillbirth. Next slide, please.

And so, we know that stillbirth is a 5 major issue in the United States. We have so many 6 families that have been affected by this, you 7 know, real tragedy where, you know, people are 8 being, you know, confronted with carrying 9 pregnancy almost to term or to term and then they 10 are either asked to deliver or have an emergency 11 cesarean section to deliver a child that is not 12 And so, we have been working with a 13 alive. working group of our council on this. We had four 14 working group meetings that were held from 2022 to 15 2023 thinking about the different ways that we 16 could address what was being asked of us by the 17 Congress, meaning, you know, what is the scope of 18 the problem, what are our current barriers to 19 collecting data, who is at risk, what is the 20 psychological impact, and also, you know, who is 21 at risk including communities at higher risk, and 22

Page 65

| 1 | then how do we need to treat mothers after |
|----|--|
| 2 | stillbirth, and this is something that we really |
| 3 | need to pay better attention to, specifically for |
| 4 | the psychological impact. We heard from many |
| 5 | families in our meeting in January about the long- |
| 6 | term impacts of a stillbirth on the family, the |
| 7 | effects it has on subsequent pregnancies or even |
| 8 | subsequent desire for pregnancy, as well as not |
| 9 | just on the immediate parents of the child, but |
| 10 | also the extended family, and the need for fetal |
| 11 | autopsies, the need for really a reason for that |
| 12 | death is such a central need for many of these |
| 13 | families, and we do not cover this right now. |
| 14 | We put also out a request for |
| 15 | information that was published in November, and |
| 16 | we've received responses through that. Next |
| 17 | slide, please. |
| 18 | So last week, we published our |

recommendations, and I want to thank my federal colleagues also for their tremendous work as ex officios on this group because they also assigned themselves work and we truly appreciate it.

| 1 | But we presented the initial findings |
|----|--|
| 2 | at our National Advisory Committee for feedback |
| 3 | discussion, and then the report was published last |
| 4 | week. And so, essentially our recommendations are |
| 5 | four-fold. |
| 6 | One is to improve the quality of |
| 7 | vital statistics, surveillance, and epidemiologic |
| 8 | data on stillbirth at the local, state, and |
| 9 | national level. |
| 10 | To think about how to use those |
| 11 | insights as well as from clinical data, to think |
| 12 | about disparities and identify prevention |
| 13 | opportunities. |
| 14 | To conduct implementation research to |
| 15 | help develop culturally sensitive interventions to |
| 16 | support families that have experience stillbirth. |
| 17 | And for us to establish a research |
| 18 | agenda for risk factors, mechanisms that surround |
| 19 | stillbirth, as well as definitely other ways that |
| 20 | we can prevent stillbirth. |
| 21 | So we are going to be starting to |
| 22 | implement some of these recommendations, but we've |

| 1 | also received additional language from the |
|----|--|
| 2 | Congress related to other areas where they would |
| 3 | like recommendations. So we will be continuing |
| 4 | with this group to work on stillbirth. So, more |
| 5 | to come here. Next slide, please. |
| 6 | The other thing that some of you may |
| 7 | have been aware that we did a while back is the |
| 8 | Taskforce on Research Specific to Pregnant Women |
| 9 | and Lactating Women, otherwise known as PRGLAC. |
| 10 | Next slide, please. |
| 11 | So, we originally started this work |
| 12 | in 2016 as part of the 21st Century Cures Act, and |
| 13 | we really were trying to address knowledge gaps |
| 14 | regarding safe and effective therapies and |
| 15 | vaccines for pregnant and lactating women, and we |
| 16 | had great representation not only from our federal |
| 17 | partners but we also had our professional |
| 18 | societies, industry, academia, and nonprofit |
| 19 | organizations, and NICHD was the lead for this. |
| 20 | In 2018, we provide fifteen |
| 21 | recommendations to the Secretary about how to |
| | |

| 1 | women in clinical trials, and after that, the |
|----|--|
| 2 | Secretary extended the charter, and they wanted us |
| 3 | to move towards implementation recommendations. |
| 4 | And so, we published those implementation |
| 5 | recommendations in 2020, and we have been working |
| 6 | on this ever since. And so, we are really |
| 7 | thinking about in this work how to protect women |
| 8 | through research rather than from research, |
| 9 | because we know that some of the, you know, we |
| 10 | make decisions based on information, and if we |
| 11 | don't have information, it's very difficult to |
| 12 | make decisions. So, next slide, please. |
| 13 | So, what we've done to start |
| 14 | implementing at the NIH level and this is through |
| 15 | NICHD is we've established the MPRINT Hub, which |
| 16 | is Advancing Frontiers in Health Through Maternal |
| 17 | and Pediatric Precision in Therapeutics. |
| 18 | And so, what this did was it |
| 19 | established both the knowledge core and Centers of |
| 20 | Excellence. We have two Centers of Excellence at |
| 21 | the University of California San Diego and |
| 22 | Vanderbilt, and then a partnership between Indiana |

Page 69

| 1 | and Ohio State, which serves as the central |
|----|--|
| 2 | coordinating center for that entire hub. |
| 3 | And they are thinking about how to |
| 4 | conduct and foster therapeutic-focused research |
| 5 | and obstetrics, lactation, and pediatrics, and |
| 6 | they also want to include people with disabilities |
| 7 | as part of this. It also addresses the |
| 8 | underrepresentation of women and children in |
| 9 | clinical trials. So, we're thinking about how to |
| 10 | make the knowledge available, the regulatory |
| 11 | science behind this, and also drug development |
| 12 | tools that we can use to accelerate this work, and |
| 13 | really hoping to facilitate safer, more inclusive, |
| 14 | and more cost-effective trials. |
| 45 | So a couple of overplog weire |

15 So, a couple of examples, we're looking at the effects of maternal antibiotics on 16 breastmilk and infant outcomes. We're looking at 17 electronic health records as a way to phenotype 18 how pharmacogenomics work, and we're also thinking 19 about how to use real world data for things like 20 neonatal opioid withdrawal syndrome. And so, 21 these are just a few examples of what the MPRINT 22

Page 70

Hug is doing, and I think this is going to be a
 really exciting program moving forward. Next
 slide, please.

And we continue to do our work too 4 So, NICHD is one of the largest qlobally. 5 sponsors of work in this area in maternal health 6 in the international space, and our Global Health 7 Network has been working with the Bill and Melinda 8 Gates Foundation. We just recently published a 9 transformational trial looking at whether a single 10 oral 2-gram dose of azithromycin could reduce 11 postpartum sepsis and death. The study actually 12 was really successful. In enrollment, we had 13 14 29,000 women in seven low- and middle-income countries in the study, and it was stopped because 15 there was a clear maternal benefit. It reduced by 16 one-third the risk of postpartum sepsis and death. 17

Now, we did note that it did not
reduce the risk of stillbirth, newborn sepsis, or
newborn death. But for maternal health, it had a
very significant impact. So, we stopped that
study early and those results were recently

Page 71

published with the citation there. Next slide,
 please.

And so, to continue our work in this 3 area, in looking at the effects of therapeutics in 4 pregnancy and lactation, we have been asked now to 5 recreate an Advisory Committee to monitor and 6 report on the implementation recommendations from 7 PRGLAC. And so, we are going to reconstitute this 8 likely as a working group of our council this 9 year, and we've been working with the Office of 10 Women's Health in HHS and we will again include 11 our partners here to start this committee to 12 13 monitor our implementation efforts. Next slide, And just a couple other updates, next 14 please. slide. 15

Just to let you all know, we do have two major networks that we do research through. One is the Maternal-Fetal Medicine Units and the other is the Neonatal Research Network. And so, we're hoping to announce the awardees for these networks very soon. But we did change the structure of these networks. They've been around

Page 72

for a really long time, and they are one of the, you know, biggest catalysts for clinical practice recommendations. But we're hoping to broaden and diversify the groups of investigators who can propose projects to use the network.

We're also thinking about how enhance 6 review and approval for this. So, we will be 7 reviewing protocols in a different way to make 8 sure that we have the standards that we need for 9 rigor and reproducibility and we will be reviewing 10 those protocols through scientific review. Thev 11 used to go through the networks themselves, and 12 we're bringing them back to the NIH level just to 13 14 make sure that we have some input because these are cooperative agreements in terms of the 15 sciences being conducted and ways that we can make 16 sure that we are including diverse populations as 17 well as making sure that the science is of the 18 utmost quality, because these are major 19 investments for us. Next slide, please. 20 21

21 So with that, I will close, and I'm 22 happy to answer any questions in the chat. I'll

|--|
| wait on any for now, but thanks. |
| BELINDA PETTIFORD: Thank you so |
| much, Dr. Warren and Dr. Cernich. Does anyone |
| have questions? We'll take a quick moment and try |
| to answer one or two. Yes, Tara. |
| TARA SANDER LEE: Hi, just a real |
| quick question. Thanks, Alison. For the PRGLAC, |
| I was really interested in what you presented |
| there and when you're looking at therapies, are |
| you also including opportunities that women might |
| have for fetal surgery? Are you going that far, |
| because, I mean, like, you know, CHOP is major for |
| offering fetal surgery, like women that, you know, |
| with a baby finds out that they have superficial |
| or something like twin-to-twin. So, just |

wondering how broad are you looking when you start 16 talking therapies? 17

ALISON CERNICH: Yeah. So the -- so 18 PRGLAC is really focused on pharmacotherapies, 19 Tara. But we have -- so we -- we're the major 20 sponsor for the studies that looked at spina 21 bifida repair prenatally. So we do engage in that 22

| 1 | research and it could potentially be a part of the |
|----|--|
| 2 | networks if that was thought to be an area of |
| 3 | scientific focus that we wanted to pursue. Those |
| 4 | networks might be a perfect place to propose a |
| 5 | surgical trial through the MFMU or through the |
| 6 | NRN, but we can also sponsor those trials through |
| 7 | our regular mechanisms. |
| 8 | The MOM study was one of the major |
| 9 | interventional studies that we did to look at the |
| 10 | efficacy of those surgeries. So it's within our |
| 11 | purview but not a focus for PRGLAC. PRGLAC is |
| 12 | really focused on pharmacotherapies. |
| 13 | TARA SANDER LEE: Excellent. Thank |
| 14 | you so much. |
| 15 | BELINDA PETTIFORD: Does anyone else |
| 16 | have a question? |
| 17 | SHARONDA THOMPSON: I do. |
| 18 | BELINDA PETTIFORD: Yes, ShaRhonda. |
| 19 | SHARHONDA THOMPSON: Okay. So, for |
| 20 | someone that's not in the medical field, what's |
| 21 | pharmacotherapy? |
| 22 | ALISON CERNICH: That is a great |
| | |

Page 75

1 question. So, drugs.

| 2 | SHARHONDA THOMPSON: Okay. |
|----|--|
| 3 | ALISON CERNICH: So, medications that |
| 4 | so a lot of the medications that are used |
| 5 | during pregnancy, interestingly, have never been |
| 6 | studied in pregnancy. And so, drugs like those |
| 7 | that we use to treat depression, epilepsy, you |
| 8 | know, common conditions that people have going |
| 9 | into a pregnancy often have not been studied both |
| 10 | on their effects during pregnancy on the mom as |
| 11 | well as the effects during pregnancy on the fetus. |
| 12 | And so, what we are looking at is safety and |
| 13 | efficacy and label changes that we could support |
| 14 | research on to tell, you know, not only providers, |
| 15 | but also pregnant people about what risk that they |
| 16 | are taking on, both for treatment or without |
| 17 | treatment, and also how the drugs behave |
| 18 | differently. As you know, women's bodies undergo |
| 19 | a lot of changes during pregnancy, right? And so, |
| 20 | the way that drugs are essentially behaving in the |
| 21 | body, those change as well. |

22

And so, what we are trying to do is

| 1 | study some of that to see, you know, does the dose |
|----|--|
| 2 | change? Does the duration of the dose change? |
| 3 | Does the, you know, those sorts of things are |
| 4 | pretty important for people to understand when |
| 5 | they're trying to make a decision about do I keep |
| 6 | on the same antidepressant or do I not? Is it |
| 7 | better for me to not be depressed during my |
| 8 | pregnancy and take this medication, or is it |
| 9 | better for me to go off this medication because |
| 10 | it's safer for my child, or use a different |
| 11 | medication that may be safer and more effective. |
| 12 | So, that's what we're talking about. Thanks for |
| 13 | the question. |
| 14 | BELINDA PETTIFORD: Thanks, Allison |
| 15 | and ShaRhonda. Thank you for keeping us on point. |
| 16 | ShaRhonda, did you have another follow-up? |
| 17 | SHARHONDA THOMPSON: I would. Does |
| 18 | that include I know you said during a |
| 19 | pregnancy, so has it does this mean it's a |
| 20 | study that's already been done? Does it pass on |
| 21 | through breastmilk? |
| 22 | ALISON CERNICH: So, that's the other |

| 1 | reason that we're doing yeah, we're doing |
|----------------------------------|--|
| 2 | pregnancy and lactation. So we are looking at |
| 3 | whether and how much of a drug goes into |
| 4 | breastmilk, and we have a number of studies. We |
| 5 | have a really interesting study that's looking at |
| 6 | multiple medications at the same time. So they're |
| 7 | studying breastmilk in people who are already |
| 8 | coming back for visits, and they are getting |
| 9 | samples of breastmilk, samples of maternal blood, |
| 10 | samples of infant blood to see what the |
| 11 | transmission is through breast milk of a number of |
| 12 | common commonly used medications. So that |
| | |
| 13 | study is underway now. It's called the Cuddle |
| 13 14 | study is underway now. It's called the Cuddle Study. |
| | |
| 14 | Study. |
| 14 15 | Study. SHARHONDA THOMPSON: Okay, thank you. |
| 14 15 16 | Study. SHARHONDA THOMPSON: Okay, thank you. BELINDA PETTIFORD: Thank you. I |
| 14 15 16 17 | Study. SHARHONDA THOMPSON: Okay, thank you. BELINDA PETTIFORD: Thank you. I don't see any other questions. Michael, for these |
| 14 15 16 17 18 | Study. SHARHONDA THOMPSON: Okay, thank you. BELINDA PETTIFORD: Thank you. I don't see any other questions. Michael, for these all of those grant awards that are coming out, |
| 14 15 16 17 18 19 | Study. SHARHONDA THOMPSON: Okay, thank you. BELINDA PETTIFORD: Thank you. I don't see any other questions. Michael, for these all of those grant awards that are coming out, are they all five-year awards or is there some |

Page 78 generally try to do four- or five-year awards. 1 But let me go back and look at that list 2 specifically to make sure I'm not misspeaking. 3 What we can do is we can put the link 4 to the grants.gov site or our MCHB funding site, 5 and folks can go because in that notice of funding 6 opportunity, they'll all be listed there. I was 7 looking down the list to see -- let me double 8 check because I don't want to misspeak. 9 BELINDA PETTIFORD: Okay. 10 MICHAEL WARREN: Generally, they are, 11 but I don't want to misspeak for all of them. 12 13 BELINDA PETTIFORD: Understood. 14 Thank you so very much. And thank you, Alison, for dropping that in the chat, the winners for the 15 community version of it, so that's really 16 exciting. 17 So at this time, we're going to go on 18 and continue with our agenda and we're going to 19

turn it over to Vanessa and to Sarah to talk about

the ACIMM Charter Renewal and Bylaws.

22

20

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

Page 79

ACIMM CHARTER RENEWAL AND BYLAWS

VANESSA LEE: Thank you, Belinda. 3 Hello again, everyone, and I just want to 4 introduce my colleague, Sarah Meyerholz. She is 5 the new ACIMM Program Lead in our Division of 6 Health Start and Perinatal Services at MCHB, where 7 So, before I turn it over to her to help I work. 8 walk us through some of the changes that happened 9 10 in the last two charters, I just want to give everyone a quick update on what's going to happen 11 this year. 12

So, if you did have a chance to look 13 over the charter, you'll see they expire every two 14 So, this current charter that we're under 15 vears. right now will expire September 30th. And so, we 16 are -- Sarah and I are working toward submitting 17 the package of paperwork to renew the committee's 18 charter in June. So we knew the June meeting 19 would be a little too late to ask you guys for 20 feedback, so we're presenting it now at the March 21 meeting, and as we did two years ago with Ed and 22

Page 80

| 1 | the other committee members, we wanted to take |
|----|--|
| 2 | some time to hear your feedback and input into the |
| 3 | charter, as again, we plan to renew it. |
| 4 | The key areas that most of the time |
| 5 | the members are most interested in are obviously |
| 6 | the committee's objectives and scope, what your |
| 7 | duties are, and the membership section of the |
| 8 | charter. That's where the ex officio agencies are |
| 9 | listed. So, I just want to point you to those |
| 10 | areas if you are sort of time-limited, but we |
| 11 | welcome feedback and input on any parts of the |
| 12 | charter. |
| 13 | Like I said, Sarah is going to walk |
| 14 | us through what has changed in the last two |
| 15 | versions of the charter just to see if there are |
| 16 | any new changes that are needed, or if you guys |
| 17 | think, hey there's been a lot of work already, |
| 18 | we're pretty good with how things are. |
| 19 | The other last thing I'll say before |
| 20 | turning it over to Sarah is that ultimately, this |

will be HRSA and HHS's decision. So we can't
guarantee that the feedback you send us will

Page 81

necessarily be incorporated. But we still welcome
it and last time, I think the majority, if not all
of it, was actually taken. We got really good
input from the committee members. But again,
there's no guarantees. It will ultimately be
HHS's decision.

And then, this is not your only 7 chance to give us feedback or input. We will take 8 your thoughts after the meeting. I think we 9 talked to Belinda about having committee members 10 send her any thoughts, ideas, or suggestions you 11 have for the charter, and she'll compile it all 12 and send it to Sarah and I and we will give you 13 guys, I think we said, about the next thirty days. 14 So, you'll have a month to sort of digest and 15 process what we're sharing today. Read through 16 things, ask us questions, and then again, ideally, 17 we'd get your feedback in the next thirty days or 18 so just so we have time to prepare that package 19 for submission in June. 20

21 Sarah, is there anything you want to 22 add before you walk us through the charters?

Page 82 SARAH MEYERHOLZ: I don't think so. 1 Yeah, thanks, Vanessa. I'm happy to go ahead and 2 share my screen with our first charter. 3 2019 to 2021 is the first one I'll be 4 This was included in your briefing pulling up. 5 book, and you should be able to see it now. 6 VANESSA LEE: Yes. 7 SARAH MEYERHOLZ: So, what you may 8 have seen in this particular charter was that it 9 demonstrates the trends in growing maternal 10 mortality rates, and you can how it's further 11 flushed out addressing maternal health outcomes, 12 especially in the objectives and scope of 13 14 activities, you'll see more focus on improving maternal health outcomes including preventing or 15 reducing maternal mortality and maternal 16 morbidity. So, this is a change from the previous 17 charter, the 2017 to 2019 charter, which was more 18 focused on infant mortality. 19 Moving down just a little bit in 20

20 Moving down just a fittle bit in 21 Section 4, Description of Duties, again, this just 22 reflects that further focus on maternal morbidity

| 1 | and mortality and further reflects the description |
|----|--|
| 2 | of duties by the committee to provide |
| 3 | recommendations to the Secretary in both infant |
| 4 | and maternal mortality. |
| 5 | And I don't want to make you too |
| 6 | dizzy, but going all the way down to the bottom, |
| 7 | there was nothing no changes from 2017 to 2019 |
| 8 | to this current or this charter of 2019 to 2021 |
| 9 | that I'm showing now, except for this one last |
| 10 | little sentence at the end just describing how |
| 11 | subcommittees operate within the context of the |
| 12 | broader ACIMM committee. So, this is the 2017 to |
| 13 | 2019 charter. |
| 14 | I'm going to switch over to the 2019 |
| 15 | to 2023 charter, the charter that the committee is |
| 16 | operating under currently, and we'll walk through |
| 17 | the changes from this one, the 2019 to the 2021 |
| 18 | charter. |
| 19 | So, most exciting, you'll see that |
| 20 | the first line here, the official designation, |
| 21 | really calls out that maternal mortality, and as |
| 22 | the committee is known today, the Advisory |
| | |

| 1 | Committee on Infant and Maternal Mortality. So, |
|----------|---|
| 2 | that was a big change from the previous charter. |
| 3 | In the objectives and scope of |
| 4 | activities section, these updates were suggested |
| 5 | by the former acting chair and committee members |
| 6 | and really reflect the priority areas of further |
| 7 | addressing social and structural determinants of |
| 8 | health. |
| 9 | And in the description of duties, |
| 10 | you'll see that these were edited to just really |
| 11 | reflect what has been updated in the scope of the |
| 12 | work to be further outlined here. |
| 13 | The Title V MCH Block Grant Program |
| 14 | was also added within the description of duties |
| 15 | because it had not been previously, and that is |
| 16 | the largest MCHB investment, as well as the |
| 17 | Healthy People Objectives. Healthy People 2030 |
| 18 | Objectives were always included in previous |
| | objeceries were arways incraded in providas |
| 19 | charters, but it was called something different |
| 19 20 | |
| | charters, but it was called something different |

Page 85

the Designated Federal Officer or Vanessa, as we 1 all know and love, just a brief sentence here was 2 added in the most recent charter to describe what 3 would happen with the committee operations in the 4 event that she is unable to fulfill any duties, 5 and as Vanessa noted, I am now the part-time 6 support to the committee, so very excited to be 7 working with everyone here, especially Belinda as 8 our new chairperson. 9

Moving down to Section 9, there was a 10 small adjustment here to the number of meetings 11 Historically, I think it was two 12 per year. 13 meetings per year -- and Vanessa, correct me if that's wrong -- but the committee wished to 14 provide the operation for more opportunities to 15 convene each year because there's just so much 16 work to be done, and it's difficult to continue 17 these discussions that need to be had to create 18 these wonderful recommendations and actions if 19 there aren't more times to do so. 20

21 Moving down finally, the last update 22 from 2017 to 2019 to this current -- I'm sorry,

Page 86

2019 to 2021 to this current charter, 2021 to 2023
is in the membership and designation section,
number 12, which clarifies that the ex officio
members that you heard from this morning are nonvoting and a representative from the Substance
Abuse and Mental Health Services Administration
was added. That had not been included previously.

