

# CERVICAL CANCER PREVENTION

## NEXT STEPS FROM TODAY'S VISIT

**Date:** \_\_\_\_/\_\_\_\_/\_\_\_\_

**WHAT:** You had a cervical cancer screening. It will identify anything out of the ordinary with your cervix. The screening is a test or test(s) that must be reviewed by a laboratory. It may take a few weeks for us to receive the results. Once we receive the results, we will share them with you.

**WHY:** If your test results show things that are not normal, we may ask you to return to the office for a follow-up. If the results are normal, we will let you know when to get your next cervical screening.

**WHEN:** You can expect text results \_\_\_\_\_. Please call us any time if you have questions.

Phone Number: (\_\_\_\_) \_\_\_\_-\_\_\_\_\_

**NEXT STEPS:** It is important to get your results and know what to do next. If you are asked to return to the office, here are some questions you may want to ask the doctor or nurse:

- What is the recommended follow-up?
- Are further tests necessary?
- How often do I need cervical cancer screening?
- Do I need the HPV vaccine?

My Notes:
