Notice Regarding Replacement NDC for Ganirelix Acetate Injection

Organon LLC (“Organon”) has requested that the Health Resources and Services Administration (“HRSA”) post this notice on its website to notify 340B Covered Entities that the national drug code (“NDC”) number for Ganirelix Acetate Injection is being transitioned to a new NDC beginning on December 18, 2024.

	NDC	Product	Package	Shield
Old NDC	78206-0138-01	Ganirelix Acetate Injection	Single-Use Syringe 250 mcg/0.5 mL	Natural Rubber / Latex Needle Shield
New NDC	78206-0138-02	Ganirelix Acetate Injection	Single-Use Syringe 250 mcg/0.5 mL	Rigid Needle Shield

340B Inventory Replenishment

Despite the NDC update, the new NDC is the same product (drug, dose, formulation, and volume) with the same 340B price as the old NDC, with the only difference being the type of needle shield (see table above). Therefore, Organon believes that Covered Entities utilizing a 340B inventory replenishment model may count accumulations of the old NDC toward replenishment of equal quantities of the corresponding new NDC.

Organon has instructed its authorized distributors to deplete their remaining inventory of the old NDC prior to distribution of the new NDC. Organon’s authorized distributors will communicate further information regarding the availability of the new NDC.

Any questions regarding this matter can be directed to Organon LLC, US Pharmaceutical Pricing, 4000 Chemical Road, Plymouth Meeting, PA 19462, or send an email to OGN_US_Pricing@organon.com.