That was just a very high-level 8 overview of the changes that were made from the 9 previous charter to the current charter. So we do 10 want to pause here and just ask if there is any 11 initial feedback, thoughts, comments, questions, 12 13 that you'd like to provide to us now, and like 14 Vanessa said, you do have the opportunity to reach back out to us. We're happy to meet and talk 15 about it, whatever works for you. We do ask that 16 you share your feedback with Belinda, who will 17 then pull everything and submit to us by April 18 But we are here right now if you have 20th. 19 anything else to share. 20

And Vanessa, anything that I missed?I'll stop sharing so we can see each other.

| 1 | VANESSA LEE: No, that was a great |
|----|--|
| 2 | overview. Thank you, Sarah. I think you hit all |
| 3 | the highlights of, again, what the feedback and |
| 4 | types of changes we've made in the last two |
| 5 | renewals. Thank you. |
| 6 | TARA SANDER LEE: I just have a quick |
| 7 | oh, sorry. |
| 8 | BELINDA PETTIFORD: No, go on, Tara. |
| 9 | I was going to see if anyone had questions. |
| 10 | TARA LEE SANDER: Sorry. Yeah, just |
| 11 | a quick question. When I first joined the |
| 12 | committee, I know at the time, I was told that we |
| 13 | would be meeting about, you know, twice a year and |
| 14 | then that changed. I guess my question, since I |
| 15 | don't have a lot of since I wasn't a member of |
| 16 | the committee for very long before it changed to |
| 17 | four, can we do we have any like stats or |
| 18 | outcome measurements to say whether, you know, was |
| 19 | a lot more work done with meeting four times a |
| 20 | year? Do we feel like this is working, it's a |
| 21 | good use of time and government money and |
| 22 | resources? So, I'm just wondering like what are |

| 1 | people's thoughts on that? |
|----|--|
| 2 | BELINDA PETTIFORD: I'll chime in, |
| 3 | but Vanessa, because I will say that under the |
| 4 | just before you came on, Tara, we did feel the |
| 5 | need to do more meetings because there were things |
| 6 | that we wanted to make sure we were following up |
| 7 | in between, but also, it gave us more |
| 8 | opportunities to get other presentations and have |
| 9 | conversations about the issues that were on the |
| 10 | table, and they are so critical. So I think we |
| 11 | felt like twice a year, it was just a long ways in |
| 12 | between trying to follow-up on the different |
| 13 | recommendations and the things that we were moving |
| 14 | forward. |
| 15 | I don't know, Vanessa, if you were |
| 16 | going to say something. |
| 17 | VANESSA LEE: Yeah. Just that |
| 18 | thank you, Belinda, and good question, Tara, and I |
| 19 | think we are definitely open to your feedback and |
| 20 | thoughts and input on how many times and it |
| 21 | doesn't have to be super precise. We can say, you |
| 22 | know, up to or approximately as we did with this |

| 1 | last one. |
|----|--|
| 2 | I will say I did notice that with |
| 3 | this sort of group in the last two years, there's |
| 4 | been three sets of recommendations that were |
| 5 | submitted to the Secretary. So you started with |
| 6 | the ones looking at COVID and the impact on |
| 7 | maternal and infant health, and then you had the |
| 8 | other recommendations mostly around workforce, you |
| 9 | know, migrant, environmental conditions, those |
| 10 | were August of 2021, and then you had the 2022 |
| 11 | recommendations focused on improving birth |
| 12 | outcomes of American Indian/Alaska Native. Prior |
| 13 | to those, that's three sets of recommendations. |
| 14 | The last I could find, you know, on our website |
| 15 | were back in 2013. So, I think that, to me, just |
| 16 | demonstrated there was definitely a lot of work |
| 17 | that you all did for the previous group as well. |
| 18 | Again, not to say that it's still needed, I don't |
| 19 | know what the right maybe number of meeting is, |
| 20 | but I will say, I think, in terms of |
| 21 | recommendations and those as an "output" of the |
| 22 | committee, there certainly was a bump up. |

Page 90 TARA SANDER LEE: Yeah, that's helps. 1 Thank you, Vanessa, that's a good point. 2 BELINDA PETTIFORD: Any other 3 thoughts? If not, if you'll take the time to just 4 review them in detail and then send me any 5 recommendations, any edits, any changes that you 6 would like to see, we'll forward back to the 7 Bureau. If you'll send it to me by April -- what 8 did we say -- April 20th, and we'll send out a 9 reminder. 10 VANESSA LEE: Yes. 11 BELINDA PETTIFORD: Just to be on the 12 safe side. 13 14 Vanessa, is there anything else that you all were going to add? Thank you so very 15 much. 16 So, we are now down for a break. We 17 are scheduled to come back at 1. Let's plan to 18

come back at 1:15, and then we'll shorten -- I'll work during the break to try to shorten the frameworks conversation so I think we'll still be on track with our time. So, if everyone could

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 91 |
|----|---|
| 1 | plan to come back at 1:15 Eastern Time and then |
| 2 | apply it to whatever time you have, and we'll see |
| 3 | you in a little bit. Thank you, all. |
| 4 | (BREAK.) |
| 5 | BELINDA PETTIFORD: I am showing 1:15 |
| 6 | on my end. That was quick, but hopefully you all |
| 7 | were able to at least take a short break. If it's |
| 8 | lunch time where you are, grab a bite, and if you |
| 9 | need to be off camera to eat, we definitely |
| 10 | understand. Well, some of you may be eating |
| 11 | breakfast now. |
| 12 | |
| 13 | FOLLOW-UP: RECOMMENDATIONS TO IMPROVE AMERICAN |
| 14 | INDIAN/ALASKA NATIVE (AI/AN) BIRTH OUTCOMES |
| 15 | |
| 16 | BELINDA PETTIFORD: So, we're going |
| 17 | to follow back through on the agenda, and now |
| 18 | we're going not go into our Follow-up to |
| 19 | Recommendations to Improve American Indian/Alaska |
| 20 | Native Birth Outcomes. |
| 21 | We wanted to have this session |
| 22 | specifically so we can follow-up on what has been |

Page 92

1 going on with the recommendations -- the last group of recommendations that we made to the 2 We did reach out to Ed, our former 3 Secretary. interim chair as well as to Janelle and to Magda 4 to get some feedback from them. I think some of 5 it they sent out to you all, but others, they may 6 But I did want to just kind of share a not have. 7 little bit about what I've heard from them, and 8 then we'll go into our own discussion and say what 9 the rest of us have been doing related to this 10 work. 11

I know Janelle is planning, next week 12 13 she will be presenting on these recommendations as 14 part of her presentation with the National Healthy Start Association's Spring Conference. So I know 15 she will be there next week, so I know that is one 16 of the things that she is focused on, not to 17 mention numerous other speaking engagements that 18 she's been invited to to continue to elevate the 19 work and the work of those recommendations. 20

Ed did share with us that he had been working, him, Janelle, as well as Magda. They had

| 1 | authored a commentary piece that was recently |
|----|--|
| 2 | published in the Minnesota Post. And so, he did |
| 3 | share that link with the committee, so you all |
| 4 | should have it, Time to Make Amends, Improving the |
| 5 | Health of American Indian and Alaska Native |
| 6 | Mothers and Infants. So, he did share the link. |
| 7 | If you have not had a chance to look at it, please |
| 8 | take a moment to do so because it was a very well- |
| 9 | written piece, as we would expect. |
| 10 | Ed also shared a dissemination effort |
| 11 | that had gone on. Otherwise, you know, a letter |
| 12 | had been sent to kind of the heads of like AMCHP, |
| 13 | the National Healthy Start Association, CityMatCH, |
| 14 | ASTO, NCHCU, and many other entities in the public |
| 15 | health field. They have been sent a copy of the |
| 16 | report for them to share with their members and |
| 17 | specifically have conversations with their boards. |
| 18 | APHA did had a webinar where it |
| 19 | was mentioned more recently for a State of Public |
| 20 | health. |
| 21 | We know Dr. Warren has mentioned |
| 22 | several maternal health webinars. We also know |

Page 94

| 1 | that Ed did a presentation for all state health |
|---|---|
| 2 | officers in our ASTHO all state health officers |
| 3 | call and a similar presentation was made to the |
| 4 | ASTHO Healthy Mothers excuse me Healthy |
| 5 | Babies subcommittee. ASTHO is also planning a |
| 6 | podcast focused on the report and there are |
| 7 | numerous other areas. |

Plans are being discussed for a 8 session of the report at an APHA annual meeting as 9 well as with the CityMatCH Conference coming up in 10 September. A journal article is being drafted 11 with hopes of a publication for JAMA as well as 12 contacts are being made with the Association of 13 14 Schools and Programs in Public Health, equity curriculum and member institutions and other 15 places. 16

Magda was able to share a few things as well. She's been working again with the CityMatCH board to make sure that it is included in their work and their ongoing efforts. They're also exploring a symposium again for CityMatCH, MCH-EPI in September on Translating and Making

| 1 | Amends Into Actual Actions. I'm excited to hear |
|----|--|
| 2 | about that as well as the National Center for |
| 3 | Fatality Review and Prevention Strategic Story- |
| 4 | Telling Learning Collaborative is using this |
| 5 | report in its team-based leadership and capacity |
| 6 | building initiative. And so again, it's an |
| 7 | example of strategic story-telling for policy |
| 8 | change. |
| 9 | So the work that has happened with |
| 10 | this last report and others, you know, this is |
| 11 | just one iteration, continues to move forward. |
| 12 | But today we want to hear from |
| 13 | everyone else. We'll talk a little bit about what |
| 14 | have we been doing with the recommendations from |
| 15 | the last report since we met in December. So just |
| 16 | a couple of questions for everyone, so you're |
| 17 | going to want to get ready to try to chime in, and |
| 18 | if you haven't done anything, talk about what you |
| 19 | plan to do. So, we'll go either direction. |
| 20 | So, what specifically has been done |
| 21 | around spreading awareness of this report since |
| 22 | December? That is basically the first question. |

| 1 | And then the second question we want |
|----|--|
| 2 | to roll into right after that is, you know, one of |
| 3 | the things we keep saying around the work that we |
| 4 | are doing is we want to make these |
| 5 | recommendations. We submit them to the Secretary, |
| 6 | but what does accountability from the Department |
| 7 | look like from the committee's perspective? When |
| 8 | we submit them, we're really in reality, what are |
| 9 | we expecting from our recommendations? Are we |
| 10 | expecting them to immediately move them into |
| 11 | implementation? Are we expecting them to provide |
| 12 | us a regular update? Specifically, what are we |
| 13 | thinking accountability is? |
| 14 | And then what else needs to be done |
| 15 | to move these recommendations forward? |
| 16 | So, we'll leave the questions up on |
| 17 | the screen so everyone can see them, but I will |
| 18 | take time now to see if there are committee |
| 19 | members that would like to chime in on any of |
| 20 | these areas. |
| 21 | Thank you, Maria Marie. |
| 22 | MARIE RAMAS: Thanks, Belinda. Yeah, |
| | |

Page 97

so a lot of work has been done over the last few 1 months on my behalf. I have shared this article 2 with the New Hampshire Endowment for Health to 3 help with cross-collaboration discussions within 4 the state department -- Health Department, as well 5 as the State Health Assessment/Health Improvement 6 Plan Advisory Council, which is Governor-directed. 7 I also have shared this with the American Academy 8 of Family Physicians, and they shared this 9 material to its members and made a particular 10 focus within the maternal health member interest 11 group. 12

I'll be working on the collaboration
CME project on Fourth Trimester for Women and
Infants and in part of my particular presentation
will be discussing different aspects of cultural
sensitivity regarding fourth trimester and
including some of the references from our piece as
well as it relates to indigenous practices.

20 We have done some work as well with 21 national indigenous organizations for the American 22 Academy of Family Physicians as well, enlisting

| 1 | our indigenous members within the organization to |
|----|--|
| 2 | provide additional support and to provide |
| 3 | additional resources for current members on |
| 4 | indigenous practices and considerations for their |
| 5 | particular populations of service. |
| 6 | Within the value-based care spectrum, |
| 7 | a lot of the discussion on health equity surrounds |
| 8 | community health centers, so rural health centers |
| 9 | and federally qualified health centers, but it's |
| 10 | very rare to discuss Indian Health Services and |
| 11 | how value-based care, alternative payment models |
| 12 | can be incorporated in order to help expand |
| 13 | resources for those particular communities that |
| 14 | Indian Health Services takes care of and |
| 15 | represents. |
| 16 | So those are a few areas that I've |
| 17 | been working on personally. I'm looking forward |
| 18 | to doing some cross-collaborative social media |
| 19 | pieces and joining on some podcasts as well to |
| 20 | talk a little bit further about the project. |
| 21 | BELINDA PETTIFORD: Wonderful Maria, |
| 22 | thank you so much for sharing. |

| 1 | Sherri, we'll jump over to you. |
|----|--|
| 2 | SHERRI ALDERMAN: Thank you very |
| 3 | much. I have also shared it with various |
| 4 | organizations. I've shared it with the National |
| 5 | Nonprofit Organization Zero to Three, a Policy |
| 6 | Center, who advocates on The Hill and supports |
| 7 | families, provides resources to families as well |
| 8 | through briefs and other family resources, as well |
| 9 | as in contact with other organizations that have |
| 10 | similar interests and missions and goals. |
| 11 | I have also shared it within the |
| 12 | American Academy of Pediatrics, specifically the |
| 13 | Council on Early Childhood, which is charged in |
| 14 | part with writing policy statements that are very |
| 15 | widely received across the country by multiple |
| 16 | early childhood professionals and with the Council |
| 17 | on Healthy Mental and Emotional Development, which |
| 18 | is charged with education and advocacy and |
| 19 | promotion of the health and well-being of all the |
| 20 | pediatric population. |
| 21 | I have shared it with Oregon's |
| 22 | Maternal and Child Health Division and have |

Page 100

received word back in one instance that they are 1 looking at how it can be implemented within the 2 visiting program in the state. And I have also 3 shared it with multiple early childhood leaders 4 within the state as well, across disciplines in 5 early childhood fields. 6 BELINDA PETTIFORD: Wonderful. Great 7 sharing and making sure that the word is getting 8 out. 9 Does anyone else want to share how 10 they've been able to elevate the work and moving 11 it throughout their community, their state, their 12 national affiliations or what you plan to do if 13 vou have not had a chance to do anything yet?

I will say in North -- oh, go on. 15 TARA SANDER LEE: Yeah. No, I'll 16 just -- I just think, you know, it's such 17 important work and whenever, you know, I interact 18 at the legislative level, because we're involved 19 in science policy and any measure that's going to 20 involve measures of health for women and infants 21 and the unborn, and so moms and babies. And so, 22

14

| 1 | anytime I interact with legislators, either at the |
|--|---|
| 2 | state or the federal level, I make them aware |
| 3 | that, you know, we've been involved in this work |
| 4 | and that they they need to consider what we've |
| 5 | written in the report, especially within the |
| 6 | Indigenous population. So, I just want you to |
| 7 | know that definitely it's it's definitely in |
| 8 | multiple conversations and I plan to continue the |
| 9 | conversation and share the work that's been done. |
| 10 | BELINDA PETTIFORD: Great. Thank |
| 11 | you, Tara. |
| | |
| 12 | Go on, Phyllis. I see you coming off |
| 12 13 | Go on, Phyllis. I see you coming off mute. |
| | |
| 13 | mute. |
| 13 14 | mute. PHYLLIS SHARPS: Yeah. Being a very |
| 13 14 15 | mute. PHYLLIS SHARPS: Yeah. Being a very new member, I was I had to go through a list of |
| 13 14 15 16 | mute. PHYLLIS SHARPS: Yeah. Being a very new member, I was I had to go through a list of nursing organizations and leadership that I plan |
| 13 14 15 16 17 | <pre>mute.</pre> |
| 13 14 15 16 17 18 | mute. PHYLLIS SHARPS: Yeah. Being a very new member, I was I had to go through a list of nursing organizations and leadership that I plan to send to because, you know, nurses are 80% of the health care workforce, and we have several |
| 13 14 15 16 17 18 19 | mute. PHYLLIS SHARPS: Yeah. Being a very new member, I was I had to go through a list of nursing organizations and leadership that I plan to send to because, you know, nurses are 80% of the health care workforce, and we have several professional groups that are really focused on |

| 1 | contact individuals formally with the link because |
|--|---|
| 2 | I just, you know, I don't want to misstep. And |
| 3 | so, he said there is none, but if folks have used |
| 4 | a letter or, you know, an introductory e-mail, I |
| 5 | would appreciate seeing something like that. You |
| 6 | know, I don't I don't know if there are, you |
| 7 | know, ramifications or are there limits on how we |
| 8 | say things about being making sure we're not |
| 9 | saying the wrong things. Thank you. |
| 10 | BELINDA PETTIFORD: I understand, |
| 11 | Phyllis, and I can share something with you if you |
| | dente been from onwone elec |
| 12 | don't hear from anyone else. |
| 12 13 | PHYLLIS SHARPS: Okay. |
| | |
| 13 | PHYLLIS SHARPS: Okay. |
| 13 14 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have |
| 13 14 15 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have yeah, I have shared it in a couple of places |
| 13 14 15 16 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have yeah, I have shared it in a couple of places myself. |
| 13 14 15 16 17 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have yeah, I have shared it in a couple of places myself. And I see Sherri dropped something |
| 13 14 15 16 17 18 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have yeah, I have shared it in a couple of places myself. And I see Sherri dropped something else in the chat. She has also shared it with the |
| 13 14 15 16 17 18 19 | PHYLLIS SHARPS: Okay. BELINDA PETTIFORD: Because I have yeah, I have shared it in a couple of places myself. And I see Sherri dropped something else in the chat. She has also shared it with the Alliance for the Advancement of Infant Mental |

| 1 | our Office of Health Equity, not to mention the |
|----|--|
| 2 | folks within our State Title V entity, making sure |
| 3 | that they're all aware, and I made sure I had a |
| 4 | conversation with the Board of the National |
| 5 | Healthy Start Association, sharing it with them, |
| 6 | as well as with the Board of AMCHP, the |
| 7 | Association of Maternal and Child Health Programs. |
| 8 | I have plans to make sure that it is distributed |
| 9 | more widely, especially within my own state |
| 10 | through provider support networks through some of |
| 11 | the work that our Perinatal Health Collective |
| 12 | does, and so looking to have the presentations |
| 13 | there so that they can see that the work how it |
| 14 | impacts the work we're doing in North Carolina. |
| 15 | Any others? Yes, Jacob. |
| 16 | JACOB WARREN: One thing I've been |
| 17 | working on is getting it disseminated within rural |
| 18 | health networks, so that's my particular |
| 19 | background, so working with rural agencies |
| 20 | because, of course, they're not one and the same, |
| 21 | but there is a significant amount of overlap |
| 22 | obviously. So that's been one element trying to |

Page 104

get that out in the National Rural Health
 Association and other organizations that focus on
 rural in particular.

And then locally, here in Wyoming, 4 I've been working with one of the tribes to look 5 at how we can again translate this into action and 6 how we can work together to develop the advocacy 7 approach that they can use, as this particular 8 tribe took over their own health services by IHS, 9 so they're able to be a lot more nimble in what 10 they can implement, and so that's part of what 11 we're doing here in Wyoming. 12

13 BELINDA PETTIFORD: Thank you, Jacob, 14 for sharing that and specifically also for bringing up rural health. That is one of the 15 other areas that I need to reach out in my own 16 state with the Office of Rural Health. We work 17 with them on numerous efforts and I just have not 18 shared this with them. So, thank you for the 19 reminder. 20

21 Okay. If no one else has anything to 22 share, you can always drop it in the chat.

Advisory Committee on Infant and Maternal Mortality Advisory Committee on Infant and Maternal Mortality March 20.

Day 1 of 2

March 20, 2023

Page 105

| 1 | But the other part of the |
|----|---|
| 2 | conversation is the accountability question. So |
| 3 | once, you know, we have submitted these |
| 4 | recommendations, you know, we work as a committee |
| 5 | to develop them. We submit them to the Secretary. |
| 6 | What are we thinking accountability looks like? |
| 7 | What are we asking of the Secretary once they get |
| 8 | the recommendations? Is it, you know, are we |
| 9 | saying we just want to get an update at every one |
| 10 | of our meetings or every other meeting on the |
| 11 | status of how the work is moving forward? Is |
| 12 | there something more specific we're looking for? |
| 13 | Or do we even know what we're looking for? I do |
| 14 | think we should have this conversation so that, |
| 15 | you know, we are clear of what we're asking, but |
| 16 | also we can pass it on to the Secretary for his |
| 17 | information. Has anyone thought about this? |
| 18 | Should I assume we haven't thought about this? |
| 19 | Yes, Jacob. |
| 20 | JACOB WARREN: I think it for me, |

JACOB WARREN: I think it -- for me, it ties into a broader conversation as well. When I've talked to other groups, part of the question

Page 106

| 1 | I get is, well, what can we do? What are you |
|----|--|
| 2 | specifically asking? How can we directly help? |
| 3 | And so, I think that's something that I think it |
| 4 | ties into something you're going to bring up a |
| 5 | little later, but how are we translating this into |
| 6 | actionable very concrete actionable things |
| 7 | we're asking people to do, and to me that comes |
| 8 | back even with this accountability piece of are |
| 9 | there specific things we're wanting to see come |
| 10 | out of the Secretary's Office, and can we be a |
| 11 | little more concrete with very specific actions |
| 12 | that could be taken that we think would help |
| 13 | translate those items. I don't know what those |
| 14 | are offhand, but to me it sort of ties into that |
| 15 | discussion. |
| 16 | BELINDA PETTIFORD: No, that's an |
| 17 | excellent point. Thank you, Jacob. |
| 18 | Are our recommendations specific |
| 19 | enough or how do we take the recommendations and |
| 20 | move them into actionable steps? And then, what |
| 21 | are you doing with those actionable steps? |
| 22 | Yes, Marie. |
| | |

Page 107

| 1 | MARIE RAMAS: Yeah, to that point, I |
|----|--|
| 2 | know we talked about at the end of the December |
| 3 | meeting what departments are already working on |
| 4 | some aspect of the recommendations that we have, |
| 5 | and can we get point people to either give us |
| 6 | updates, yes, but what are what are specific |
| 7 | concrete items as far as appropriations are |
| 8 | concerned, as far as key influencers within each |
| 9 | of those subsections are concerned so that we can |
| 10 | make sure that we are speaking to the doers and, |
| 11 | you know, the actual deliverable entities of the |
| 12 | work, and then the other area that we talked about |
| 13 | in December was what are what are ways that on |
| 14 | a state level potentially, people can advocate in |
| 15 | their specific state. So, what part of the |
| 16 | recommendations can be enacted and worked upon at |
| 17 | a state and local level versus federal level. So, |
| 18 | that's some things that I recall. |
| 19 | BELINDA PETTIFORD: Thank you, Marie. |
| 20 | That is a good point, you know, we make the |

21 recommendations to the Secretary, but many of 22 these same recommendations, you know, could easily

| 1 | be recommendations that are made to states that |
|----|--|
| 2 | will ultimately probably involve implementation in |
| 3 | a community. So how are we wording that in our |
| 4 | recommendations? Are we asking the Secretary to |
| 5 | bless them? Are we asking him, you know, to just |
| 6 | elevate them more broadly throughout his sphere of |
| 7 | influence? I think all of that is part of that. |
| 8 | Yes, Sherri. |
| 9 | SHERRI ALDERMAN: I'm curious to have |
| 10 | a deeper understanding of what the parameters are |
| 11 | that HRSA has to be able to implement these |
| 12 | recommendations, what barriers or challenges that |
| 13 | they encounter to be able to act upon them, and |
| 14 | what influences outside of HRSA impact either |
| 15 | positively or negatively of their ability to be |
| 16 | able to act on these recommendations. |
| 17 | BELINDA PETTIFORD: Great point. You |
| 18 | want to know what are the challenges to acting on |
| 19 | the recommendations. I was trying to take notes |
| 20 | at the same time you were talking, Sherri. So, I |
| 21 | know we're being recorded, but I want to make sure |
| 22 | I get them as well. And I don't know if there is |

| 1 | anything that I don't if Vanessa is there |
|----|--|
| 2 | anything that you all want to chime in to say as |
| 3 | to because, you know, we know that these are |
| 4 | recommendations coming from the Advisory |
| 5 | Committee. But once they go to the Secretary, is |
| 6 | there something more that the Secretary needs? We |
| 7 | know, again, they're just recommendations from our |
| 8 | perspective. |
| 9 | MICHAEL WARREN: Yeah, I think it's a |
| 10 | really good question, and for me a couple of |
| 11 | things come to mind. One is there there are |
| 12 | many recommendations and they're not actually just |
| 13 | limited to HRSA. So many of them apply to other |
| 14 | components of HHS and we've got other colleagues |
| 15 | on the call. |
| 16 | I think one of the ones that jumps |
| 17 | out for us often is whether there are any |
| 18 | statutory limitations. So, for example, in grant |
| 19 | programs, sometimes folks have questions about who |
| 20 | is eligible or can you can you set aside |
| 21 | specific funds or can you change the way those are |
| 22 | done, and sometimes the department has the ability |

| 1 | to do that within the existing legislation and |
|--|---|
| 2 | sometimes not. Sometimes the legislation is so |
| 3 | prescriptive that it spells out exactly who is |
| 4 | eligible and what format and exactly how the funds |
| 5 | are to be given. So that's one example where, I |
| 6 | think you always go back to what do we actually |
| 7 | have the legislative authority to do as an |
| 8 | executive branch agency and from there. |
| 9 | Beyond that, I think it depends on |
| 10 | the nature of the specific recommendation. But |
| 11 | the legislative authority is one thing that comes |
| | |
| 12 | to mind. |
| 12 13 | to mind. WENDY DECOURCEY: This is Wendy. I |
| | |
| 13 | WENDY DECOURCEY: This is Wendy. I |
| 13 14 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, |
| 13 14 15 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, which was understanding I think Sherri said it |
| 13 14 15 16 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, which was understanding I think Sherri said it the understanding what are the pathways that |
| 13 14 15 16 17 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, which was understanding I think Sherri said it the understanding what are the pathways that HHS and HRSA and the other agencies could be using |
| 13 14 15 16 17 18 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, which was understanding I think Sherri said it the understanding what are the pathways that HHS and HRSA and the other agencies could be using as well as the obstacles then to using them? So, |
| 13 14 15 16 17 18 19 | WENDY DECOURCEY: This is Wendy. I just want to emphasize something that Sherri said, which was understanding I think Sherri said it the understanding what are the pathways that HHS and HRSA and the other agencies could be using as well as the obstacles then to using them? So, I think it's two layers. First, what are the |

| 1 | around? I just want to make sure that it's not |
|----|--|
| 2 | just finding the obstacles but finding the paths. |
| 3 | BELINDA PETTIFORD: Thank you, Wendy. |
| | |
| 4 | And were you getting ready to say something? Oh, |
| 5 | maybe I lost her. We lost her, okay. |
| 6 | VANESSA LEE: Belinda, I'll just add |
| 7 | in a quick update. The ex officios and MCHB, we |
| 8 | did hold a meeting in early March to specifically |
| 9 | talk with each other about how we might be already |
| 10 | implementing or adopting some of the |
| 11 | recommendations or have plans to in the near |
| 12 | future or which ones may be goals for our agency, |
| 13 | and so we had a really great conversation amongst |
| 14 | each other, the ex officios, and we agreed to |
| 15 | continue meeting probably in conjunction with when |
| 16 | the committee meets to continue to update each |
| 17 | other on the work that's happening or planned to |
| 18 | happen around the recommendations, but also to be |
| 19 | able to lean on each other for support or looking |
| 20 | for areas we could collaborate or synergize, again |
| 21 | to move any of these recommendations forward. |
| 22 | And so I don't know if other ex |

| 1 | officio members want to mention one or two things |
|----------|--|
| 2 | that you had shared on that March call, because I |
| 3 | was personally very impressed with the work that |
| 4 | was already happening related to the |
| 5 | recommendations. And I know, Tina, not to put you |
| 6 | on the spot, but I know you had another meeting |
| 7 | and commitment to go to, and so your time was |
| 8 | limited with us, if we haven't already lost you. |
| 9 | So I just wanted to see if Tina wanted the floor |
| 10 | before she had to hop off from IHS. |
| 11 | TINA PATTERA LAU: Hello, everyone. |
| 12 | I'll go ahead and just present some brief updates |
| 13 | from IHS. Just again, I have another commitment |
| 14 | at the top of the hour. |
| 15 | I'm Tina Pattara Lau. I'm a maternal |
| 16 | child health consultant for the Indian Health |
| 17 | Service and also an OB/GYN providing care to |
| 18 | American Indian/Alaska Native patients here in |
| 19 | Phoenix, Arizona. I'm currently on the Ancestral |
| | |
| 20 | Homelands of the O'odham Tribe. Thank you for the |
| 20 21 | Homelands of the O'odham Tribe. Thank you for the opportunity to participate and present updates |

Page 113

| 1 | So, thank you again for being very |
|----|--|
| 2 | specific in the committee's recommendations. It's |
| 3 | certainly something we at IHS are listening to and |
| 4 | using to craft our path forward. |
| 5 | I'm specifically looking at three |
| 6 | areas that were involving programs and policies |
| 7 | for IHS recommendations 15 through 17 to evaluate, |
| 8 | fund, and improve oversight for IHS. I wanted to |
| 9 | call to your attention that last year in December, |
| 10 | the Consolidated Appropriations Act for fiscal |
| 11 | year 2023 was the first time in history that IHS |
| 12 | has received advanced appropriations to guarantee |
| 13 | health care services for the agency, and that will |
| 14 | not cease during a lapse in government |
| 15 | appropriations and align IHS with other federal |
| 16 | health care providers. So, thank you to our |
| 17 | Tribal Nations, tribal and urban Indian |
| 18 | organizations and others across Indian country |
| 19 | that have advocated on behalf of IHS for this |
| 20 | important support. |
| 21 | Simultaneously, in January of this |

year, IHS leadership implemented the 2023 work

Page 114

| 1 | plan. This outlines critical priorities that will |
|--------|---|
| 2 | guide agency improvements over the next year and |
| 3 | complement ongoing activities to improve patient |
| 4 | safety and provide critical oversight of our |
| 5 | plans. The work plan also prioritizes important |
| 6 | partnerships with tribes and Urban Indian |
| 7 | |
| , | organizations including communication. So we are |
| 8 | turning this forward into regular updates on our |
| | |
| 8 | turning this forward into regular updates on our |
| 8 9 | turning this forward into regular updates on our IHS website and we will be launching an MCH |

With regards to recommendations to 13 expand and diversify the workforce and, as always, 14 the strength of IHS in the collaborative practice 15 that we see especially in our rural settings with 16 midwives as well as our family medicine providers. 17 And so, our agency work plan does prioritize 18 implementing the workforce development plan as 19 well as development of diversity and equity and 20 accessibility of programs. 21

22

We also continue to support our

Page 115

| 1 | internship program for midwifery students and |
|---|---|
| 2 | expanded partnerships with academic centers |
| 3 | including some fellows and a lot of training |
| 4 | rotations at IHS. |

And then lastly, a recommendation to 5 strengthen our approach to adapt social 6 determinants of health, as you are aware, and as 7 my patients will tell me, with IHS' unique 8 delivery care system, many patients to reside in 9 maternity care deserts. Often there are barriers 10 to accessing care in the clinic, and these include 11 transportation, child care, housing. 12 And so, we 13 are mindful of that as we create our policies and 14 programs moving forward. We are looking to work with maternity care coordinator programs to 15 provide telehealth and home visitation support to 16 help supplement the work we do in our clinics and 17 hospitals and really support the parent and child 18 dyad from preconception through pregnancy as well 19 as postpartum, hopefully again to increase patient 20 access to care, as well as screening and education 21 and intervention, when possible. This will be 22

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 116 |
|----|---|
| 1 | done in partnership, of course, with our public |
| 2 | health nurses, community health workers, doulas, |
| 3 | and birth support workers. |
| 4 | Thank you for the opportunity to talk |
| 5 | to you today. |
| 6 | BELINDA PETTIFORD: Thank you, Tina. |
| 7 | And thank you for joining us today. |
| 8 | Does anyone else want to share |
| 9 | anything quickly? Any of our other ex officios? |
| 10 | You don't have to be shy. We'll take whatever you |
| 11 | have done so far, whatever you're planning to do. |
| 12 | I see you, Charlan. |
| 13 | WENDY DECOURCEY: This is Wendy from |
| 14 | oh, go ahead. Go ahead, Charlan. |
| 15 | CHARLAN KROELINGER: Thanks, Wendy. |
| 16 | I'm sorry, I was trying to find the hand raise. |
| 17 | WENDY DECOURCEY: Yeah, exactly. |
| 18 | CHARLAN KROELINGER: Thanks so much |
| 19 | to Michael and Vanessa for convening us as a |
| 20 | group. It was really helpful to hear from |
| 21 | everybody in planning for this session. I'll talk |
| 22 | about a few things that are going on across the |

Page 117

1 agency just to update those.

CDC is committed to disaggregating 2 data by race ethnicity with recent attention to 3 categorization for American Indian and Alaska 4 Native populations specifically and to date, as I 5 mentioned, DRH has published the brief pregnancy-6 related deaths among American Indian or Alaska 7 Native persons, data for Maternal Mortality Review 8 Committees in thirty-six U.S. states. 9 CDC has implemented methods for 10 classification of AIAN persons with advising from 11 tribal organizations to better capture those that 12 13 identify as American Indian or Alaska Native and 14 will continue to use this methodology in future work. 15

16 CDC's Division of Reproductive Health 17 will also continue to develop a tribal-led 18 Maternal Mortality Review Committee in partnership 19 with tribes.

20 CDC will extend funding this year to 21 increase support for these activities and once 22 implemented, the tribal-led MMRCs will receive

Page 118

| 1 | technical support to use the Maternal Mortality |
|----|--|
| 2 | Review Information Application or MMRIA platform. |
| 3 | CDC encourages MMRCs to identify all |
| 4 | pregnancy-associated deaths among all populations |
| 5 | to determine which are pregnancy-related and |
| 6 | report those findings as appropriate. Though some |
| 7 | state laws and legal processes may prohibit |
| 8 | reviews of deaths under certain circumstances, |
| 9 | like homicide, deaths with suicide and overdose as |
| 10 | a manner of death, are regularly reviewed by |
| 11 | MMRCs. This year, CDC will provide funding to |
| 12 | MMRCs for key informant interviews of surviving |
| 13 | family and friends as appropriate and as state |
| 14 | laws allow, as it is important to listen to the |
| 15 | stories of these individuals. |
| 16 | Also this year, CDC will partner with |

CDC WIII WITN 16 LUTS runer the National Institute of Child Health and Human 17 Development to update materials for the Healthy 18 Native Babies Project and will focus on efforts on 19 prevention to sleep-related deaths. The update of 20 the Healthy Native Babies Project will engage 21 tribes, tribal leaders, and tribal organizations 22

| 1 | in review of current materials and will use |
|--|--|
| 2 | feedback to inform development of new culturally |
| 3 | appropriate materials for use by these |
| 4 | populations. |
| 5 | CDC's Division of Reproductive Health |
| 6 | continues to support the Hear Her Campaign as |
| 7 | well. To date, we've launched Hear Her personal |
| 8 | stories of pregnancy-related complications from |
| 9 | American Indian people and CDC will continue to |
| 10 | amplify the voice of the pregnancy and postpartum |
| 11 | persons who experience complications during or |
| | |
| 12 | after pregnancy. |
| 12 13 | |
| | after pregnancy. |
| 13 | after pregnancy. And to further support engagement |
| 13 14 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population |
| 13 14 15 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population Health, which is a division located within the |
| 13 14 15 16 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population Health, which is a division located within the National Center for Chronic Disease Prevention and |
| 13 14 15 16 17 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population Health, which is a division located within the National Center for Chronic Disease Prevention and Health Promotion, where DRH is also located, |
| 13 14 15 16 17 18 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population Health, which is a division located within the National Center for Chronic Disease Prevention and Health Promotion, where DRH is also located, maintains the Healthy Tribe Program to promote |
| 13 14 15 16 17 18 19 | after pregnancy. And to further support engagement with AIAN populations, the Division of Population Health, which is a division located within the National Center for Chronic Disease Prevention and Health Promotion, where DRH is also located, maintains the Healthy Tribe Program to promote health, prevent disease, and strengthen cultural |

Page 120

| 1 | Good Health and Wellness in Indian Country |
|---|---|
| 2 | Program, while also maintaining funding for Good |
| 3 | Practices for Wellness Indian Country Program and |
| 4 | the Tribal Epidemiology Centers Public Health |
| 5 | Infrastructure Program. |

The National Center on Birth Defects 6 and Developmental Disabilities, Surveillance for 7 Emerging Threats to Mothers and Infants or the 8 SETMT is looking at ways to engage directly with 9 tribal epicenters to include AIAN communities and 10 surveillance to protect mothers and infants from 11 infectious disease threats and to ensure that 12 public health recommendations that are based on 13 SETMT findings are developed specifically for 14 these populations with a focus on cultural 15 sensitivity. 16

And finally, the Center for State Tribal, Local, and Territorial Support has published a new funding cycle for strengthening public health systems and services in Indian Country for tribes and tribal organizations to improve the quality, performance, and

March 20, 2023

| Page 121 |
|---|
| infrastructure of tribal health systems including |
| workforce, data, and information systems and |
| programs and services. |
| And that's just a snapshot of what |
| we're doing here at CDC to implement the very |
| thoughtful recommendations made by the committee |
| to the Secretary. Thank you. |
| BELINDA PETTIFORD: No, thank you, |
| Charlan. I was trying to keep up and takes notes |
| with everything you were saying, so thank you. |
| CHARLAN KROELINGER: I'll drop some |
| notes in the chat, Belinda. |
| BELINDA PETTIFORD: Thank you so much |
| for reading my mind. |
| Wendy, are you still there? Do you |
| want to chime in? |
| WENDY DECOURCEY: Hello. I just |
| wanted to say that I met, you know, I'm from the |
| Administration for Children and Families and I've |
| met with the Administration for Native Americans |
| at ACF and we've had a series of meetings and we |
| are developing, basically, a letter, sort of, to |
| |

| 1 | outline the various channels we're sharing the |
|----------|---|
| 2 | information out on and various activities, much as |
| 3 | Charlan has done and others have done here, and |
| 4 | the various activities we're working on. |
| 5 | We're a little we weren't able to |
| 6 | make it to the meeting, but we're working on |
| 7 | getting that information back to the committee. |
| 8 | BELINDA PETTIFORD: Thanks for |
| 9 | letting us know, Wendy. We appreciate that. |
| 10 | And I see Danielle's hand is up as |
| 11 | well. |
| 12 | DANIELLE ELY: Yeah. I was just |
| 13 | going to follow-up. So, technically, I'm also a |
| 14 | part of CDC, although a little bit separate based |
| 15 | on some funding structures. However, one of the |
| 16 | things I'm trying to do is start a special report |
| 17 | looking at AIAN infants and during pregnancy, some |
| 18 | |
| 10 | of the birth items that we have with the birth |
| 19 | of the birth items that we have with the birth certificate and with the linked birth and infant |
| | |
| 19 | certificate and with the linked birth and infant |
| 19 20 | certificate and with the linked birth and infant death file, and one of the one of the things |

| 1 | Natives, they in many cases don't always identify |
|----|--|
| 2 | as just singularly American Indian or Alaska |
| 3 | Native. And so including multiple race as a |
| 4 | category is something I'm going to be trying to do |
| 5 | in an upcoming project. |
| 6 | BELINDA PETTIFORD: Well, thank you |
| 7 | so much, dear. |
| 8 | And Michael, I see your hand is up. |
| 9 | MICHAEL WARREN: Sure, just an update |
| 10 | from MCHB. So our team regrouped after the |
| 11 | recommendations were published. Of the fifty-nine |
| 12 | recommendations, we think twenty-nine of them |
| 13 | directly apply to the work of MCHB and nineteen of |
| 14 | those 29 are things that either we or our grantees |
| 15 | are currently doing or we think they could do in |
| 16 | the near-term. So just a few examples of those. |
| 17 | One, I mentioned in the overview this |
| 18 | morning, the MIECHV, the Maternal Infant Early |
| 19 | Childhood Home Visiting Program was reauthorized, |
| 20 | and that included a doubling of the tribal set |
| 21 | aside. We've already operationalized those |
| 22 | agreements with our partners at ACF, the |

Page 124

| 1 | Administration for Children and Families. They |
|---|--|
| 2 | administer the tribal portion of MIECHV, and so we |
| 3 | have already worked to transfer those funds so |
| 4 | that the program can grow. |

We're broadly looking across all of 5 our funding opportunities to make sure that we are 6 more inclusive in our language and our funding 7 opportunities and being very direct about who is 8 eligible to apply, specifically when that includes 9 tribes, tribal organizations, and urban Indian 10 organizations. We are working to increase the 11 utilization of consultation with tribes. So that 12 happens at the HHS level with the Secretary. 13 HRSA also has a Tribal Advisory Committee that we meet 14 with regularly and the various bureaus within HRSA 15 can hear directly from tribes as well as share 16 updates on programming. 17

And then we all felt that the value of being invited onto tribal lands for the meeting in September was just so incredible, and we look forward to thinking about future Advisory Committee meetings in communities that can provide

Page 125

| | 6 |
|----|--|
| 1 | great input for the work that we're doing on the |
| 2 | various advisory committees we host. |
| 3 | Lastly, just a few things that we're |
| 4 | planning on either expanding through existing |
| 5 | grant programs or incorporating into future |
| 6 | funding announcements were specific |
| 7 | recommendations, for example, around increasing |
| 8 | the number of tribal entities that received |
| 9 | Healthy Start funding, investing in training of |
| 10 | AI/AN doulas and traditional birth workers, |
| 11 | encouraging the inclusion of universal screening |
| 12 | and referral for intimate partner violence |
| 13 | substance use disorder, depression, and anxiety, |
| 14 | and identifying strategies to facilitate access to |
| 15 | and engagement with maternal mental health |
| 16 | services. |
| 17 | So, just a snapshot of the work that |

17 So, just a snapshot of the work that 18 we're doing across our grant programs in response 19 to these recommendations.

20 BELINDA PETTIFORD: Excellent. Thank 21 you so much for sharing that. You said nineteen 22 of the twenty-nine, you're already moving forward

Page 126

into implementation. That is wonderful. Thank
 you.

Anyone else want to share? I think this is part of the accountability is definitely being able to just kind of share what is going on and how the work continues to move forward.

I think the last question we want to 7 take a moment as a committee is to talk about else 8 do we need to do to move these recommendations 9 forward. I mean, it seems like all of us are 10 going down different paths trying to make sure 11 that we are sharing the information, partnering 12 13 with others to try to get the recommendations 14 moved into implementation. It sounds like quite a few of them are in the implementation phase, so 15 that is always great to hear. But what else do we 16 need to do as a committee or what else should we 17 be doing? Any thoughts? 18

19 If no thoughts, we'll take some time.20 Thank you, Marie.

21 MARIE RAMAS: Thanks, Belinda. The 22 only other thing I could think of, if it would be

Page 127

of benefit, and I'm asking for those who have been 1 in the committee for some time or have history, 2 has there been opportunity for committee members 3 to share particular aspects of the work within 4 different departments? And so, we have the luxury 5 of having different departments that affect this 6 Advisory Committee's work come to report to us. 7 Is there bidirectionality where committee members 8 can also provide added support in reporting back 9 the work and the importance of the work from our 10 frame? 11

BELINDA PETTIFORD: So you're asking of the committee members, are they ways that we can do it, or are you asking more from an HHS perspective? I just want to make sure I'm understanding correctly, Marie.

MARIE RAMAS: Yeah. I'm asking if there has been precedent of committee members reporting to our actual stakeholders within the government to share our particular diverse perspectives as it relates to the recommendations. Is that helpful? Has that been done? And if not,

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 128 |
|----|--|
| 1 | would that be an opportunity to add further |
| 2 | accountability in the work? |
| 3 | BELINDA PETTIFORD: I don't know. |
| 4 | I'm going to ask Vanessa if there's anything you |
| 5 | can think of. I can see like with the meeting, |
| 6 | you all convened in what did you say, March |
| 7 | with all of the ex officios? January? |
| 8 | VANESSA LEE: The March meeting of ex |
| 9 | officios. |
| 10 | BELINDA PETTIFORD: March meeting? |
| 11 | Okay. |
| 12 | VANESSA LEE: I don't think well, |
| 13 | Dr. Warren, I'll let you weigh in as well. What |
| 14 | Marie is describing doesn't ring a bell to me in |
| 15 | terms of the members themselves getting the change |
| 16 | to almost contribute to that response or joint |
| 17 | accountability, I guess, of the recommendations. |
| 18 | It has been more in the direction of, you know, us |
| 19 | either through the ex officios or inviting other, |
| 20 | for example, bureaus within HRSA to come speak to |
| 21 | the committee to show again that we are taking |
| 22 | your recommendations, here's how we are adopting |

Page 129

or trying to implement them. But yeah, I think
 it's a great idea. Dr. Warren, I don't know if
 you want to add anything.

MICHAEL WARREN: I think you're 4 exactly right, Vanessa. Dr. Ramas, I think it's a 5 great suggestion if I'm understanding correctly, 6 and I think the meetings, I mean, almost like 7 expanding what you all did earlier where you all 8 talked about what you're doing to disseminate the 9 recommendations to date as folks move more into 10 implementation, being able to share that as part 11 of your role as committee members. I don't see 12 13 there being an issue with that.

I think it also really speaks to the fact that tackling issues like the ones that we bring before this committed require much more than just a government solution, that the solutions really require partnerships across all levels, and this could be a venue for discussing that.

20 WENDY DECOURCEY: This is Wendy from 21 ACF. I do want to ask, we are planning to send 22 the report out on multiple channels to present on

Page 130

1 the report on multiple channels, and we were sort of wondering if PowerPoint presentation was 2 available, like something that -- or maybe it's 3 even something that the committee would want to 4 review and decide what they wanted to emphasize in 5 But I was just thinking, all of us the report. 6 going down all of these different channels and 7 each of us creating a PowerPoint, I just wondered 8 if there was one out there already or if HRSA had 9 developed one for presenting to HHS or the like. 10 So that was just one question I have. 11 BELINDA PETTIFORD: Thank you, Wendy. 12 13 I am not aware of one, Vanessa, of a PowerPoint 14 that you all have developed. I think different ones of us have used different variations when 15 we've shared it with other groups, and I'm not 16 even sure if most of the time we're using an

even sure if most of the time we're using an
official PowerPoint. I think it's more of a
conversation and then sharing the recommendations.
But if you think that would be helpful, I don't
know if Vanessa or Sarah, is that something we
could work together on that could be shared back

Page 131

1 with the committee?

2 WENDY DECOURCEY: I was even thinking 3 that some of the partners I would present with 4 would then want to grab those slides and be using 5 them right on down their channels. So, it's just 6 a thought.

BELINDA PETTIFORD: I think it's
pretty much in line with what Phyllis was asking
earlier, did we have any templates for any other
work we're trying to move forward just to make
sure we've got consistency going across the board.
So, thank you, Wendy, for the question.

And I don't know, Vanessa, if you want to chime in now or think about it. I'll go onto Phyllis while you're thinking, okay, Phyllis?

PHYLLIS SHARPS: Yeah, one of the things is, you know, we're in -- it sounds like we are all working very hard at why dissemination of the report and recommendations and I keep thinking about, you know, the so what is of course we all expect that health is going to improve for these women and mothers and babies, but are there, as a

Page 132

part of the accountability, you know, I keep thinking what would it look like if these fiftynine recommendations were all widely implemented and is there some type of metrics with not being so prescriptive, but, I mean, are there indicators that we should be looking for or thinking about long-term that shows a difference?

I'm working with another federal 8 advisory group that's doing a strategic plan, and 9 we all had to come up with metrics, and they were 10 pretty general kinds of things, but, you know, I'm 11 thinking about, for instance, grants that some of 12 Dr. Warren talked about, do we look at how many 13 more women -- indigenous women and babies were 14 included in programs or demonstration grants where 15 it's appropriate or, you know, just what should we 16 be looking at that -- kind of that so what they we 17 really made a difference? 18

BELINDA PETTIFORD: That's a really good point, Phyllis, you know, is there something -- if I'm hearing you correctly, is there something we're tracking to show the movement of

| 1 | the work, you know, is there some metric or |
|----|--|
| 2 | something of that nature. And I think, you know, |
| 3 | I think Dr. Warren gave a really good example when |
| 4 | he went in and start sharing that twenty-nine of |
| 5 | the fifty recommendations kind of set in his shop |
| 6 | and then of those, nineteen of the twenty-nine |
| 7 | were actually moving forward. So having more of |
| 8 | those kinds of things that actually have a way to |
| 9 | clearly see what is actually moving forward with |
| 10 | the work. I think that is important. I don't |
| 11 | know if you have other thoughts about how to move |
| 12 | it forward or certain recommendations around that, |
| 13 | Phyllis. I am taking notes on what you just said. |
| 14 | PHYLLIS SHARPS: Well, again, and not |
| 15 | to put Dr. Warren on the spot, but, I mean, in his |
| 16 | report, he talked about, you know, increased |
| 17 | funding across several programs and I think I |
| 18 | heard something about increased funding for home |
| 19 | visits for indigenous women and those populations. |
| 20 | So I think that then says yes, somebody was |
| 21 | listening to the recommendations. So, not to be, |
| 22 | I mean, I don't think it should be onerous or that |

Page 134 kind of thing, but are there things that we should 1 be looking at or thinking about as we or maybe as 2 people report back on what's happened, you know, 3 in their state kind of thing or whatever or 4 agencies or that kind of thing. But just 5 something to think about, I think. 6 Thank you, BELINDA PETTIFORD: 7 Phyllis. 8 Jacob. 9 JACOB WARREN: This might be a 10 classic case of misremembering, but one thing I 11 wanted to check in, because, you know when Marie 12 13 was saying, you know, what can we do -- I'm sorry 14 to paraphrase you, Marie, but like where we can be more active, right, as committee members going out 15 and spreading this more broadly. Something 16 tickled in the back of my brain though about that 17 we, as committee members, are not to speak on 18 behalf of the committee. Am I misremembering that 19 in some way? I felt like that was something that 20 we had been, you know, that the chair of the 21 committee spoke for the committee. And so, I just 22

Page 135

| 1 | want to be sure, you know, what framework we can |
|----|--|
| 2 | operate in. You know, I'm a state employee, and |
| 3 | there are things I can and can't do as a state |
| 4 | employee. So, I'm just curious what our role can |
| 5 | be in being more active in that way or if there |
| 6 | are restrictions and parameters that we need to |
| 7 | think about. |
| 8 | BELINDA PETTIFORD: No, that is an |
| 9 | excellent point, and I don't know if I can answer |
| 10 | that questions. I think it I think the |
| 11 | conversations we've had in the past have been more |
| 12 | in line with, you know, it's one thing if you're |
| 13 | sharing these are the recommendations as a |
| 14 | committee that we all came up with together and we |
| 15 | view them as important because we, you know, we |
| 16 | have moved them onto the Secretary. I think |
| 17 | anyone on the committee could say that. I don't |
| 18 | think there's anything there that would be |
| 19 | construed as controversial or anything. |
| 20 | And like you, Jacob, I'm also a state |
| 21 | employee, so I'm always cautious of which |

22 direction I'm going. But, you know, if you stand

| 1 | behind the fact that, you know, these are the |
|----|--|
| 2 | recommendations we've moved forward, I think we're |
| 3 | all fine. So if there is something you get |
| 4 | nervous about or you're not comfortable sharing, |
| 5 | then maybe let's have a conversation about it. |
| 6 | But I don't know if there's any special guidance, |
| 7 | Vanessa or Michael, that came to us, that I'm not |
| 8 | remembering right now. |
| 9 | VANESSA LEE: I am not thinking of |
| 10 | anything in particular, but we can look into it, |
| 11 | and Dr. Warren, I saw you go off mute as well. I |
| 12 | don't know if you were going to say something, but |
| 13 | I will make a note to see if there is anything |
| 14 | I've missed. |
| 15 | MICHAEL WARREN: Yeah. The only |
| 16 | couple of things that come to mind for me is one |
| 17 | if there are media inquiries. We typically ask |
| 18 | folks to come back and work with staff and the |
| 19 | chair if there are media inquiries related to the |
| 20 | work of the committee. And then the other is just |
| 21 | always being mindful of conflicts of interest and |
| 22 | any of those that may come up in the work you're |

Page 137 But we can certainly work with Vanessa and 1 doing. Belinda both on packaging some of this into like a 2 slide deck that folks could share or use to 3 present. We can work with the team on that. 4 BELINDA PETTIFORD: Thank you. 5 Jacob, does that get to what you were needing? 6 JACOB WARREN: It does. Thank you so 7 much. 8 BELINDA PETTIFORD: Wonderful, 9 thanks. 10 As we wrap up this session, I Okay. 11 don't want to cut anyone off. Thank you all so 12 very much, and especially thanks to our ex officio 13 14 members for the work that you were able to share with us today that you're moving the 15 recommendations forward. So, we greatly 16 appreciate that. 17 18 FRAMING / LANGUAGE MATTERS DISCUSSION: 19

21 BELINDA PETTIFORD: Now we're going 22 to go into a very short discussion around framing,

20

| 1 | and, you know, I think one of the things, when I |
|----------|---|
| 2 | think of framing, you know, it's always what we |
| 3 | say and how we say it is so important as we need |
| 4 | to, you know, make sure we're having engagement at |
| 5 | all levels in this work. I don't know about you |
| 6 | all, but in my, you know, community and in my |
| 7 | state, and I'm hearing from others in other states |
| 8 | and other communities around some of the, you |
| 9 | know, some of the how things are being framed and |
| 10 | how things are not moving forward in a way that |
| 11 | they thought they would move forward because some |
| 12 | of these things have become controversial for |
| 13 | whatever reason, and we all know on this committee |
| 14 | the importance of maternal and infant health and |
| 15 | making sure that we are moving that work forward, |
| 16 | and we also know that how we see it is important |
| 17 | |
| | because we need engagement at all levels. We know |
| 18 | because we need engagement at all levels. We know this work is important, and I don't know if you |
| 18 19 | |
| | this work is important, and I don't know if you |
| 19 | this work is important, and I don't know if you all have been hearing things in your communities |

| 1 | But one of the things that we have |
|----|--|
| 2 | spent time really thinking through and some other |
| 3 | areas that I work in has been around how we are |
| 4 | framing our conversations, how we are framing our |
| 5 | discussions, how we're framing them in a way that |
| 6 | we can get engagement and some level of buy-in |
| 7 | from as many individuals and entities as possible. |
| 8 | And so I don't know how many of you |
| 9 | all are familiar with like the Frameworks |
| 10 | Institute or if any of you have worked with them. |
| 11 | We have worked with them in our state in a couple |
| 12 | of areas, I think probably the area where we spent |
| 13 | the most time working with them in our state has |
| 14 | been around the issue of tobacco use and how we |
| 15 | frame the whole conversation around, you know, |
| 16 | utilizing tobacco products and things of that |
| 17 | nature, especially when we are in a state that for |
| 18 | years and years has been known to be a high |
| 19 | tobacco-producing state. So I know we have pulled |
| 20 | in frameworks and other types of entities of that |
| 21 | nature. |
| 22 | I wanted to talk a little bit today |

Page 140

1 around any examples that you all are hearing in your own communities around the language around 2 how equity is being perceived and how we can kind 3 of get ahead of this as we're thinking through our 4 next level of work and what we're doing first and 5 how we want to really elevate maternal and infant 6 health in a way that no one should be against it. 7 It is such an important part of everything that 8 we're doing. 9

In your briefing book, you should 10 have received some information around -- I think 11 it is -- I can't remember what page in the 12 briefing book -- but some information around some 13 14 of it. There's some very short video clips that Frameworks does. I think they have like seven or 15 eight short video clips. They're like five 16 minutes each. They really talk about how do you 17 frame your message in a way that is reaching the 18 population you're trying to get it to reach. 19

And so, they've done a really good job of pulling these together, and I wanted to see if this is something that you all would be

| 1 | interested in maybe us trying to get Frameworks or |
|----|--|
| 2 | some type of entity like Frameworks to come and |
| 3 | talk to us around our messaging approach as we |
| 4 | move forward some of this work around maternal and |
| 5 | infant health. |
| 6 | So, I guess my first question to you |
| 7 | all is are you hearing these messages in your |
| 8 | communities and are you struggling with it, |
| 9 | especially as you're looking at issues of maternal |
| 10 | and infant health and especially as you roll it |
| 11 | into health inequities, and if so, how are you |
| 12 | dealing with it in your own communities or your |
| 13 | own state? |
| 14 | CHARLENE COLLIER: Belinda, just one |
| 15 | thing I would just share is hearing pushback about |
| 16 | maternal mortality in particular, like skepticism |
| 17 | from the OB community that the numbers are maybe |
| 18 | real, and by that, being like, oh, well the |
| 19 | definitions have changed, it goes out to a year, |
| 20 | it includes overdosing, it includes a lot of |
| 21 | things have "nothing" to do with obstetric care. |
| 22 | Because it's really hard for OB providers, it |

Page 142

| 1 | seems, to move past that understanding of like |
|----|--|
| 2 | scope and pregnancy relatedness, not being like an |
| 3 | indictment of their practice and care and even |
| 4 | among ACOG's Regional Maternal Mortality Review |
| 5 | Committee and the whole conversation seemed to |
| 6 | shift to like preventability seeming as a threat |
| 7 | to like providers and that, you know, not around |
| 8 | the scope where preventability is presented to the |
| 9 | CDC, which is truly like communities being safer |
| 10 | and healthier, you know, lives from the very |
| 11 | beginning. |

They're looking at it like I hear 12 preventability as like the doctor didn't do 13 something right. And so, there's this like 14 general skepticism and like defensiveness. I've 15 seen OB practices where they, rather than saying 16 like yes, we're broadening our understanding of 17 maternal mortality. We are taking accountability 18 for the lives of the people we care for through 19 that twelve months. We want to see moms get 20 through and we're not going to be like not just 21 because it's an overdose or a car accident. We're 22

| 1 | going to like try to take accountability for it in |
|----|--|
| 2 | order to make, you know, that entire period safer. |
| 3 | So, I do see that happening a lot |
| 4 | around rather than sort of embracing the |
| 5 | recommendations, it's this general pushback around |
| 6 | what preventability means and what those rising |
| 7 | numbers truly mean. And so, I do think there's |
| 8 | some understanding of like those definitions are |
| 9 | not tied to how they used to be, which is truly |
| 10 | like pregnancy-related being like what happened |
| 11 | related to care alone, that is really is an all- |
| 12 | encompassing perspective around society. Care for |
| 13 | pregnant and postpartum people. |
| 14 | I don't have a great answer for it |
| 15 | apart from like addressing it one at a time. But |
| 16 | it does become it's definitely something |
| 17 | particularly among like I would say OBs not very |
| 18 | involved with like academics and public health. |
| 19 | Like they're just, you know, in practice when they |
| 20 | see the numbers and they hear the stats, you know, |
| 21 | it gets back to like a not it type of feeling. So |
| 22 | I do think that maybe just general education or |

Page 144

outreach to organizations like ACOG, like rank and file OB/GYNS, like to not -- to better understand that -- this newer perspective on maternal mortality.

BELINDA PETTIFORD: That's a really 5 good example, Charlene, and thank you for sharing 6 it because in reality, you know, we've got this 7 Maternal Mortality Review Committee and people are 8 out, you know, reviewing the deaths and making 9 recommendations. If people aren't open to the 10 recommendations, how does it change the process 11 that, you know, we've put in place? So, that's a 12 really good example and I appreciate you sharing 13 it. 14

Marie, I see your hand is up as well. 15 MARIE RAMAS: Yeah. The work that 16 the Academy of Family Physicians is working on 17 currently speaks just to that, Charlene, that this 18 fourth trimester, we say it loosely, but it's 19 really that year postpartum in recognizing that 20 part of maternal and infant morbidity and 21 mortality, it is the continuum from being pregnant 22

Page 145

| 1 | and then turning back into, you know, chronic |
|----|--|
| 2 | conditions that can yield into worsening health |
| 3 | outcomes as well. So, how to you know, how do |
| 4 | we share the importance of understanding |
| 5 | postpartum care and the issues related to maternal |
| 6 | mortality and morbidity to health care clinicians |
| 7 | that just see adults, as often times, if there is |
| 8 | anything related to female organs, it is reverted |
| 9 | back to the OB/GYN community, and it's not |
| 10 | considered a part of just continuity of care and |
| 11 | preventive care in general for those who have |
| 12 | uteri. |

So I think that is part of the 13 messaging that this is primary care, that this is 14 essential for public health, which means that it 15 needs to be foundational information and in the 16 front of mind when anyone with a uterus comes to 17 So I appreciate your words, Charlene, the office. 18 and hopefully that adds some context as well. 19 Thank you, Marie. BELINDA PETTIFORD: 20

Jacob, I see your hand.

21

22

JACOB WARREN: We talked about this a

| 1 | little before and I sort of want to bring it back |
|----|--|
| 2 | in the context of what you're discussing, Belinda, |
| 3 | is that, you know, our states are in very |
| 4 | different places in this conversation just across |
| 5 | the whole country and, you know, just as an |
| 6 | example I want to be very careful with my |
| 7 | wording here but, you know, our most recent |
| 8 | legislative session in Wyoming, we finally |
| 9 | expanded postpartum Medicaid for twelve months and |
| 10 | it passed 16 to 14. It was one vote. So, we |
| 11 | still have a lot of baseline education that we'd |
| 12 | have to do to accompany some of the |
| 13 | recommendations sometimes. I think that packaging |
| 14 | is important to be kind of strategic and targeted |
| 15 | to where our target audience is in the process |
| 16 | because, you know, of course we all agree with the |
| 17 | need of health equity, but some people aren't even |
| 18 | at that point of the conversation if we're passing |
| 19 | by one vote for Medicaid expansion. So that's |
| 20 | sweet, and that's what I like what you're saying |
| 21 | about framework, if we can make that flexible and |
| 22 | adaptive to where an individual state is, I think |

Page 147

that's how we could get help move the needle in 1 some places too. 2 BELINDA PETTIFORD: Thank you, Jacob. 3 And again, another great example there. And 4 congratulations for expanding and extending 5 Medicaid for twelve months in the postpartum 6 We're just at our one year anniversary in period. 7 North Carolina, so we understand. Thank you. 8 Phyllis. 9 PHYLLIS SHARPS: Yeah, you know, and 10 I think -- I think it would be helpful too that we 11 get people to think about it's the childbearing 12 13 year and while we are focused on the pregnancy and 14 the postpartum, but there's also preconceptual care that needs to be included and as we see 15 assaults on abortion and contraception and that 16 kind of thing, you know, there needs to be 17 probably some thought about that. 18 And I also think framing is going to be really important 19 because this is newer data that's looking at some 20 of the outcomes of the pandemic that had 21 particularly devastating impact on Black maternal 22

| 1 | health and some of it is not new. We've known for |
|----|---|
| 2 | a long time that, you know, we had and so I |
| 3 | think this committee probably will again think |
| 4 | about looking at is there something else we need |
| 5 | to look at or that kind of thing. |
| 6 | So I think framing and also, we |
| 7 | think about too what's going on in the larger |
| 8 | society about how we teach history for other |
| 9 | people that are non-white that have contributed, |
| 10 | and looking at that tie in to help outcomes, I |
| 11 | think framing how we talk about that is going to |
| 12 | be really important. |
| 13 | BELINDA PETTIFORD: Thank you, |
| 14 | Phyllis. |
| 15 | Joy, I see your hand. |
| 16 | JOY NEYHART: I want to thank Jacob |
| 17 | for sort of opening up the door to discussion |
| 18 | about how policy makers fit in because we have so |
| 19 | much information about the good that comes when |
| 20 | pregnant mothers and newborns through the first |
| 21 | two years of life before they become eligible for |
| 22 | public school services, when funding is provided |

Page 149

| 1 | for quality programs, health and education and |
|----|--|
| 2 | childcare, everyone's outcome is better. And so, |
| 3 | it's sort of like we keep talking about it over |
| 4 | and over about what's going to help the situation, |
| 5 | but it's the policy makers that have to make this |
| 6 | happen. And so, can we just start drafting |
| 7 | legislation? I know that's sort of not no, we |
| 8 | can't but how do we get beyond the Secretary to |
| 9 | the people who can draft the legislation to |
| 10 | improve the outcomes? |
| 11 | BELINDA PETTIFORD: Thank you, Joy. |
| 12 | And I do think that again is part of how we frame |
| 13 | the message and, you know, how do we move closer |
| 14 | to the political will, which, I think, of course |
| 15 | differently in every community. You know, I think |
| 16 | it's one thing what may happen in Congress, but we |
| 17 | all have our own state legislators, we have our |
| 18 | communities. And so, I do think that's a very |
| 19 | good point. |
| | |

20 You know, I think this is a longer 21 conversation that we want to have, but I do think 22 it would be helpful if you all are in agreement,

Page 150

| 1 | if we can try to bring in someone like Frameworks |
|----|--|
| 2 | or some entity that can kind of help walk us |
| 3 | through this piece and help us think through it a |
| 4 | little bit more clearly about how do we get the |
| 5 | message out, realizing that the message will be |
| 6 | different from each community. One community may |
| 7 | be prepared to hear the message this way, the next |
| 8 | may be prepared to listen to it in a different |
| 9 | perspective. So, do you all have any thoughts |
| 10 | about that? Is it something you would want us to |
| 11 | try to move forward? I will work with Vanessa and |
| 12 | Sarah on that for a future meeting. Just let me |
| 13 | know. |

TARA SANDER LEE: I'd like -- I think 14 it just has to be bipartisan. That's my only 15 request that it can't be too left or right-16 leaning, that it has to be a message that, you 17 know, that if we really want this to move forward, 18 we have to -- we're going to have to be really 19 So I'm a little cautious about what careful. 20 Frameworks is going to do. I'd be curious to see 21 what their plan is. Like are they actually going 22

March 20, 2023

| | Page 151 |
|----|---|
| 1 | to listen to us and what we're saying and then |
| 2 | like take our recommendations? So, I'm cautiously |
| 3 | optimistic. |
| 4 | BELINDA PETTIFORD: Thank you, Tara. |
| 5 | And again, as I'm sharing, I do think it's |
| 6 | different from community to community. So, I |
| 7 | think what Frameworks does, based on my |
| 8 | experience, is they help you craft your message |
| 9 | for your multiple communities, because different |
| 10 | communities are prepared to hear messages |
| 11 | differently. So, I do think that your thought is |
| 12 | noted. So, thank you. |
| 13 | Does anyone have an issue with moving |
| 14 | forward with this? You can drop it in the chat or |
| 15 | come off of mute and say so now or, as they say, |
| 16 | forever hold your peace. |
| 17 | I don't see anyone coming off. I |
| 18 | don't see any movement in the chat. If you want |
| 19 | to reach out to me privately, you have my e-mail, |
| 20 | so you can also do that also. |
| 21 | Okay. So, we are closer to getting |
| 22 | back on time, but we are down for a short break. |

Page 152 So why don't we just shorten our break and to ten 1 minutes instead of fifteen so some people can get 2 up and stretch. It's cool here today as well, 3 Jacob. Our version of cool, not your version of 4 cool. So if we can all come back at 2:30, we'll 5 be right back on track. So, thanks everyone. 6 7 (BREAK.) 8 9 DATA REFRESHER ON INFANT MORTALITY, MATERNAL 10 MORTALITY, SEVERE MATERNAL MORBIDITY, AND 11 PREGNANCY-RELATED MORTALITY 12 13 BELINDA PETTIFORD: Welcome back, 14 I am showing 2:30 on my end on the East 15 everyone. I hope we had a nice short break there. Coast. 16 As we continue on with our agenda, our next 17 session is on data. We're doing a Refresher on 18 Infant Mortality, Maternal Mortality, Severe 19 Maternal Morbidity, as well as Pregnancy-related 20 Mortality. And so, we are very fortunate to have 21 with us an awesome data team to share with us 22

March 20, 2023

| | Page 153 |
|----|---|
| 1 | today, and we're going to pass it onto them. |
| 2 | So, first we have Danielle Ely will |
| 3 | start, then Donna Hoyert, Ashley Busacker, and |
| 4 | Ashley Hirai, and anyone's name that I |
| 5 | mispronounced, please forgive me right from the |
| 6 | beginning and pronounce it correctly so I will |
| 7 | learn better for the next go around. So, we'll |
| 8 | start with Danielle. |
| 9 | DANIELLE ELY: Thank you, Belinda. |
| 10 | So, my name is Danielle Ely, and I'm from the |
| 11 | Division of Vital Statistics. It's in the |
| 12 | Reproductive Statistics Branch, and today I'm |
| 13 | going to be discussing data and then some basic |
| 14 | statistics on infant mortality by a variety of |
| 15 | maternal and infant characteristics. Next. |
| 16 | So currently the 2021 final data for |
| 17 | births, fetal deaths, and infant mortality from |
| 18 | the general mortality file is available. We also |
| 19 | have provisional estimates through quarter 3 of |
| 20 | 2022 for births and for infant mortality from the |
| 21 | general mortality file. |
| 22 | We're expecting to release a |

| 1 | provisional birth report with the 2022 data in |
|----|--|
| 2 | May, and the final data should come out in August, |
| 3 | like it has in the past couple of years. |
| 4 | Additionally, we expect to release a |
| 5 | provisional fetal death report with 2022 data in |
| 6 | the fall and the final death the final fetal |
| 7 | death data will be released by the end of this |
| 8 | year. Next. |
| 9 | The linked birth and infant death |
| 10 | data, which is the file that I manage and where |
| 11 | most of the information for this presentation |
| 12 | comes from, is available through the 2020 period |
| 13 | and 2019 cohort data. We're hoping to release the |
| 14 | 2021 period and 2020 cohort data by the end of |
| 15 | May; however, we have run into some delays this |
| 16 | year. |
| 17 | We're also developing a provisional |
| 18 | linked file report, and we hope to release it for |
| 19 | the first time later this year with the 2022 |
| 20 | provisional data. Next. |
| 21 | So the linked file matches infant |
| 22 | deaths with their corresponding birth |

Page 155

| 1 | certificates, which allows for a more in-depth |
|----|--|
| 2 | analysis of factors related to infant death, and |
| 3 | this can include things such as the maternal |
| 4 | demographic characteristics or pregnancy risk |
| 5 | factors. Next. |
| 6 | In general, the maternal race and |
| 7 | ethnicity data from the linked file is considered |
| 8 | more accurate than the race information from the |
| 9 | general mortality file because the mother is self- |
| 10 | reporting this information. |
| 11 | In general, regarding the linked |
| 12 | file, we've been trying to work on more timely |
| 13 | releases of the data, and one way that we have |
| 14 | done this for data users is to release a single |
| 15 | file that can be used for a period of cohort |
| 16 | analysis rather than having two separate files we |
| 17 | have to look over and then release. And this |
| 18 | began with the 2017 period and 2016 cohort data. |
| 19 | Next. |
| 20 | Over time, the overall improvements |
| 21 | in the timeliness of the linked file data are |

22 related to the improvements in the timeliness of

| 1 | the mortality file. We're continuing to try to |
|----------|--|
| 2 | release the final linked files earlier. There |
| 3 | have been some limitations to this and some of |
| 4 | this is related to IT resources. |
| 5 | Additionally, one of the things we're |
| 6 | hoping to do is release this provisional data in a |
| 7 | report which should get some of the linked file |
| 8 | infant mortality information out about six months |
| 9 | earlier than the final data currently. Next. |
| 10 | So, this is the last little bit |
| 11 | before I actually show some data, and that's on |
| 12 | the fetal death data that we have in our branch. |
| 13 | We recently released the 2021 fetal death file, |
| 14 | which includes both demographic and cause of death |
| 15 | information. We are now able to release |
| 16 | demographic and cause of death at the same time |
| 17 | because of improvements overall in the cause of |
| 18 | death coding. |
| 19 | So, national cause of fetal death |
| | |
| 20 | wasn't available until 2014 the 2014 data year, |
| 20 21 | wasn't available until 2014 the 2014 data year, that is and we've released demographic and |

| 1 | first time starting in 2017. Next. |
|----|--|
| 2 | So, this figure is showing the total |
| 3 | early fetal and late fetal mortality rates from |
| 4 | 2000 to 2021. Over this time, total fetal |
| 5 | mortalities declined 13% to 4.73 deaths per 1,000 |
| 6 | live births and fetal deaths and the early fetal |
| 7 | mortality rates declined 11% and late fetal |
| 8 | mortality rates went down 16%. However, even |
| 9 | looking at these and these declines have been |
| 10 | relatively small over time. Next. |
| 11 | This figure is showing the declines |
| 12 | in perinatal, total infant, neonatal, and |
| 13 | postnatal mortality rates from 2000 to 2020. The |
| 14 | total infant mortality rate declined 21%. The |
| 15 | perinatal rate declined 19%. Neonatal declined |
| 16 | 23%, and the post-neonatal rate went down 18% over |
| 17 | these two decades. Next. |
| 18 | Here, you can see the infant, |
| 19 | neonatal, post-neonatal, and perinatal mortality |
| 20 | rates for just the most recent years. So, from |
| 21 | 2015 to 2020, the perinatal rate declined 6% to |
| 22 | 5.64. The overall infant mortality rate declined |

| 1 | 8% to 5.42. The neonatal rate declined 10%, and |
|----|--|
| 2 | the post-neonatal rate went down 5%. Next. |
| 3 | This figure comes this figure came |
| 4 | from a perinatal report and showed declines for |
| 5 | non-Hispanic Black, non-Hispanic white, and |
| 6 | Hispanic women from 2017 to 2019. For each of |
| 7 | these groups, rates declined between 4 and 5% over |
| 8 | that time frame. Next. |
| 9 | One of the things that many of you |
| 10 | probably know is that infant mortality does vary |
| 11 | by maternal age. Infants of the youngest mothers, |
| 12 | which are those that are under 20 years of age, |
| 13 | had the highest mortality rates and infants of |
| 14 | women in their early 30s have the lowest. Next. |
| 15 | The four years of data included on |
| 16 | this slide, 2017 to 2020, are the years that we |
| 17 | have national reporting on single race known |
| 18 | Hispanic race data. So, during this time period, |
| 19 | rates declined 5 to 8% for infants of Black, |
| 20 | Native Hawaiian or other Pacific Islander, |
| 21 | Hispanic, and white women. Infants of American |
| 22 | Indian or Alaska Native women and infants of Asian |

| 1 | women had even larger declines over this time |
|----|--|
| 2 | period, which were closer to 17%. Next. |
| 3 | The next couple of slides are focused |
| 4 | on gestational age data. So, in 2020, 10% of |
| 5 | infants were born at less than 37 weeks gestation |
| 6 | and this varies by maternal race and Hispanic |
| 7 | origin. The percent preterm was lowest for Asian |
| 8 | women at 8.5% and highest at 14.4% for Black |
| 9 | women. Next. |
| 10 | Infants born preterm have |
| 11 | substantially higher mortality rates than infants |
| 12 | born at term. And those born at the lowest |
| 13 | gestational ages have the highest infant mortality |
| 14 | rates. In fact, if we break this down even |
| 15 | further than what is here, you would see even |
| 16 | higher rates for those at 28 weeks or less |
| 17 | gestation. Next. |
| 18 | Similar to the percent born preterm, |
| 19 | preterm infant mortality rates vary by maternal |
| 20 | race and Hispanic origin, and infants of Asian |
| 21 | women have the lowest mortality rates, which were |
| 22 | about half of the rates that we see for infants of |
| | |

Page 160

| 1 | Black women, who had the highest rates. Next. |
|----|--|
| 2 | The next few slides are showing |
| 3 | infant mortality by a few select maternal |
| 4 | characteristics that I thought might be of |
| 5 | interest to this group. Infant mortality by WIC |
| 6 | receipt vary by race and Hispanic origin. So |
| 7 | infants of white women who received WIC had higher |
| 8 | mortality rates than infants of white women who |
| 9 | did not receive WIC. This is different from the |
| 10 | infants of Black and Hispanic women. So, infants |
| 11 | of Black and Hispanic women who received WIC had |
| 12 | lower mortality rates than infants of Black and |
| 13 | Hispanic women who did not receive WIC. Although |
| 14 | there were differences in WIC receipt for American |
| 15 | Indian and Alaska Native or infants of Asian |
| 16 | women, these differences were not statistically |
| 17 | significant. Next. |
| | |

So, when looking at infant mortality
by source of payment, infants of all maternal race
and Hispanic origin groups had similar patterns.
Specifically, infants who used Medicaid had higher
mortality rates than infants born to women who had

| 1 | private health insurance. Although you can see |
|--|---|
| 2 | there is great variation across the groups in |
| 3 | terms of the actual infant mortality rates. Next. |
| 4 | When looking at infant mortality by |
| 5 | source of payment, infants of all maternal race |
| 6 | and Hispanic origin groups had similar patterns. |
| 7 | Infants born to women who used Medicaid had higher |
| 8 | mortality rates than infants born to women who had |
| 9 | private health insurance. Next. |
| 10 | Oh, you know what, I just completely |
| 11 | yeah, sorry. I skipped over something. |
| | |
| 12 | By timing of prenatal care, infants |
| 12 13 | By timing of prenatal care, infants of women who received late or no care, and that is |
| | |
| 13 | of women who received late or no care, and that is |
| 13 14 | of women who received late or no care, and that is the prenatal care in the third trimester or |
| 13 14 15 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than |
| 13 14 15 16 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than infants of women who received care in the first |
| 13 14 15 16 17 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than infants of women who received care in the first trimester of pregnancy. So, the rates for infants |
| 13 14 15 16 17 18 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than infants of women who received care in the first trimester of pregnancy. So, the rates for infants who were born to women who received late or no |
| 13 14 15 16 17 18 19 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than infants of women who received care in the first trimester of pregnancy. So, the rates for infants who were born to women who received late or no care were between 66 and 187% higher than those |
| 13 14 15 16 17 18 19 20 | of women who received late or no care, and that is the prenatal care in the third trimester or receiving no care, had higher mortality rates than infants of women who received care in the first trimester of pregnancy. So, the rates for infants who were born to women who received late or no care were between 66 and 187% higher than those who received care in the first trimester. Next. |

Page 162

| 1 | couple of slides look at this. This slide looks |
|----|---|
| 2 | at the five leading causes of total infant death, |
| 3 | both in 2015 and 2020. So, in both of these |
| 4 | years, they have the same five leading causes of |
| 5 | death, which included congenital malformations, |
| 6 | low birth weight, maternal complications, SIDS, |
| 7 | and unintentional injuries. So, compared with |
| 8 | 2015, the rates declined for four of the five |
| 9 | leading causes, but there was a slight increase |
| 10 | for unintentional injuries in 2020 compared to |
| 11 | 2015. Next. |

Here were the five leading causes of neonatal death in 2020. These included low birth weight, congenital malformations, maternal complications, PCM complications, and bacterial sepsis. Next.

The five leading -- these are the five leading causes of post-neonatal death in 2020, which included SIDS, congenital malformations, unintentional injuries, diseases of the circulatory system, and homicide. So, the leading causes of death for overall infant and by

| 1 | age of death have generally been the same for at |
|----------------|---|
| 2 | least the last decade of data that we have |
| 3 | available. Next. |
| 4 | These next few slides focus on |
| 5 | geography. So, in 2020, infant mortality rates |
| 6 | ranged from 3.92 in California to 8.12 in |
| 7 | Mississippi. As you can see in the map, the rates |
| 8 | were generally lower in states in the west and the |
| 9 | northeast and higher in the states in the south. |
| 10 | Next. |
| 11 | So, while the infant mortality rate |
| 12 | has declined over time throughout the United |
| 13 | States from 2015 to 2020, thirteen states and the |
| 14 | District of Columbia had declines in rates that |
| 15 | were statistically significant. In this map, |
| 16 | |
| | those states are filled in with blue to make them |
| 17 | those states are filled in with blue to make them easily seen. Next. |
| 17 18 | |
| | easily seen. Next. |
| 18 | easily seen. Next. So, infant mortality rates also |
| 18 19 | easily seen. Next. So, infant mortality rates also varied by urbanization level. From 2015 to 2020, |
| 18 19 20 | easily seen. Next. So, infant mortality rates also varied by urbanization level. From 2015 to 2020, the infant mortality rate declined for all |

Page 164

| 1 | periods. |
|----|--|
| 2 | In 2015, rates in non-metro counties |
| 3 | were 6% higher than the rates in small or medium |
| 4 | metro counties and 25% higher than the rates in |
| 5 | large metro counties. And in 2020, the non-metro |
| 6 | rates were 4% higher than small or medium metro |
| 7 | counties and 27% higher than those in large metro |
| 8 | counties. Next. |
| 9 | This was a quick stat publication |
| 10 | that looked at infant mortality by maternal race |
| 11 | and Hispanic origin using a metro and non-metro |
| 12 | dichotomy. So, infant mortality rates were higher |
| 13 | in non-metro counties for all groups; however, |
| 14 | they were only statistically significantly higher |
| 15 | in non-metro counties for infants of white, |
| 16 | Hispanic, and American Indian or Alaska Native |
| 17 | women. Next. |
| 18 | So, to kind of wrap up and conclude, |
| 19 | over the last couple of decades, fetal, infant, |
| 20 | and perinatal mortality rates have declined. |
| 21 | There have been declines in rates by maternal race |
| 22 | and Hispanic origin. Next. |

| 1 | Mortality rates continue to be |
|----|--|
| 2 | highest for infants of Black, American Indian, or |
| 3 | Alaska Native and Native Hawaiian or other Pacific |
| 4 | Islander women, and infants of Black women have |
| 5 | mortality rates that are nearly twice as high or |
| 6 | more than those for infants of white, Hispanic, or |
| 7 | Asian women. Next. |
| 8 | Black, American Indian, or Alaska |
| 9 | Native and Native Hawaiian, or other Pacific |
| 10 | Islander women had the highest percentages of |
| 11 | preterm births, and their infants have the highest |
| 12 | mortality rates among those who were preterm. |
| 13 | Next. |
| 14 | Infants of Black and Hispanic women |
| 15 | who received WIC had lower mortality rates than |
| 16 | infants of Black and Hispanic women who did not |
| 17 | receive WIC. The opposite was true for the |
| 18 | infants of white women. Infants of women who |
| 19 | received Medicaid had also had higher mortality |
| 20 | rates than those of women with private health |
| 21 | insurance, which was the case across all maternal |
| 22 | race and Hispanic origin groups. Next. |

| 1 | Infants of women who receive late or |
|----------|--|
| 2 | no prenatal care had higher mortality rates than |
| 3 | those of women receiving care in the first |
| 4 | trimester, which was also true across all race and |
| 5 | Hispanic origin groups. Next. |
| 6 | Here is just a quick review of the |
| 7 | five leading causes of infant mortality and by age |
| 8 | of death, and something to note that I did not |
| 9 | necessarily talk about completely earlier was that |
| 10 | the same five leading causes of infant mortality |
| 11 | have been the five leading causes since 2006 with |
| 12 | some minor changes in order. |
| 13 | For neonatal mortality, these have |
| 14 | generally been the same five leading causes since |
| 15 | 2007; however, in one year, bacterial sepsis did |
| 16 | |
| | fall off, but it did come right back on the next |
| 17 | fall off, but it did come right back on the next year. And for postnatal mortality, they have had |
| 17 18 | |
| | year. And for postnatal mortality, they have had |
| 18 | year. And for postnatal mortality, they have had the same five leading causes since 2010. Next. |
| 18 19 | year. And for postnatal mortality, they have had the same five leading causes since 2010. Next. From 2015 to 2020, thirteen states |

| 1 | generally true by maternal race and Hispanic |
|----|--|
| 2 | origin. Next. |
| 3 | In kind of looking ahead a little |
| 4 | bit, we're going to continue to work on the |
| 5 | timeliness of the period and cohort final data and |
| 6 | not just in terms of the file releases, but also |
| 7 | by trying to publish on provisional data. |
| 8 | And that is all I have for today. |
| 9 | Thank you. |
| 10 | BELINDA PETTIFORD: Thank you, |
| 11 | Danielle. We're just going to hold off on |
| 12 | questions to the end and move on to Donna. |
| 13 | DONNA HOYERT: Yes, I can start with |
| 14 | what's going to be on the title slide. So, I'm in |
| 15 | the same division as Danielle. I'm going to talk |
| 16 | about maternal mortality data from the National |
| 17 | Vital Statistics System. Next slide. |
| 18 | The National Vital Statistics System |
| 19 | maternal mortality data from MCHS comes from death |
| 20 | certificates and the cause of death statements, |
| 21 | which are completely by physicians or medical |
| 22 | examiners principally. The quality of the |

Page 168

information depends on the persons completing the 1 death certificates. MCHS uses the World Health 2 Organization International Classification Diseases 3 or ICD in the definition of maternal mortality in 4 that, which focuses on deaths occurring while 5 pregnant or within 42 days of the end of the 6 The measures we typically present in pregnancy. 7 publications are numbers of maternal deaths and 8 maternal mortality rates, which are calculated as 9 the number of maternal deaths per 100,000 live 10 births. Next slide. 11

MCHS statistics on maternal mortality 12 go back to the early 1900s with periodic points of 13 disjuncture whenever a new revision of the ICD was 14 adopted. However, 2003 marked the beginning of an 15 unanticipated protracted period of disjuncture for 16 reason other than a change in ICD revision. 17 Research that had access to additional information 18 would identify more maternal or pregnancy-related 19 deaths than found in the file statistics data, and 20 it was suggested that adding a separate checkbox 21 asking about recent pregnancies would be a way to 22

Page 169

| 1 | increase the numbers identified using death |
|----|---|
| 2 | certificates. A national consensus process agree |
| 3 | and recommended adding such an item. So the |
| 4 | expectation was that states would make this |
| 5 | addition in a relatively short timeframe around |
| 6 | 2003. Numbers of maternal deaths identified would |
| 7 | increase substantially. Our data would be more |
| 8 | similar to other maternal mortality data sources, |
| 9 | and we could move on from there. |
| 10 | However, it took a long time for all |
| 11 | states to add this checkbox to help identify |
| 12 | maternal deaths, and during this 15-year period, |
| 13 | it was found that the checkbox was being marked |
| 14 | more often than appropriate, especially as the |

15 decedent age increased.

In 2018, MCHS restarted publishing maternal mortality data after all states had added the supplemental checkbox to help identify maternal deaths. Some modifications were made to mitigate the impact of likely reporting errors with the checkbox at the same time. But as you'll note, I used the word mitigate. The states differ

Page 170

in the practices that they follow to work on data
quality. For our part, we have tended to this in
a long list of potential problems back to the
states for review, but that hasn't been terribly
productive.

In the past year, we revisited 6 current data with respect to data quality, 7 confirmed some of the choices we made in the 8 mitigation strategy based on earlier look at data 9 quality, and are shifting to a more targeted list 10 to ask states to focus on, the idea being that 11 they will have a smaller number of records to 12 follow-up on and we're more confident that these 13 particular records really need to be corrected. 14

Last year, we also created a separate reporting guidance document that specifically focused on these types of events and additionally, it took some time to integrate these changes into our systems. So, 2021 data is the first year that the maternal records are getting fully processed as the year goes on. Next.

22

Since 2018, maternal data have been

| 1 | available in annual Health E-Stats, a table in the |
|----|--|
| 2 | annual deaths data for each year's reports and |
| 3 | data files. |
| 4 | A number of the following slides are |
| 5 | based on information released last week in a |
| 6 | Health E-Stats report for 2021 data. Next. |
| 7 | The Health E-Stats shows that there |
| 8 | are a number of disparities in maternal mortality |
| 9 | in the U.S. Maternal mortality rates increase as |
| 10 | age increases. In the MCHS data, the rate for |
| 11 | women forty and over was nearly seven times that |
| 12 | for women under twenty-five. Next. |
| 13 | Maternal mortality varies by race and |
| 14 | Hispanic origin. In 2021, the rate for non- |
| 15 | Hispanic Black women is 2.6 times the rate for |
| 16 | non-Hispanic white women. The rate for non- |
| 17 | Hispanic white and Hispanic women are roughly the |
| 18 | same. The Health E-Stats only focuses on these |
| 19 | three groups. In some of our other reports and |
| 20 | releases, we share more groups, although the size |
| | |
| 21 | of the groups is a common issue. Even combining |

| 1 | large enough numbers to calculate reliable rates |
|----|---|
| 2 | for the Native Hawaiian or other Pacific Islander |
| 3 | groups. These smaller groups cover the range with |
| 4 | lower rates for Asian women and higher rates for |
| 5 | American Indian or Alaska Native women. Next. |
| 6 | Maternal mortality differs by |
| 7 | urbanization level with rates decreasing as one |
| 8 | moves left to right on the slide from rural |
| 9 | towards large metropolitan counties. Next. |
| 10 | In 2021, maternal mortality was |
| 11 | similar for women with and without a GED or high |
| 12 | school diploma, lower for those with some college |
| 13 | but no degree, and lower yet for those with a |
| 14 | degree. Next. |
| 15 | So, in the short time since we |
| 16 | restarted publishing maternal mortality |
| 17 | statistics, the trend is increasing with the |
| 18 | largest increase between 2020 and 2021. We also |
| 19 | have provisional data as we are building towards |
| 20 | the final data. Provisional data are not complete |
| 21 | and final and are subject to change. |
| 22 | In the case of maternal mortality, |

Page 173

there isn't anything unusual about the flow into
the file, but the coding is reviewed multiple
times and numbers might change during these extra
reviews.
Provisional data have been available

in the file for roughly a year now, and that
reflects the numbers as they build up and change
during the course of the year. Next.

Last Thursday, we also released a new 9 data visualization that presents numbers of 10 provisional maternal deaths through October of 11 2022. This visualization shows a series of counts 12 for 12-month periods. The visualization is 13 14 presented overall and by age, race, and Hispanic origin. I'm just going to show the overall 15 figure. 16

17 So, in this, the December date will 18 correspond to the time period shown in the Health 19 E-Stats publications using final data. And this 20 reflects that the increases that we have been 21 showing in the recent Health E-Stats and that the 22 2021 calendar year pretty much captured the height

Page 174

of the increase in maternal mortality. But then
 we see a decreasing pattern in 2022 in vital
 statistics data. Next.

So MCHS's maternal mortality data soared during the pandemic but in 2022, it looks to be returning to the levels we were calculating pre-pandemic. With respect to COVID-19 being reported as a cause, I'm next looking at mentions in the multiple cause data.

For 2020, about 100 maternal deaths 10 reported COVID-19. For deaths overall, comparing 11 2021 to 2020, COVID-19 deaths increased and 12 shifted to younger age groups, where there are 13 14 more likely to be women who are pregnant or recently pregnant. Both the number and percentage 15 of maternal death records mentioning COVID-19 were 16 substantially greater in 2021 than in 2020 and 17 then if we look forward to the provisional data, 18 that indicates that it will be less again in 2022, 19 again reflecting shifts in numbers observed more 20 broadly with COVID-19 deaths. 21

22

Some of the longstanding disparities

| 1 | such as age and race were just ever so slightly |
|----|--|
| 2 | worse in 2020 but more like before in 2021. Next. |
| 3 | So, in conclusion, MCHS resumed |
| 4 | releasing maternal mortality statistics with 2018 |
| 5 | data and has expanded data access with the Healthy |
| 6 | E-Stats provisional data and the maternal data |
| 7 | visualization. Long-observed differentials such |
| 8 | as by age or between race and Hispanic origin |
| 9 | groups persist. Our current trend is not very |
| 10 | long but shows that maternal mortality rates |
| 11 | increased substantially during the pandemic and |
| 12 | provisional data suggests that the rates will |
| 13 | return to pre-pandemic levels in 2022. Thank you. |
| 14 | BELINDA PETTIFORD: Thank you so |
| 15 | much, Donna, and now we'll go onto Ashley. |
| 16 | ASHLEY BUSACKER: Hi. Good |
| 17 | afternoon. I'm Ashley Busacker. I'm the senior |
| 18 | epidemiologist on the Maternal Mortality |
| 19 | Prevention Team within CDC's Division of |
| 20 | Reproductive Health. I think my slides are |
| 21 | coming. Okay, perfect. |
| 22 | So, today, I'm going to share with |

Page 176

| 1 | you data from our recent report, Pregnancy-Related |
|---|--|
| 2 | Deaths: Maternal Mortality Review Committees in 36 |
| 3 | U.S. States from 2017 through 2019. Next, and the |
| 4 | next too. |
| 5 | So, to begin, I want to provide some |

background on the enhancing reviews and 6 surveillance to eliminate maternal mortality, our 7 ERASE MM Initiative and our national reporting. 8

Maternal Mortality Review Committees, 9 our MMRCs, are multidisciplinary committees 10 comprised of diverse clinical and nonclinical 11 MMRCs use a standardized process for expertise. 12 data collection through committee deliberations 13 and record them from MMHS standardized data 14 system, which was call MMRIA. 15

So, CDC analyses and reports of MMRIA 16 data both focus on pregnancy-related deaths. 17 These deaths occur during pregnancy or within one 18 year of the end of pregnancy and are from any 19 cause related to or aggravated by the pregnancy. 20 This focus is because this is a 21 population with unique causes of death. Pregnancy

22

| 1 | associated but not related deaths tell us that an |
|----|---|
| 2 | individual died during or within one year of |
| 3 | pregnancy, but the death was not causally related |
| 4 | to the pregnancy. While pregnancy associated but |
| 5 | not related deaths mirror causes of death among |
| 6 | women of reproductive age, you cannot interpret |
| 7 | the findings from these deaths to be |
| 8 | representative of deaths among individuals of |
| 9 | reproductive age because there are a small |
| 10 | proportion of those deaths that occurred among |
| 11 | specific populations. |
| 12 | Every death is a tragedy and CDC is |
| 13 | focused on preventing pregnancy-related deaths |
| 14 | because this is a unique prevention space that |
| 15 | Maternal Mortality Review Committees fill. Next. |
| 16 | So before we look at the data, I do |
| 17 | want to take a moment to acknowledge that there |
| 18 | are lives lost behind these data. Each member |
| 19 | represents a tragic loss to a family in a |
| 20 | community. Next. |
| 21 | So, in this presentation, we'll see |
| 22 | |

Page 178

| 1 | from 2017 through 2019 to residents of thirty-six |
|----|--|
| 2 | states, which are shown here on this map. Not all |
| 3 | Maternal Mortality Review Committees submitted |
| 4 | data for all three years and partial years of data |
| 5 | were received. I also want to acknowledge that |
| 6 | we'll be showing you per portion and not category- |
| 7 | specific pregnancy-related mortality ratios. We |
| 8 | are not able to calculate the pregnancy-related |
| 9 | mortality ratios using these data, but these would |
| 10 | be the more appropriate measure for understanding |
| 11 | disparities. Next. |

So, this slide shows the breakdown of race and ethnicity among the pregnancy-related deaths. While you are taking in the numbers, I do want to walk through how these categories come about.

17 Race and ethnicity data are from the 18 birth or fetal death records, when available, and 19 from death records when a birth record or a fetal 20 death record was unavailable. All deaths with a 21 notation of Hispanic origin are classified as 22 Hispanic. For non-Hispanic persons, race was

| 1 | classified as non-Hispanic single race American |
|----|--|
| 2 | Indian or Alaska Native, non-Hispanic single race |
| 3 | Asian, non-Hispanic single race Black, non- |
| 4 | Hispanic single race Native Hawaiian or other |
| 5 | Pacific Islander, and non-Hispanic single race |
| 6 | white. Deaths which were missing race ethnicity |
| 7 | include those of missing notation of Hispanic |
| 8 | origin. Those with a notation of non-Hispanic |
| 9 | origin but missing information on race, and those |
| 10 | missing notation for both race and ethnicity. |
| 11 | Next. |
| 12 | This graph shows the distribution of |
| 13 | pregnancy-related deaths be age. Over 70% of |
| 14 | pregnancy-related deaths occurred among persons |
| 15 | ages 25 to 39. Next. |
| 16 | Here we see the distribution of |
| 17 | pregnancy-related deaths by educational |
| 18 | attainment. Over half of decedents had an |
| 19 | educational level of high school graduate or less. |
| 20 | The next slide looks at timing of |
| 21 | deaths in relation to pregnancy. Over 50% of |
| 22 | pregnancy-related deaths occurred one week to one |

| 1 | year after the end of pregnancy, which is a time |
|----|--|
| 2 | when most individuals would have left the |
| 3 | hospital. Next slide. |
| 4 | So now moving into underlying cause |
| 5 | of pregnancy-related death. This refers to the |
| 6 | disease or injury that initiated the chain of |
| 7 | events leading to the death or the circumstances |
| 8 | that the accident or event which produced the |
| 9 | fatal injury. |
| 10 | The Maternal Mortality Review |
| 11 | Committee uses the information from the death |
| 12 | record along with information from medical |
| 13 | records, social service records, autopsies, and in |
| 14 | some cases key informant interviews to determine |
| 15 | the underlying cause of death. The MMRC uses all |
| 16 | of the information available to code the |
| 17 | underlying cause of death using the systems shown |
| 18 | on this slide. Next. |
| 19 | The ten most frequent underlying |
| 20 | causes of death among the pregnancy-related deaths |
| 21 | are shown on this slide. The most frequent cause |
| 22 | was mental health conditions which include deaths |
| | |

| 1 | to suicide and overdose or poisoning related to |
|----|--|
| 2 | substance use disorder. That was followed by |
| 3 | hemorrhage and then cardiac and coronary |
| 4 | conditions. Next slide. |
| 5 | To identify opportunities for |
| 6 | prevention among disproportionately impacted |
| 7 | populations, it is important to look at the |
| 8 | underlying causes of death by race and ethnicity. |
| 9 | Among non-Hispanic Black persons, cardiac and |
| 10 | coronary conditions, and cardiomyopathy are the |
| 11 | two most frequent underlying causes of death. |
| 12 | When combined, these causes that involve the heart |
| 13 | represent almost one-third of pregnancy-related |
| 14 | deaths among non-Hispanic Black persons. Next. |
| 15 | Among Hispanic persons, the most |
| 16 | frequent underlying cause of pregnancy-related |
| 17 | death was mental health conditions. Next slide. |
| 18 | Among non-Hispanic Asian persons, |
| 19 | hemorrhage was the most frequent underlying cause |
| 20 | of pregnancy-related deaths. Next. |
| 21 | And among non-Hispanic white persons, |
| 22 | mental health conditions were the most frequent |

Page 182 underlying cause of a pregnancy-related death. 1 Next. 2 A preventability determination was 3 made by the Maternal Mortality Review Committee 4 for 98% of the pregnancy-related deaths. Α 5 preventable death is defined as a death with at 6 least some chance of the death being averted by 7 one or more reasonable changes, patient, 8 community, provider, facility, and/or system 9 factors. Among those pregnancy-related deaths 10 with this determination, 84% are determined to be 11 preventable. Next slide. 12 So for the next few slides, we'll 13 14 focus on pregnancy-related deaths to American Indian or Alaska Native persons using the same 15 data. Next. 16 As I mentioned, understanding 17 differences in the underlying causes of pregnancy-18

related death by race and ethnicity is important for identifying prevention opportunities to reduce pregnancy-related deaths.

22

Accurate classification of race and

Page 183

ethnicity can be challenging. Methodological
decisions about racial classification can affect
the size and the characteristics of the population
used in the analyses.

This slide describes an alternative 5 approach our team took for classifying pregnancy-6 related deaths among all American Indian and 7 Alaska Native individuals. This approach is 8 consistent with assessments from other groups, 9 which have demonstrated the importance of 10 examining deaths among all American Indian or 11 Alaska Native persons regardless of notation of 12 Hispanic origin or other or multiple races. 13

So, as you can see, there were nine 14 pregnancy-related deaths classified as non-15 Hispanic single race American Indian or Alaska 16 Native, and then there was one death with a 17 notation of Native American written in the 18 specified other free text field. Five American 19 Indian, Alaska Native deaths with a notation of 20 Hispanic ethnicity or missing ethnicity, and two 21 American Indian or Alaska Native deaths with a 22

March 20, 2023

| 1 | notation of more than one race. |
|----|--|
| 2 | So, with this alternative approach, |
| 3 | we did see an increase in identification of |
| 4 | pregnancy-related deaths to the seventeen number |
| 5 | you see, but because of known limitations with |
| 6 | vital records for identifying American Indian and |
| 7 | Alaska Native persons, seventeen is still likely |
| 8 | an undercount of pregnancy-related deaths among |
| 9 | American Indian and Alaska Native persons. |
| 10 | The next two slides will describe |
| 11 | these seventeen pregnancy-related deaths. Next. |
| 12 | Sixteen of the seventeen pregnancy- |
| 13 | related deaths among American Indian or Alaska |
| 14 | Native persons had a known underlying cause of |
| 15 | death. Among these deaths, mental health |
| 16 | conditions were the most frequent underlying cause |
| 17 | of death. |
| 18 | And on the next slide, we see an MMRC |
| 19 | preventability determination was made available or |
| 20 | was available for fifteen of the seventeen |
| 21 | pregnancy-related deaths. And among those, 93% of |
| 22 | these deaths were determined to be preventable. |

| 1 | Next. |
|----|--|
| 2 | So, in summary, pregnancy-related |
| 3 | deaths occurred during pregnancy, delivery, and up |
| 4 | to one year after the end of pregnancy. The |
| 5 | leading cause of pregnancy-related death varied by |
| 6 | race and ethnicity. Over 80% of pregnancy-related |
| 7 | deaths were determined to be preventable and |
| 8 | methodological decisions about racial |
| 9 | classification can impact the size and character |
| 10 | of the population used in analysis. Next. |
| 11 | So, I want to thank everyone |
| 12 | throughout the country and maybe some of you on |
| 13 | this call for taking the time to review maternal |
| 14 | deaths, put together the reports, and drive |
| 15 | implementation of the prevention activities. Next |
| 16 | slide. |
| 17 | And you can e-mail if you have |
| 18 | questions or want some more information. Thank |
| 19 | you. |
| 20 | BELINDA PETTIFORD: Thank you so |
| 21 | much, Ashley. I did drop you a note in the chat. |
| 22 | So, now we're going to go to Ashley |

Page 186

Hirai as we wrap up this session and get ready for 1 questions. 2 ASHLEY HIRAI: Thanks, Belinda. I'm 3 Ashley Hirai. I'm a senior scientist in MCHB's 4 Office of Epidemiology and Research. Next slide. 5 Okay, I think I can control mine. 6 Some of you are probably familiar 7 with this pyramid showing maternal mortality and 8 Maternal and pregnancy-related deaths morbidity. 9 that were just discussed are really the tip of the 10 For every maternal death, it's estimated iceberg. 11 that there are fifty to a hundred cases of severe 12 maternal morbidity and thousands of complications 13 such as pre-pregnancy and gestational conditions 14 like diabetes and hypertension. 15 Just for some background on how kind 16 of HRSA comes into the surveillance space is 17 really for the Title V State Block Grant Program 18 where we have a National Outcome Measure for 19 Severe Maternal Morbidity or SMM, and we 20 collaborate with the Agency for Healthcare 21 Research and Quality or AHRQ as the data purveyor 22

| 1 | and CDC as measure developer to populate national |
|----|---|
| 2 | and state estimates for monitoring and |
| 3 | surveillance. |
| 4 | The data comes from the Healthcare |
| 5 | Cost and Utilization Project and all paired |
| 6 | databases of hospital discharge records from all |
| 7 | non-federal acute care hospitals in nearly all |
| 8 | states. |
| 9 | So this graphic depicts the levels of |
| 10 | our performance measure framework and at the |
| 11 | center are our national performance measures, |
| 12 | which states select to improve over a five-year |
| 13 | needs assessment to action cycle, and these are |
| 14 | shorter-term performance measures of health care |
| 15 | access, quality and behavior, which in turn helps |
| 16 | to improve longer-term outcomes of morbidity and |
| 17 | mortality. So, those are within the Maternal and |
| 18 | Women's Health domain are well-women visit, low- |
| 19 | risk cesarean, and full-term pregnancy, which |
| 20 | influence our North Star measures of severe |
| 21 | maternal morbidity and maternal mortality. |
| 22 | We employ evidenced-based informed |
| | |

| 1 | strategies measures to make progress on these |
|----|---|
| 2 | performance measures such as improving insurance |
| 3 | outreach and enrollment, social media campaigns, |
| 4 | and hospital participation, and quality |
| 5 | improvement efforts. |
| 6 | So what I'm going to be covering |
| 7 | today is related to the definition of SMM that we |
| 8 | use, trends, types, disparities, and some |
| 9 | measurement issues. |
| 10 | So, moving to the definition that we |
| 11 | use is that developed by CDC researchers. |
| 12 | Unexpected outcomes of labor and delivery that |
| 13 | result in significant short- or long-term |
| 14 | consequences to a woman's health. And how we |
| 15 | measure that is from those hospital discharge |
| 16 | record codes with twenty-one different indicators |
| 17 | including sixteen diagnosis codes and five based |
| 18 | on procedure codes. So these are just the overall |
| 19 | indicators of twenty-one, but there are over four |
| 20 | hundred individual codes that are used in these |
| 21 | discharge records. |
| 22 | Recent analyses do exclude cases of |

Page 189 blood transfusion only due to poor predictive 1 value in the absence of other SMM indicators. 2 So, four or more units of blood product is usually 3 considered severe and the number of units just 4 aren't available in hospital discharge data. 5 You can find the full list of codes 6 at the links included here for HCUP Fast Stats, 7 Title V, and our AIM program, Alliance for 8 Innovation on Maternal Health. 9 So, all of the data that I'm 10 presenting here was pulled from HCUP Fast Stats or 11 Title V, highlighting three recent AHRQ, CDC, or 12 13 HRSA publications. I led the first two with 14 colleagues from AHRQ looking at trends across the ICD coding transition and state-level 15 correlations, and I'll present data from those 16 near the end. 17

And then there's also just to note two forthcoming publications. AHRQ has an analysis of COVID-related SMM increases that will be coming out, and CDC has been working on a paper on SMM indicators that account for the larger

Page 190

1 share of in-hospital deaths. Okay, moving to trends. Over the 2 last decade, we can see here that we're not moving 3 in the right direction. There's been an increase 4 of nearly twenty per 10,000 or 26% in the last 5 decade, mostly since 2017 and there was really 6 little or no difference across that coding 7 transition. 8 The largest single year change was in 9 2020 with the COVID-19 pandemic and increase of 10 about 8 per 10,000 or 10%. Prior analyses from 11 both CDC and AHRO showed increases mostly 12 beginning in 2000 with substantially larger rises 13 including transfusion-only cases. 14 So what's kind of behind these 15 trends, it's unclear. It may be related to 16 increases in chronic conditions and maternal age. 17 However, a study in California showed that 18 maternal characteristics and comorbidities 19 couldn't explain the rise in that state. 20 Artifactual increases are also 21 possible due to improvements in recognition and 22

| 1 | coding with quality improvement initiatives or |
|----|--|
| 2 | increases in certain indicators with poor |
| 3 | predictive value that may not be truly severe. |
| 4 | So, the latest increase in 2020 does |
| 5 | appear to be directly related to the COVID |
| 6 | pandemic. This table shows indicators in order of |
| 7 | incidence. So, hemorrhage is the most common |
| 8 | cause or type of SMM, followed by renal and |
| 9 | respiratory failure and sepsis. Between 2019 and |
| 10 | 2020, respiratory and acute renal failure had the |
| 11 | largest increases on both an absolute and relative |
| 12 | scale and this is consistent with what we know of |
| 13 | clinical impacts of COVID. |
| 14 | Looking at race and ethnicity, we can |
| 15 | see the Black women have the highest rates of SMM, |
| 16 | twice that of white women, who have the lowest |
| 17 | rates. Black Hispanic and Asian/Pacific Islander |
| 18 | populations have the largest increases from 2019 |
| 19 | to 2020 of about 10-15%. This is not completely |
| 20 | consistent with maternal mortality as |
| 21 | Asian/Pacific Islanders did not have an increase |
| 22 | in 2020. The recent CDC data from HCUP and |
| | |

| 1 | hospital discharges may not always be self- |
|----|--|
| 2 | reported and not all states have adequate |
| 3 | reporting. |
| 4 | And I also want to mention that |
| 5 | although American Indian and Alaska Native are |
| 6 | represented here and do have elevated rates, IHS |
| 7 | facilities don't participate in HCUP, so this |
| 8 | isn't a complete picture of their data. |
| 9 | Looking at expected payer, SMM is |
| 10 | higher for Medicaid or Medicare billed delivery |
| 11 | hospitalizations compared to those privately |
| 12 | billed or having no charge or no insurance or |
| 13 | other public insurance billed such as military. |
| 14 | Increases in 2020 were larger for |
| 15 | this latter category and Medicaid/Medicare insured |
| 16 | compared to privately billed patients. |
| 17 | So, contrary to what we saw for other |
| 18 | indicators including infant and maternal |
| 19 | mortality, we see that SMM is actually higher for |
| 20 | residents of large metropolitan counties than |
| 21 | small to medium metro counties or non-metro |
| 22 | counties. And the large metro residents increase |

Page 193

| 1 | larger increases in 2020. Why is this data |
|----|--|
| 2 | inconsistent? I think it does speak to some |
| 3 | measurement problems here for SMM, and if we look |
| 4 | at trends by hospital location and teaching |
| 5 | status, increases in the last decade only occurred |
| 6 | at metropolitan teaching hospitals, raising the |
| 7 | possibility of improved diagnostic ascertainment |
| 8 | or recognition of the billing records, perhaps |
| 9 | through quality improvement activities or |
| 10 | increases in indicators with poor positive |
| 11 | predictive values. So concerns have been noted |
| 12 | beyond transfusion as some indicators require a |
| 13 | greater clinical judgement and examination of |
| 14 | signs and symptoms to truly determine severity. |
| 15 | In a paper just published last year, |
| 16 | you can see slide 5 that had the citation and |
| 17 | link. We looked at correlations between state SMM |
| 18 | rates and other perinatal indicators that may |
| 19 | preceded, coincide with, or result from SMM. So, |
| 20 | this is a bubble graph with the size of the |

21 bubbles corresponding to the size of the22 correlation with statistical significance noted in

| 1 | the glowing edge and negative correlations in |
|----|--|
| 2 | white. |
| 3 | And we found that SMM was |
| 4 | significantly correlated with only two of seven of |
| 5 | other perinatal indicators, pre-pregnancy |
| 6 | hypertension and low-risk cesarean section. By |
| 7 | contrast, there were stronger and more consistent |
| 8 | correlations among all other perinatal indicators |
| 9 | including maternal mortality. |
| 10 | And just as a side note, it's |
| 11 | interesting to see the relatively high correlation |
| 12 | between infant and maternal mortality at the state |
| 13 | level, that's 0.56. So we know they share common |
| 14 | and social structural determinants and this is |
| 15 | consistent with the alignment in addition to |
| 16 | maternal mortality in this committee. |
| 17 | So why isn't SMM associated with |
| 18 | maternal mortality geographically? Theoretically, |
| 19 | SMM should be most strongly linked to maternal |
| 20 | mortality as a near-miss event originally |
| 21 | constructed using conditions associated with |
| 22 | mortality. However, what we see is little |

Page 195

| 1 | geographic patterning with the highest rates in |
|----|---|
| 2 | certain states on both coasts that's indicated by |
| 3 | shades of orange and red, unlike maternal |
| 4 | mortality, which is highest in the southeast, |
| 5 | indicated by the size of those blue circles. |
| 6 | So, the overall correlation is |
| 7 | negative and non-significant. California is one |
| 8 | of several outliers with a high-rated SMM but low |
| 9 | maternal mortality. In all states with those |
| 10 | darkest shades of red, they have experienced |
| 11 | recent rapid increases in SMM. Those were |
| 12 | highlighted in our other study that was also |
| 13 | listed on a previous slide. |
| 14 | Again, this may be consistent with |
| 15 | improved diagnostic ascertainment through quality |
| 16 | improvement or increases in indicators with sub- |
| 17 | optimal D-predictive value. Specific concerns |
| 18 | have been raised about disseminated intravascular |
| 19 | coagulation and acute renal failure. |
| 20 | So until more is known, caution |
| 21 | really should be used when comparing SMM rates |
| | |

22 geographically, whether by state or urban or rural

Page 196

1 residents.

In addition to potential coding 2 variation or indicator level issues that require 3 more investigation, it's also important to 4 recognize that most studies only capture SMM at 5 A recent CDC analysis of publicly and delivery. 6 privately insured patients in IBM MarketScan data 7 showed that 15% of de novo or new onset SMM 8 occurred in the postpartum period. It is unclear 9 how much may be occurring in the antepartum 10 But an earlier study indicated it may be period. 11 about one-third as common as during delivery. 12

Also, mental health conditions and 13 14 hospitalizations have not been included in SMM definitions to date. So we really have much work 15 to do in refining and advancing measurement for 16 CDC recently held a federal partners meeting SMM. 17 on the topic, and we're working collaboratively 18 across HHS to improve measurement, surveillance, 19 and prevention, and I just wanted to give a 20 shoutout to Charlan, whose branch is really 21 leading this work and whose slides I borrowed from 22

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

March 20, 2023

| | Page 197 |
|----|--|
| 1 | her. So I want to give credit where it's due. |
| 2 | And that does conclude my |
| 3 | presentation, and I welcome questions along with |
| 4 | the other panelists. Thank you. |
| 5 | BELINDA PETTIFORD: Thank you, Ashley |
| 6 | and thanks to the amazing team, and Charlan's |
| 7 | wonderful data. So, we appreciate you all giving |
| 8 | us a refresher. |
| 9 | I know there have been a couple |
| 10 | questions that have been in the chat, and I think |
| 11 | you've been answering as you go, but I want to |
| 12 | make sure if anyone has a question, if you'll just |
| 13 | come off. Okay, Tara, I see your hand. |
| 14 | TARA LEE SANDER: Yeah, thank you. |
| 15 | Those were great great presentations. I was |
| 16 | scribbling a lot of notes. |
| 17 | I think the biggest question I have |
| 18 | after digesting it quickly, my first question is, |
| 19 | okay, so when we look at Maternal Mortality Review |
| 20 | Committee data, you know, the latest report is |
| 21 | from data from 2017 to 2019, and you said it's |
| 22 | based on thirty-six states. So, does the CDC |

Page 198

| 1 | obtain and report in-depth analysis from the |
|----|--|
| 2 | others states? And if they don't, how can we |
| 3 | ensure that they do so that we have the most |
| 4 | complete dataset that we possibly can to get the |
| 5 | best picture? So, that's my first that's my |
| 6 | first question. |
| 7 | ASHLEY BUSACKER: Thank you, Tara. |
| 8 | So that was thirty-six states, and each time we've |
| 9 | done a data call, we've increased the number of |
| 10 | states, so that's good news. And now I think |
| 11 | we're up to let me pull this up, I have a |
| 12 | hidden slide the number of states participating |
| 13 | in MMRIA, we have forty funded states and |
| 14 | jurisdictions and I think we're up to like forty- |
| 15 | five or forty-six data-sharing agreements. Don't |
| 16 | quote me on that, but I'll get that number to you. |
| 17 | But the good news is that we are increasing as |
| 18 | time goes on with funded jurisdictions and |
| 19 | jurisdictions who are using MMRIA. So not every |
| 20 | jurisdiction who is using MMRIA right now is |
| 21 | funded. |
| | |

Those states have data-sharing

22

Page 199

| 1 | agreements with us, which allow us when we do a |
|---|--|
| 2 | data call to download and then analyze their data. |
| 3 | So with our next data call we just did a data |
| 4 | call at the end of 2022 we hope to have data |
| 5 | from more states. |

TARA SANDER LEE: That's great, 6 because I think that that's one of the key pieces 7 here. I think we can make -- we can infer some 8 trends that are important, but I think if we're 9 really going to dig into the data, I think we need 10 to get as much state data as we can, because we 11 keep saying how there's differences throughout the 12 13 country. Well, there's going to be differences in So, we need to gather that. 14 that data too. And I think, you know, trying to standardize the data 15 that they, I mean, because you guys have all said 16 There is discrepancy between the it, right? 17 They're not all reporting the same type 18 states. of data. And so, I think this is -- this is 19 something that I think this committee can help 20 with or with your help, obviously, because you 21 guys are in this data, right? So, we need your 22

Page 200

help. But I do think that this is -- this is big.
This is big.

And then just with the NVSS data, 3 because that's just kind of like a snapshot, 4 right, of what happened in 2021. So what's the --5 and then the maternal mortality data that you 6 presented is from 2017 to 2019. So, what's the 7 plan to kind of now dig deeper into that data from 8 the NVSS to get PMSS data and to really, you know, 9 really understand? Because, you know, that NVSS 10 data is great, but it's just a snapshot. So, kind 11 of when are we going to get a report, you know, 12 13 like we have from 2017 and 2019 to really 14 understand the impact of COVID-19?

ASHLEY BUSACKER: So, a couple things. One, I want to let you know with MMRIA, we're hoping to expand with new funding to all the states. I put the forty-eight states are using MMRIA.

And then the question about when is new data coming from PMSS, we are soon to be releasing data, which will include 2019. How PMSS

Page 201

| 1 | works right now, we are still receiving data from |
|----|--|
| 2 | 2020. So, as we receive that data, we're able to |
| 3 | do our medical epidemiology review and are working |
| 4 | on increasing the speed of access, our Speed and |
| 5 | Access Initiative, to get data transferred to CDC |
| 6 | quicker and to do a case identification with NCDC |
| 7 | should help improving the timeliness of that data, |
| 8 | but it does require that medical epidemiology |
| 9 | review as the states transferring data to us. So, |
| 10 | hopefully that's helpful with |
| | |

11 TARA SANDER LEE: It is, yeah. And I think -- and maybe we can talk offline or I can e-12 13 mail you. But I just -- I think it would be 14 really great to kind of, you know, how can we help you with that timeliness, right, because I think 15 we're going to -- that data is so critical to us, 16 understanding what's happening. I think, like I 17 said, it's important to see these trends, but if 18 we really want to dig into that data, then let's -19 - especially if we're going to start looking at 20 like when a pandemic hits, right, what happened, 21 you know, like so yeah, if there's any way that we 22

Page 202

| 1 | can help you to get that data fast and to get it |
|----|--|
| 2 | processed fast, let us know. |
| 3 | ASHLEY BUSACKER: Okay, thank you. |
| 4 | And one other point I did want to bring up is our |
| 5 | team does work very extensively with the |
| 6 | jurisdictions to offer that standardized process |
| 7 | to work on training, have office hours, have tools |
| 8 | available. So we are getting standardized data |
| 9 | from these very diverse states across the U.S. |
| 10 | So, thank you for your questions. |
| 11 | TARA SANDER LEE: Thank for your |
| 12 | answer. Great answer. |
| 13 | BELINDA PETTIFORD: And I was just |
| 14 | going to give an example. So, Tara, like our |
| 15 | state in North Carolina, we're one of the states |
| 16 | that participate with the MMRIA data system, and |
| 17 | it does help with the standardized process, and |
| 18 | you have a Maternal Mortality Review Committee. |
| 19 | But just realize, it's not something that happens |
| 20 | quickly because you have to realize the steps that |
| 21 | occur. |
| 22 | We have legislation that requires |

| 1 | providers and health systems to send us the |
|--|--|
| 2 | records, but then when they send them to us, |
| 3 | depending on where it is, you could get a box of |
| 4 | paper and then you've got to have staffing that |
| 5 | can actually extract the cases, go through each |
| 6 | sheet and move it into a format where the actual |
| 7 | committee can then review it, and then that |
| 8 | committee is the one that, you know, makes the |
| 9 | determination with pregnancy-related or pregnancy- |
| 10 | associated. So, that's some of the variation that |
| 11 | happens from state to state. |
| | |
| 12 | So, I think Ashley and the team there |
| 12 13 | So, I think Ashley and the team there at CDC is doing they're doing an awesome job |
| | _ |
| 13 | at CDC is doing they're doing an awesome job |
| 13 14 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but |
| 13 14 15 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but you have to realize, each system is different in |
| 13 14 15 16 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but you have to realize, each system is different in each state as to how they move that data forward. |
| 13 14 15 16 17 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but you have to realize, each system is different in each state as to how they move that data forward. So, that's just one example. But it was an |
| 13 14 15 16 17 18 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but you have to realize, each system is different in each state as to how they move that data forward. So, that's just one example. But it was an excellent question. |
| 13 14 15 16 17 18 19 | at CDC is doing they're doing an awesome job and helping keep it as standard as possible, but you have to realize, each system is different in each state as to how they move that data forward. So, that's just one example. But it was an excellent question. Sherri, I see your hand is up now. |

Page 204

direct us and inform us as to where we can make
 positive changes.

My question is first assumed on -- it includes the assumption that both of your organizations and agencies recognize that healthrelated social needs are also contributing factors to infant and maternal mortality, whether it's causal or associated to pregnancy in terms of maternal mortality.

10 My question is for both of your 11 agencies and I'd like to open it up to HHS as well 12 when I ask, where is the system prepared to begin 13 to collect health-related social needs, and where 14 are the barriers or challenges to doing that? 15 BELINDA PETTIFORD: Is anyone -- is

16 everybody going to answer at once?

TARA SANDER LEE: Yeah. Thanks,
ASHLEY BUSACKER: Sherri, that's a great question.
So, we at CDC have fairly recently introduced the
Community Vital Signs Dashboard in terms of the
Maternal Mortality Review Committee processes.
So, this is a dashboard, which holds community

Page 205

| 1 | context indicators, and there's a paper I can put |
|----|--|
| 2 | in the chat from Dr. Michael Kramer. And these |
| 3 | indicators are based on where the individual last |
| 4 | lived and gives some idea of the social factors. |
| 5 | So, there's a large group of them. They're split |
| 6 | into domains and the idea is that the Maternal |
| 7 | Mortality Review Committee can look at these |
| 8 | dashboards to give that community a social context |
| 9 | to the review. |
| 10 | The other thing that the MMRIA data |
| 11 | system has is a place to collect what we call |
| 12 | social and environmental profiles, so a place to |
| 13 | know information that the committee or the |
| 14 | abstractor finds for the case. This could come |
| 15 | from kind of a next-of-kin interview or an |
| 16 | informant interview, but it's also noted in social |
| 17 | records and other sources. |
| 10 | So the Maternal Mortality Powiew |

18 So, the Maternal Mortality Review 19 Committee data, I think, has the potential to look 20 at some of those social determinants of health and 21 drivers of health that we maybe can't get to with 22 just the vital records alone. Day 1 of 2

| 1 | And then we've also used those |
|----|--|
| T | |
| 2 | community indicators, the vital signs indicators |
| 3 | in an analysis of our PMSS data, again based on |
| 4 | the place of residence at death. |
| 5 | So, I can put those two papers in, |
| 6 | but we really hope with our coming analyses that |
| 7 | you'll see more of that data from our team. |
| 8 | BELINDA PETTIFORD: Sherri, does that |
| 9 | answer your question? |
| 10 | SHERRI ALDERMAN: It does. Thank you |
| 11 | very much. I'm also curious if there are |
| 12 | challenges with coding to be able to capture the |
| 13 | health-related social needs. |
| 14 | BELINDA PETTIFORD: And if you want |
| 15 | to drop the response in the chat while you all are |
| 16 | thinking about it. Sherri, I'm going to go onto |
| 17 | Jacob while they're thinking on that one, okay? |
| 18 | Thanks. |
| 19 | Jacob. |
| 20 | JACOB WARREN: Thank you. I just |
| 21 | wanted to thank all the representatives for all |
| 22 | this very, very helpful information. |

Page 207

| 1 | I have a quick question for Danielle. |
|----|---|
| 2 | I was looking at the infant mortality and I was |
| 3 | trying to you had a lot of wonderful data and I |
| 4 | was trying to very quickly synthesize it as you |
| 5 | were going through. Are you seeing any even if |
| 6 | it's not statistical numeric trends in closing |
| 7 | the inequity gaps? So, you know, it's great that |
| 8 | we have our infant mortality down-turning, but is |
| 9 | it just going down equally across all the groups |
| 10 | where we're not actually closing our disparity |
| 11 | gaps, or I don't know if you had any indication |
| 12 | from your data that you commented on. |
| 13 | DANIELLE ELY: So, if you're thinking |
| 14 | back across the many, you're right, I included a |
| 15 | lot of information because I know there are a lot |
| 16 | of things that people are interested in, and so |

16 of things that people are interested in, and so 17 going quickly was the best I could do on that.

So, if you think back in terms of inequities by maternal race and Hispanic origin on that slide that I included from 2017 to 2020 just using the single race, the fact that we're seeing infant mortality rates decline at different

| 1 | percentages or different rates I had saying |
|----|--|
| 2 | rates multiple times but, you know, comparing |
| 3 | like some groups at the 5 to 8% level, which is a |
| 4 | little more equal, but then we're seeing these |
| 5 | larger declines of, you know, 17% for some of the |
| 6 | other groups. Then if you're looking at declines |
| 7 | by, you know, place in terms of states, we see |
| 8 | states with greater declines. Granted, some of |
| 9 | that is because some states have further to go |
| 10 | compared to other states over time. |
| 11 | So in general, I think you could say |
| 12 | that some of the disparities are closing while |
| 13 | others might be getting larger, and some of that |
| 14 | will depend on what groups you're looking at, what |
| 15 | kind of information you're trying to get to. But, |
| 16 | in general, I think you can easily say that there |
| 17 | are some improvements, but also probably some |
| 18 | places where it's getting worse. |
| 19 | BELINDA PETTIFORD: Thank you. |
| 20 | Any other questions? I know we're |
| 21 | running at little bit overtime, but I know this |
| 22 | data conversation is so important, as it drives |

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

| | Page 209 |
|----|--|
| 1 | our work as we continue to move forward. I know |
| 2 | there was one question, I think, Phyllis, you |
| 3 | dropped in the chat. I don't know if you got your |
| 4 | answer or not. It was around, I want to say |
| 5 | injury. |
| 6 | ASHLEY BUSACKER: Yeah, Belinda, I'm |
| 7 | working on typing a response. |
| 8 | BELINDA PETTIFORD: Oh, okay. |
| 9 | ASHLEY BUSACKER: I can type it, or I |
| 10 | can talk, whichever. |
| 11 | PHYLLIS SHARPS: Yeah, just my own |
| 12 | interest is domestic violence and pregnancy |
| 13 | outcomes, and we did see during the pandemic a lot |
| 14 | more calls from women who were, you know, forced |
| 15 | to be at home with abusers and I have written a |
| 16 | paper on pregnancy-associated deaths. But I was |
| 17 | just wondering if there is any systematic tracking |
| 18 | of that data also. |
| 19 | ASHLEY BUSACKER: So, within the |
| 20 | Maternal Mortality Review Committee data, we do |
| 21 | have data on pregnancy-related deaths, but the |
| 22 | manner of death was intentional, so suicide or |

| | hemieide We would have some messedations |
|----|---|
| 1 | homicide. We would have some recommendations |
| 2 | there. Is that helpful or are you looking for |
| 3 | okay, so yeah. Let me I'll put some |
| 4 | information in the chat and then I also see the |
| 5 | question about the MMRIA states, so I'm going to |
| 6 | drop a photo of the map. |
| 7 | BELINDA PETTIFORD: Thank you all so |
| 8 | much. Sarah and Emma, one of you all, can we make |
| 9 | sure we grab the chat before the meeting is over |
| 10 | because we're getting really good information in |
| 11 | the chat, especially all of the links that are |
| 12 | placed there so that we can get them back later. |
| 13 | That would be really helpful. |
| 14 | EMMA KELLY: Yes, we will. |
| 15 | BELINDA PETTIFORD: Thank you, Emma. |
| 16 | And if you call can join me in |
| 17 | thanking this awesome panel, you all did an |
| 18 | amazing job. So, thank you all so very much for |
| 19 | this great data. We've got a long ways to go, but |
| 20 | we appreciate you all sharing the data with us. |
| 21 | And now that we've had a chance to |
| | |

Advisory Committee on Infant and Maternal Mortality

Day 1 of 2

22

March 20, 2023

Page 211

| 1 | our next session on Where Does The Committee Go |
|----|--|
| 2 | From Here. |
| 3 | |
| 4 | WHERE DOES THE COMMITTEE GO FROM HERE |
| 5 | |
| 6 | BELINDA PETTIFORD: And again, we |
| 7 | just spent time reviewing this data in great |
| 8 | detail, answered all of our many questions, and |
| 9 | I'm sure more questions will come. But I wanted |
| 10 | us to take some time today to just think about |
| 11 | what are our next steps as the ACIMM committee. |
| 12 | Where do we want to go next? I want to have a |
| 13 | short conversation with this committee about those |
| 14 | things. |
| 15 | So, one question that kind of comes |
| 16 | to mind is first of all, is there any work that we |
| 17 | have left kind of unfinished that we need to wrap |
| 18 | up from the last committee? If anyone can think |
| 19 | of anything, if you will come off of mute and |
| 20 | share that, we by all means will continue to keep |
| 21 | our eye on the options for American Indian/Alaska |

Native as we want to make sure that work continues

Page 212

to move forward and we prioritize that. So, we
will definitely continue that.

But did we leave anything out that we might bases? Vanessa, we hope you feel much better soon. Thank you for dropping that in the chat.

And if we haven't left anything off 7 that we need to wrap up, I want us to now talk 8 about where do we want to focus on next. So, as 9 we shared earlier, I know everyone came on at 10 different points in time into this committee, so 11 this last go around, we actually have had three 12 sets of recommendations that we moved forward to 13 14 the Secretary. But at this point in time, now that we've looked at the data, we've had some 15 conversation around framing, and we're going to 16 try to bring in someone to share a little bit more 17 information and guide us through the framing 18 process. 19

I really want us to think through what areas do we want to focus on next to improve maternal and infant health in this country. We

| 1 | definitely want to make sure that the voices of |
|----|--|
| 2 | individuals with lived experience are elevated, |
| 3 | and we'll get to hear more of that tomorrow when |
| 4 | ShaRhonda is prepared to share her story with us, |
| 5 | and we want to continue to make sure we're doing |
| 6 | that as part of each one of our meetings. |
| 7 | But is there an area that resonates |
| 8 | with you all right now that you think, oh gosh, I |
| 9 | can't believe we haven't delved deeper into this |
| 10 | or do we want the team to kind of help us research |
| 11 | it a little further? Do we want to bring in a |
| 12 | speaker? Is there a specific area and I see |
| 13 | your hand, ShaRhonda. |
| 14 | SHARHONDA THOMPSON: Well, for me, |
| 15 | one of the things that jumped out and kept jumping |
| 16 | out for me with the data was how the mortality |
| 17 | rate was higher when the mother was receiving |
| 18 | benefits from the state like WIC, like how it was |
| 19 | higher than the ones who had private insurance, |
| 20 | and it I'm I have my personal idea as to |
| 21 | why, you know, that kept sticking out. But I |
| 22 | don't know if this is something that has been |

| 1 | looked into in the past or if it's something that |
|----|---|
| 2 | we could dive into a little more. Because the |
| 3 | whole purpose of this supplemental benefit is to |
| 4 | help and for someone reason, it's just not it's |
| 5 | not sufficient enough. So, is that something that |
| 6 | has been looked into? |
| 7 | BELINDA PETTIFORD: That's a |
| 8 | wonderful question, ShaRhonda. And, you know, I |
| 9 | think you probably have some ideas of what the |
| 10 | answer is realizing, you know, I think it was I |
| 11 | can't remember who was presenting, I don't |
| 12 | remember if it was Danielle, if you were |
| 13 | presenting when you were overlaying what I call |
| 14 | maps one on top of the other that basically says |
| 15 | some of the challenges that we're dealing with |
| 16 | are, again, not just the clinical part of the |
| 17 | world, but we're dealing with our social |
| 18 | determinants of health, which is our determinants |
| 19 | of health. So, we're looking at issues of |
| 20 | socioeconomic status, and we're looking at issues |
| 21 | around how does housing impact this. How are some |
| 22 | of the larger issues that are impacting it and I |

| 1 | think the ones like you had, Danielle, was related |
|----|--|
| 2 | to WIC, but we know WIC is one piece of the |
| 3 | puzzle. We help some with making sure that we are |
| 4 | dealing with food insecurities. But we know |
| 5 | again, it is one component and realizing many of |
| 6 | our families need more. So, that's a great point, |
| 7 | ShaRhonda, and I'm putting it down as a note for |
| 8 | just some more follow-up on that. |
| 9 | And Kate, I see your hand. |
| 10 | KATE MENARD: Yeah, Belinda, I'm, you |
| 11 | know, I'm still relatively new to the committee |
| 12 | and was so impressed that the that the |
| 13 | committee focused so intently, you know, kind of |
| 14 | on one topic and produced the report that you all, |
| 15 | you know, the people that have been on this group |
| 16 | did for a while, and I'm just wondering what the |
| 17 | next big thing is as you're perhaps asking. And |
| 18 | in listening to what you said, Belinda, you, you |
| 19 | know, you're you're seeing the need to, you |
| 20 | know, not putting recommendations out there but |
| 21 | but put out actions, and how do we get there? I |
| 22 | mean, how would it get there in a public health |

| 1 | field where we need to be, you know, totally |
|----|--|
| 2 | focused on health equity and the importance of |
| 3 | that and I think you believe, and I've become more |
| 4 | appreciative of the fact that the community |
| 5 | engagement aspect of our work and how we implement |
| 6 | change is is as important or even more |
| 7 | important than how we kind of discover what change |
| 8 | should be, you know, the different practices that |
| 9 | can make a difference. |
| 10 | And I'm wondering I'm wondering if |
| 11 | there's, you know, a possibility for the group to |
| 12 | enter into an exercise where we look at, you know, |
| 13 | community-engaged implementation and what what |
| 14 | strategies, you know, what what emphasis might |
| 15 | be out there that we could most could most |
| 16 | impact change if we took that approach. I'm just |
| 17 | kind of throwing out an idea, but I'm listening |
| 18 | and wondering what can be our next big thing, and |
| 19 | it may be community engaged implementation of |
| 20 | selected things and how we go about that, and |
| 21 | having almost a, you know, a playbook to do that. |
| 22 | BELINDA PETTIFORD: Thank you, Kate. |

Day 1 of 2

March 20, 2023

Page 217

1 You know me well, don't you, here in North Carolina. So, thank you, Kate. 2 KATE MENARD: You taught me a lot. 3 BELINDA PETTIFORD: We'll do it 4 together. Thank you. 5 Phyllis, I see your hand as well. 6 PHYLLIS SHARPS: Yeah, I quess I was 7 kind of thinking along the same lines and picking 8 up on something that Dr. Warren said about based 9 upon the recommendations from the report we just 10 did the value of going to communities. And so I 11 was thinking, in those thirteen states that had 12 13 the most significant changes in maternal mortality 14 and, you know, those indicators, are there best Is there a consistent trend? practices? Could we 15 do some deep research to see what might be related 16 to those things, and do we eventually go to one of 17 those -- one or two of those communities and just 18 kind of look at what that best practice looks like 19 or convene, you know, a meeting where those people 20 implementing those best practices or initiatives 21 or integrated health care, whatever it was, they 22

Page 218

| 1 | come and talk about their programs so that maybe |
|----|--|
| 2 | we develop some recommendations that would be |
| 3 | actionable steps that other communities struggling |
| 4 | might consider. |
| 5 | BELINDA PETTIFORD: Great point, |
| 6 | Phyllis. Thank you so much. I'm really trying to |
| 7 | think through. So, what is working in different |
| 8 | parts of this country, especially when we're |
| 9 | talking about a part of the country that is |
| 10 | diverse, because some of our challenges is the |
| 11 | fact that in certain communities, we're going to |
| 12 | see worse outcomes. So, how do we make sure we |
| 13 | are connecting with those entities, those states, |
| 14 | those communities, those organizations that are |
| 15 | actually seeing improvements and what are the |
| 16 | lessons learned from them. So, I like that idea, |
| 17 | Phyllis. Thank you. |
| 18 | Anyone else? |

19 TARA SANDER LEE: I think one thing I
20 noticed is that, you know, mental health was just
21 a huge indicator. That was associated with a lot
22 of just mental health issues came out. So, I was

Page 219

| 1 | associated with maternal mortality and I just |
|----|---|
| 2 | wonder if we need to dig deeper into that and the |
| 3 | reason. I think I personally would like I |
| 4 | think since that just continued to come up, |
| 5 | especially and that there were, you know, I |
| 6 | just think that that's something that was |
| 7 | consistent, and it would be nice to kind of dig |
| 8 | deeper and to find out why. And maybe we and |
| 9 | if that data is there, maybe we need to look |
| 10 | closer at that. |
| 11 | And I guess I would like to |
| 12 | understand too better when the data is analyzed, |
| 13 | like can they actually pull that data out. Can |
| 14 | is there enough data there to actually understand |
| 15 | how mental health issues were associated with the |
| 16 | deaths. So, those are just some of the questions |
| 17 | that I have. |
| 18 | BELINDA PETTIFORD: Thank you, Tara. |
| 19 | And I see Kate dropped in the chat the fact that |
| 20 | mental illness is not part of SMM data. So, they |
| 21 | are maternal morbidity data, and I don't know if |

many of us have thought about the fact that it is

22

Day 1 of 2

March 20, 2023

| | Page 220 |
|----|--|
| 1 | not even included, and it definitely should be. |
| 2 | TARA SANDER LEE: That's a great |
| 3 | point. |
| 4 | BELINDA PETTIFORD: Yep. Anyone |
| 5 | else? Anything going on in your part of the world |
| 6 | that is working or that you're struggling mightily |
| 7 | with? |
| 8 | Yes, Jacob. |
| 9 | JACOB WARREN: I apologize. I know I |
| 10 | sort of beat this drum every time, but it's even |
| 11 | more relevant now that I've moved from Georgia to |
| 12 | Wyoming. |
| 13 | You know, as we continue our |
| 14 | conversations about magnitude of impact, just |
| 15 | figuring out how we balance that with places like |
| 16 | the mountain west where we're never going to pop |
| 17 | big on numbers, but it doesn't mean that we don't |
| 18 | still have challenges to work through, so how |
| 19 | we're balancing that size and count issue with, |
| 20 | you know, there are only 500,000 people in my |
| 21 | state. So, we're never going to pop high on a |
| 22 | raw, and when we start to look even at rates and |

| 1 | just the fact that we're so sensitive to ups and |
|----|---|
| 2 | downs that our data is suppressed, just thinking |
| 3 | about how some regional thought about that could |
| 4 | happen as well. So, we're looking at, you know, |
| 5 | the Dakotas with Idaho, maybe there's some |
| 6 | regional regionalization we need to think about |
| 7 | in some of the smaller places because, you know, |
| 8 | we have one of the largest reservations in our |
| 9 | state, so we could do some important work in |
| 10 | equity, but sometimes the smaller states get |
| 11 | overlooked. We're a big state but a small |
| 12 | population. So, just how we balance that in this |
| 13 | whole conversation, I think, is something to keep |
| 14 | in mind as well. |
| 15 | BELINDA PETTIFORD: No, that's a |
| 16 | great point, Jacob, and thank you for bringing it |
| 17 | back to everyone's attention. |
| 18 | ShaRhonda. |
| 19 | SHARHONDA THOMPSON: For me, |
| 20 | communication, right? We want more community |
| 21 | involvement, but how? How do we go about reaching |
| 22 | them? I know there was a big push for technology, |
| | |

| 1 | but is that is social media the right way? Is |
|----|--|
| 2 | something in the doctor's office maybe a better |
| 3 | way? How are we communicating that we want the |
| 4 | community to help us? And how are we getting that |
| 5 | word out? I think that's what's lacking, at least |
| 6 | in my area, I know that's one of the things that's |
| 7 | lacking. People have no idea that this committee |
| 8 | exists. So, how are we getting the word out? |
| 9 | BELINDA PETTIFORD: Thank you, |
| 10 | ShaRhonda. |
| 11 | And I see, Kate, you've dropped in |
| 12 | the chat improve on regionalization and risk- |
| 13 | appropriate care. |
| 14 | Charlan, thank you for your note in |
| 15 | the chat as well. So, health conditions. |
| 16 | And Jacob, I see your hand. |
| 17 | JACOB WARREN: Yeah, sorry. Just one |
| 18 | last comment. One thing too just putting on the |
| 19 | other hat that I wear is how we start integrating |
| 20 | this better into health professions education |
| 21 | because I think we've got a real opportunity to |
| 22 | translate this into how we're training across the |

| 1 | whole health care spectrum. So we do everything |
|----------|--|
| 2 | from community health workers to physicians here, |
| 3 | and I think if we look at how we can make |
| 4 | recommendations maybe even out it might be |
| 5 | outside of our scope technically, but ways that |
| 6 | educational institutions could play a role in this |
| 7 | process, I think, is something that we could think |
| 8 | through, sort of building on what ShaRhonda was |
| 9 | saying about how are we getting messaging out. It |
| 10 | might be another way for us to look at this. |
| 11 | BELINDA PETTIFORD: Thank you, Jacob, |
| 12 | and I don't think it's outside of our purview. I |
| 13 | think we can make a recommendation related to it. |
| 14 | I know one other thing. I don't know |
| 15 | how many of you all are familiar with the work in |
| 16 | your states or communities with your area health |
| 17 | education centers, you know, AHECs. They now, |
| 18 | they have a Scholars Program where, you know, they |
| 19 | work with students like in the freshman and |
| | |
| 20 | sophomore year in college and trying to encourage |
| 20 21 | |

| 1 | trying to get them to consider the maternal and |
|----------|--|
| 2 | infant health fields, so trying to even narrow the |
| 3 | focus down. And more recently, we've been working |
| 4 | with our state AHECs to do it further upstream to |
| 5 | work with high school students because we've got |
| 6 | to get to the workforce earlier before people, you |
| 7 | know, have already decided what they want to do, |
| 8 | but also decided how they want to do it. So, |
| 9 | great point, Jacob. |
| 10 | And Marie, I see integrate and |
| 11 | transition from maternity to extended postpartum |
| 12 | for high-risk communities. Thank you, Marie. |
| 13 | And HRSA funds, AHECs through |
| 14 | thank you the Bureau of Health Workforce. So, |
| 15 | there is a great opportunity for collaboration. |
| 16 | Wonderful, we probably want to invite them to a |
| 17 | future meeting. Sarah is going to help me |
| 18 | |
| | remember that, aren't you Sarah? Thank you. She |
| 19 | remember that, aren't you Sarah? Thank you. She is not just relying on my memory alone, bless her. |
| 19 20 | |
| | is not just relying on my memory alone, bless her. |

| 1 | an e-mail and I'll have it in the morning, or you |
|----|--|
| 2 | can e-mail in the morning. But I want us to |
| 3 | continue this part of the conversation. |
| 4 | And as we're thinking about what we |
| 5 | want to move forward with, we also need to think |
| 6 | about any specific resources or support that we |
| 7 | need maybe related to these areas to make sure |
| 8 | that we're, you know, that we're getting the best |
| 9 | information that we can have in the decisions that |
| 10 | we're trying to make. |
| 11 | And Michael, I saw your hand go up |
| 12 | and then I saw it go down. So, I'm assuming you |
| 13 | really wanted it to be up. |
| 14 | MICHAEL WARREN: Sure. I think a |
| 15 | tag-on to that ask is I think there are a number |
| 16 | of efforts, not just in the Bureau, but across |
| 17 | other partners within HHS and other parts of the |
| 18 | federal government that are working to address |
| 19 | both maternal and infant health outcomes, and I |
| 20 | think one of the key jobs of this committee is to |
| 21 | advise the Secretary on HHS programs, specifically |
| 22 | Healthy Start, but also others. But I think there |

Page 226

| 1 | is a great opportunity with these themes of like |
|----|--|
| 2 | what's working out in the field and what can we |
| 3 | learn from that. Similarly, where are these |
| 4 | challenges to bring back to guide us as we think |
| 5 | about these funding opportunities? |
| 6 | I shared a number at the beginning of |
| 7 | the funding opportunities we're putting out. You |
| 8 | know, at MCHB, we're primarily like a grant-making |
| 9 | entity. And so, if we want to think about |
| 10 | changes, changes to those funding opportunities |
| 11 | are key at hearing from you all on suggestions for |
| 12 | how to do that is a great way for us to leverage |
| 13 | the wisdom of this committee and your |
| 14 | partnerships. |
| 15 | BELINDA PETTIFORD: Thank you for |
| 16 | chiming in to share that, Michael. |
| 17 | And I think I can't remember who |
| 18 | presented earlier and they talked about, was it |
| 19 | Alison, when she talked about the community |
| | |

21 do research and they've given these fifteen kind 22 of like challenge grants. To me, that is a great

20

organizations that they have been working with to

| 1 | opportunity to pull other people into the |
|----|--|
| 2 | discussion that may normally never be part of the |
| 3 | conversation. And these are probably entities |
| 4 | that can reach people, but they've never been |
| 5 | given the opportunity to actually get some |
| 6 | resources to support the work. So, I know I was |
| 7 | very excited, Alison, when I heard you start to |
| 8 | talk about that, and I was writing notes |
| 9 | everywhere. |
| 10 | ALISON CERNICH: I think the other |
| 11 | thing we could do too is we have the groups that |
| 12 | said that they want to be part of that and HHS at |
| 13 | large has those names. So, Michael, maybe we |
| 14 | could even think about how to engage some of these |
| 15 | groups moving forward because, you know, it may be |
| 16 | a good opportunity at that level. |
| 17 | BELINDA PETTIFORD: And I wonder, are |
| 18 | you all in that same conversation as you're trying |
| 19 | to work more with community organizations and |
| 20 | maybe representing historical and marginalized |
| 21 | populations may or may not be how you are giving |
| 22 | them access to funds. Because, you know, I know |
| | |

Day 1 of 2

March 20, 2023

| | Page 228 |
|----|--|
| 1 | with many systems, you spend the money, and then |
| 2 | we pay you back, and that doesn't work for |
| 3 | everyone. That doesn't |
| 4 | ALISON CERNICH: Yeah, this changes |
| 5 | the way we do that for sure, Belinda. |
| 6 | BELINDA PETTIFORD: Okay. |
| 7 | ALISON CERNICH: We changed the way |
| 8 | the prize authority works and the reason we |
| 9 | decided to use that is because so they have to |
| 10 | do some work, but we staged the challenge in such |
| 11 | a way that we were giving them money throughout as |
| 12 | they moved so that they could we can't tell |
| 13 | them how to use the money at all. We essentially |
| 14 | give them a check with the prize, and HRSA has |
| 15 | also done some of these through the prize |
| 16 | authority. So, the way that it is structured is |
| 17 | that we decrease the administrative burden so it |
| 18 | was a page for their first application to this, |
| 19 | and we brought them in and trained them some for |
| 20 | free, but it was short. Then the next phase, we |
| 21 | gave them a check. Now, again, they can use it to |
| 22 | build their infrastructure, they can use it |

| 1 | another way, it's up to their discretion. But as |
|----|--|
| 2 | they move, we're giving them money to potentially |
| 3 | support what they're doing in the next phase to |
| 4 | get to that final prize. But really, the only |
| 5 | thing they need to give us is a bank account |
| 6 | that's a domestic bank account. They have to be a |
| 7 | domestic organization and they have to have a bank |
| 8 | account. |
| 9 | BELINDA PETTIFORD: That is awesome. |
| 10 | You need to share that with some other entities. |
| 11 | ALISON CERNICH: Well, Michael has |
| 12 | done it at HRSA, I know for sure. So it's not |
| 13 | it's just, you know, I think it's the way that we |
| 14 | structure some of these things and trying what |
| 15 | we've talked about in our community is we can't |
| 16 | keep trying to get to these communities the |
| 17 | traditional way because if we keep doing the same |
| 18 | thing, we're going to keep getting the same |
| 19 | results, and we're not engaging these communities |
| 20 | in a way that is sensitive to what they need, |
| 21 | especially small organizations, and we also have |
| 22 | to think about how we give them money to move them |

Page 230 into a research infrastructure that's respectful of a small group's ability to develop. So, we worked a little bit with some nonprofit partners, like at March of Dimes, and at Commonwealth to think about how to structure the prizes as well so it was respectful of those groups. BELINDA PETTIFORD: Thank you. MICHAEL WARREN: And I think, if I could add, the prize mechanism is a great opportunity that we have. We also were looking at our traditional grants and where we have flexibility. So, simple things like we've heard from community-based organizations requiring us to spend so much money on evaluation, which takes money away from direct services, and so, how can you simplify that or think about supporting awardees in other ways to do that.

We've heard things like just the number of pages you're requiring in a grant application is overwhelming. And so, for folks who are very focused on service delivery, it may

be difficult to do that.

March 20, 20 Page 231

And so, we're trying to revise our 2 grant-making process where we've got the authority 3 to be more flexible so that it opens up the door 4 for more folks to apply. 5 BELINDA PETTIFORD: That is 6 And actually, Alison, I was thinking wonderful. 7 you should share it with some states. I wasn't 8 really talking about Michael. I'm thinking of 9 some other places that need it. 10 ALISON CERNICH: I don't know if 11 states have -- yeah, that's interesting because I 12 13 know the federal agencies have prize authority. Ι don't know if states have given themselves prize 14 authorities, but I'm sure they have flexible ways 15 to get funding out that may be different. 16 We're working on BELINDA PETTIFORD: 17 We'll see but thank you so much. 18 it. And also, I do remember years ago, 19 Michael, that through the Healthy Start world, 20 there used to be capacity building grants. Those 21

entities would have like a year to plan and get

Page 232 ready for a larger grant and, you know, that is 1 one of those other areas that I really felt like 2 you could give like communities or small entities 3 the opportunity to actually apply for those 4 resources, and I think those -- that's another 5 opportunity I just look at it as. 6 Okay. I don't want to cut anyone off 7 because Belinda could keep talking about this 8 topic and she will move on. We do have an agenda. 9 10 OPEN DISCUSSION 11 12 BELINDA PETTIFORD: But we're open 13 discussion now. So, we didn't plan anything 14 specific for open discussion. We wanted to use it 15 as an opportunity if there's anything you want to 16 share, anything about today's meeting, anything 17 about tomorrow's part of the conversation, 18 anything that you're concerned about, anything 19 that excites you, your plans for the evening. 20 You will quickly learn that Belinda does not believe 21 in just holding you here for a meeting because we 22

| 1 | put fifteen minutes down for open discussion if |
|----------------------------------|---|
| 2 | you don't have anything specific to discuss. |
| 3 | This has been an awesome meeting |
| 4 | today. You all have done a really good job of |
| 5 | being engaged, and please know I appreciate that. |
| 6 | It's really hard to chair a meeting when you look |
| 7 | down and there's no one there, and you're like |
| 8 | okay, I can only talk to myself for so long. So, |
| 9 | thank you all so very much. |
| 10 | |
| 11 | WRAP-UP AND OVERNIGHT CONSIDERATIONS |
| 12 | |
| | |
| 13 | BELINDA PETTIFORD: I don't really |
| 13 14 | BELINDA PETTIFORD: I don't really have an assignment for tonight or anything that |
| | - |
| 14 | have an assignment for tonight or anything that |
| 14 15 | have an assignment for tonight or anything that we're encouraging you to do. But if you get a |
| 14 15 16 | have an assignment for tonight or anything that we're encouraging you to do. But if you get a chance in your spare time, we're working on trying |
| 14 15 16 17 | have an assignment for tonight or anything that we're encouraging you to do. But if you get a chance in your spare time, we're working on trying to shorten the size of the briefing books so that |

But if you get a chance in your spare time, we're working on trying to shorten the size of the briefing books so that they don't feel so overwhelming when we receive them. So, if you get a chance to, you know, |

Page 234

| 1 | it tomorrow. We probably won't even bring it up. |
|----|--|
| 2 | But if you will look at that if you get a moment. |
| 3 | Otherwise, anything else we need to |
| 4 | share for today? Thank you all for the notes in |
| 5 | the chat. |
| 6 | Otherwise, we will adjourn for today. |
| 7 | We will start back tomorrow at our same time. |
| 8 | Keep in mind, tomorrow's focus will start off with |
| 9 | ShaRhonda, and we really appreciate ShaRhonda for |
| 10 | her willingness to share her story and her journey |
| 11 | that has brought her to this committee. But we'll |
| 12 | also spend most of our day really listening to our |
| 13 | partners. We've asked our partners to come in and |
| 14 | share specifically what they're doing through |
| 15 | their networks to address maternal and infant |
| 16 | health to see if there is an area that may |
| 17 | resonate with us that we want to try to move |
| 18 | forward and try to elevate with them. So just |
| 19 | know that that is going to be much of our |
| 20 | conversation tomorrow, and we look forward to |
| 21 | seeing you all. |
| | |

22

Please enjoy your evening. Try to

Day 1 of 2

March 20, 2023

| 1 | get outside for a moment if it's not too cold |
|---|---|
| 2 | where you are, and otherwise, I look forward to |
| 3 | seeing you all tomorrow. Take care. |
| 4 | |
| 5 | (WHEREUPON THE MEETING WAS |
| 6 | ADJOURNED AND WILL CONTINUE ON |
| 7 | MARCH 21, 2023 AT 11:30 A.M. ET) |
| | |
